About this Series

The Smart Innovation, Systems and Technologies book series encompasses the topics of knowledge, intelligence, innovation and sustainability. The aim of the series is to make available a platform for the publication of books on all aspects of single and multi-disciplinary research on these themes in order to make the latest results available in a readily-accessible form. Volumes on interdisciplinary research combining two or more of these areas is particularly sought.

The series covers systems and paradigms that employ knowledge and intelligence in a broad sense. Its scope is systems having embedded knowledge and intelligence, which may be applied to the solution of world problems in industry, the environment and the community. It also focusses on the knowledge-transfer methodologies and innovation strategies employed to make this happen effectively. The combination of intelligent systems tools and a broad range of applications introduces a need for a synergy of disciplines from science, technology, business and the humanities. The series will include conference proceedings, edited collections, monographs, handbooks, reference books, and other relevant types of book in areas of science and technology where smart systems and technologies can offer innovative solutions.

High quality content is an essential feature for all book proposals accepted for the series. It is expected that editors of all accepted volumes will ensure that contributions are subjected to an appropriate level of reviewing process and adhere to KES quality principles.

Preface

This volume contains the proceedings of the 10th KES Conference on Agent and Multi-Agent Systems—Technologies and Applications (KES-AMSTA 2016) held in Puerto de la Cruz, Tenerife, Spain, between 15 and 17 June 2016. The conference was organized by KES International, its focus group on agent and multi-agent systems and University of Zagreb, Faculty of Electrical Engineering and Computing. The KES-AMSTA conference is a subseries of the KES conference series.

Following the successes of previous KES Conferences on Agent and Multi-Agent Systems—Technologies and Applications, held in Sorrento, Italy (KES-AMSTA 2015); Chania, Greece (KES-AMSTA 2014); Hue, Vietnam (KES-AMSTA 2013); Dubrovnik, Croatia (KES-AMSTA 2012); Manchester, UK (KES-AMSTA 2011); Gdynia, Poland (KES-AMSTA 2010); Uppsala, Sweden (KES-AMSTA 2009); Incheon, Korea (KES-AMSTA 2008); and Wroclaw, Poland (KES-AMSTA 2007), the conference featured the usual keynote talks, oral presentations and invited sessions closely aligned to the established themes of the conference.

KES-AMSTA is an international scientific conference for discussing and publishing innovative research in the field of agent and multi-agent systems and technologies applicable in the digital and knowledge economy. The aim of the conference was to provide an internationally respected forum for both the research and industrial communities on their latest work on innovative technologies and applications that is potentially disruptive to industries. Current topics of research in the field include technologies in the area of mobile and cloud computing, big data analysis, business intelligence, artificial intelligence, social systems, computer embedded systems and nature inspired manufacturing. Special attention is paid on the feature topics: business process management, agent-based modelling and simulation, anthropic-oriented computing, learning paradigms, and business informatics and gaming.

The conference attracted a substantial number of researchers and practitioners from all over the world who submitted their papers for main track covering the methodologies of agent and multi-agent systems applicable in the digital and
knowledge economy, and five invited sessions on specific topics within the field. Submissions came from 16 countries. Each paper was peer-reviewed by at least two members of the International Programme Committee and International Reviewer Board. 28 papers were selected for oral presentation and publication in the volume of the KES-AMSTA 2016 proceedings.

The Programme Committee defined the main track entitled Agent and Multi-Agent Systems and the following invited sessions: Agent-based Modeling and Simulation (ABMS), Business Process Management (BPM), Learning Paradigms and Applications: Agent-based Approach (LP:ABA), Anthropic-Oriented Computing (AOC), and Business Informatics and Gaming through Agent-based Modelling.

Accepted and presented papers highlight new trends and challenges in agent and multi-agent research. We hope that these results will be of value to the research community working in the fields of artificial intelligence, collective computational intelligence, robotics, dialogue systems and, in particular, agent and multi-agent systems, technologies, tools and applications.

The Chairs’ special thanks go to the following special session organizers: Dr. Roman Šperka, Silesian University in Opava, Czech Republic; Prof. Mirjana Ivanović, University of Novi Sad, Serbia; Prof. Costin Badica, University of Craiova, Romania; Prof. Zoran Budimac, University of Novi Sad, Serbia; Prof. Manuel Mazzara, Innopolis University, Russia; Max Talanov, Kazan Federal University and Innopolis University, Russia; Prof. Jordi Vallverdú, Universitat Autònoma de Barcelona, Spain; Prof. Salvatore Distefano, University of Messina, Italy; Prof. Robert Lowe, University of Skövde/University of Gothenburg, Sweden; Prof. Joseph Alexander Brown, Innopolis University, Russia; Assoc. Prof. Setsuya Kurahashi, University of Tsukuba, Japan; Prof. Takao Terano, Tokyo Institute of Technology, Japan; Prof. Hiroshi Takahashi, Keio University, Japan; and España for their excellent work.

Thanks are due to the Programme Co-chairs, all Programme and Reviewer Committee members, and all the additional reviewers for their valuable efforts in the review process, which helped us to guarantee the highest quality of selected papers for the conference.

We cordially thank all authors for their valuable contributions and all of the other participants in this conference. The conference would not be possible without their support.

April 2016

Gordan Jezic
Yun-Heh Jessica Chen-Burger
Robert J. Howlett
Lakhmi C. Jain
KES-AMSTA 2016 was organized by KES International—Innovation in Knowledge-Based and Intelligent Engineering Systems.

Honorary Chairs
I. Lovrek, University of Zagreb, Croatia
L.C. Jain, University of Canberra, Australia; and Bournemouth University, UK

Conference Co-chairs
G. Jezic, University of Zagreb, Croatia
J. Chen-Burger, The Heriot-Watt University, Scotland, UK

Executive Chair
R.J. Howlett, University of Bournemouth, UK

Programme Co-chairs
M. Kusek, University of Zagreb, Croatia
R. Sperka, Silesian University in Opava, Czech Republic

Publicity Chair
P. Skocir, University of Zagreb, Croatia
International Programme Committee

Dr. Dariusz Barbucha, Gdynia Maritime University, Poland
Prof. Costin Badica, University of Craiova, Romania
Dr. Marina Bagić Babac, Faculty of Electrical Engineering and Computing, University of Zagreb, Croatia
Dr. Iva Bojic, Singapore-MIT Alliance for Research and Technology, Singapore
Dr. Gloria Bordogna, CNR IREA, Italy
Joseph Alexander Brown, Innopolis University, Russia
Dr. Grażyna Brzykcy, Poznań University of Technology, Department of Control and Information Engineering, Poland
Prof. Zoran Budimac, University of Novi Sad, Serbia
Prof. Frantisek Capkovic, Slovak Academy of Sciences, Slovak Republic
Dr. Jessica Chen-Burger, The Heriot-Watt University, Scotland, UK
Dr. Angela Consoli, Defence Science and Technology Group, Australia
Prof. Ireneusz Czarnowski, Gdynia Maritime University, Poland
Prof. Radhakrishnan Delhibabu, Kazan Federal University, Russia
Salvatore Distefano, University of Messina, Italy; Kazan Federal University, Russia
Dr. Arnulfo Alanis Garza, Instituto Tecnologico de Tijuana, Mexico
Prof. Chihab Hanachi, University of Toulouse, France
Dr. Quang Hoang, Hue University, Vietnam
Prof. Zeljko Hocenski, Faculty of Electrical Engineering, University Josip Juraj Strossmayer in Osijek, Croatia
Prof. Tzung-pei Hong, National University of Kaohsiung, Taiwan
Dr. Adrianna Kozierkiewicz-Hetmańska, Wroclaw University of Technology, Poland
Prof. Mirjana Ivanovic, University of Novi Sad, Serbia
Prof. Piotr Jedrzejowicz, Gdynia Maritime University, Poland
Prof. Dragan Jevtic, University of Zagreb, Zagreb, Croatia
Dr. Arkadiusz Kawa, Poznan University of Economics, Poland
Prof. Petros Kefalas, The University of Sheffield International Faculty, Greece
Assoc. Prof. Setsuya Kurahashi, University of Tsukuba, Japan
Prof. Mario Kusek, University of Zagreb, Croatia
Prof. Kazuhiro Kuwabara, Ritsumeikan University, Japan
Dr. Konrad Kulakowski, AGH University of Science and Technology, Poland
Robert Lowe, University of Skövde/University of Gothenburg, Sweden
Dr. Marin Lujak, University Rey Juan Carlos, Spain
Dr. Manuel Mazzara, Innopolis University Russia
Dr. Daniel Moldt, University of Hamburg, Germany
Prof. Cezary Orlowski, Gdansk School of Banking, Poland
Assist. Prof. Vedran Podobnik, University of Zagreb, Croatia
Prof. Bhanu Prasad, Florida A&M University, USA
Prof. Radu-Emil Precup, Politehnica University of Timisoara, Romania
Rajesh Reghunadhan, Central University of South Bihar, India
Prof. Silvia Rossi, University of Naples “Federico II”, Italy
Mr. James O’Shea, Manchester Metropolitan University, UK  
Dr. Roman Sperka, Silesian University in Opava, Czech Republic  
Prof. Darko Stipanicev, University of Split, Croatia  
Prof. Ryszard Tadeusiewicz, AGH University of Science and Technology, Kraków, Poland  
Prof. Hiroshi Takahashi, Keio University, Japan  
Prof. Yasufumi Takama, Tokyo Metropolitan University, Japan  
Max Talanov, Kazan Federal University and Innopolis University, Russia  
Prof. Takao Terano, Tokyo Institute of Technology, Japan  
Dr. Wojciech Thomas, Wroclaw University of Technology, Poland  
Dr. Krunoslav Trzec, Ericsson Nikola Tesla, Croatia  
Prof. Täketoshi Ushijama, Kyushu University, Japan  
Prof. Jordi Vallverdú, Universitat Autònoma de Barcelona, Spain  
Prof. Bay Vo, Ho Chi Minh City University of Technology, Ho Chi Minh City, Vietnam  
Prof. Toyohide Watanabe, Nagoya University, Japan  
Mrs. Izabela Wierzbowska, Gdynia Maritime University, Poland  
Prof. Mahdi Zargayouna, University of Paris-Est, IFSTTAR, France  
Prof. Arkady Zaslavsky, Data61 at CSIRO, Australia

Workshop and Invited Session Chairs

Business Process Management

Dr. Roman Šperka, Silesian University in Opava, Czech Republic

Agent-Based Modelling and Simulation

Dr. Roman Šperka, Silesian University in Opava, Czech Republic

Anthropic-Oriented Computing

Prof. Manuel Mazzara, Innopolis University, Russia  
Max Talanov, Kazan Federal University and Innopolis University, Russia  
Prof. Jordi Vallverdu, Universitat Autònoma de Barcelona, Spain  
Prof. Salvatore Distefano, University of Messina, Italy; Kazan Federal University, Russia  
Prof. Robert Lowe, University of Skovde, University of Gothenburg, Sweden  
Prof. Joseph Alexander Brown, Innopolis University, Russia
Learning Paradigms and Applications: Agent-Based Approach

Prof. Mirjana Ivanovic, University of Novi Sad, Serbia
Prof. Zoran Budimac, University of Novi Sad, Serbia
Prof. Costin Badica, University of Craiova, Romania
Prof. Lakhmi Jain, University of Canberra, Australia and Bournemouth University, UK

Business Informatics and Gaming Through Agent-Based Modelling

Assoc. Prof. Setsuya Kurahashi, University of Tsukuba, Japan
Prof. Takao Terano, Tokyo Institute of Technology, Japan
Prof. Hiroshi Takahashi, Keio University, Japan
Contents

Part I  Agent and Multi-agent Systems

Faceted Query Answering in a Multiagent System of Ontology-Enhanced Databases ........................................... 3 Tadeusz Pankowski and Grażyna Brzykcy

Assignment Problem with Preference and an Efficient Solution Method Without Dissatisfaction .......................... 33 Kengo Saito and Toshiharu Sugawara

Efficient Model Checking Timed and Weighted Interpreted Systems Using SMT and SAT Solvers ...................... 45 Agnieszka M. Zbrzezny, Andrzej Zbrzezny and Franco Raimondi

Building a Realistic Data Environment for Multiagent Mobility Simulation ..................................................... 57 Feirouz Ksontini, Mahdi Zargayouna, Gérard Scemama and Bertrand Leroy

Agent-Based System for Reliable Machine-to-Machine Communication ......................................................... 69 Pavle Skocir, Mario Kusek and Gordan Jezic

Part II  Agent-Based Modeling and Simulation

Herding Algorithm in a Large Scale Multi-agent Simulation ............................................................. 83 Richard Cimler, Ondrej Doležal, Jitka Kühnová and Jakub Pavlík
I-Fuzzy Core for Cooperative Games with Vague Coalitions .......................... Elena Mielcová

Formalizing Data to Agent Model Mapping Using MOF: Application to a Model of Residential Mobility in Marrakesh .......................... Ahmed Laatabi, Nicolas Marilleau, Tri Nguyen-Huu, Hassan Hbid and Mohamed Ait Babram

A Communication and Tracking Ontology for Mobile Systems in the Event of a Large Scale Disaster .................................................. Mohd Khairul Azmi Hassan and Yun-Heh Chen-Burger

Towards an Interaction Protocols Adaptation and Management System for Coordination in Crisis Business Processes .......................... Wassim Chtourou and Lotfi Bouzguenda

Holonic Multi Agent System for Data Fusion in Vehicle Classification ............................................................................................. Ljiljana Šerić, Damir Krstinić, Maja Braović, Ivan Milatić, Aljoša Mirčevski and Darko Stipaničev

Modeling and Simulation of Coping Mechanisms and Emotional Behavior During Emergency Situations ................................. Mouna Belhaj, Fahem Kebair and Lamjed Ben Said

Dynamic System of Rating Alternatives by Agents with Interactions .............................................................................................. Radomír Perzina and Jaroslav Ramík

Traffic Speed Prediction Using Hidden Markov Models for Czech Republic Highways ................................................................. Lukáš Rapant, Kateřina Slaninová, Jan Martinovič and Tomáš Martinovič

Part III Business Process Management

Business Process Modeling of Logistic Production Systems .......................... Petr Suchánek and Robert Bucki

Application of a Business Economics Decision-Making Function in an Agent Simulation Framework .............................................. Roman Šperka

Reduction of User Profiles for Behavioral Graphs ........................................ Kateřina Slaninová, Jan Martinovič and Martin Golasowski
Part IV Learning Paradigms and Applications: Agent-Based Approach

Intelligent Agents and Game-Based Learning Modules in a Learning Management System ........................................ 233
Kristijan Kuk, Dejan Rančić, Olivera Pronić-Rančić and Dragan Ranđelović

Robot-Oriented Generative Learning Objects: An Agent-Based Vision .................................................... 247
Vytautas Štuikys, Renata Burbaitė, Vida Drasutė and Kristina Bespalova

Part V Anthropic-Oriented Computing (AOC)

Prediction of the Successful Completion of Requirements in Software Development—An Initial Study .................. 261
Witold Pedrycz, Joana Iljazi, Alberto Sillitti and Giancarlo Succi

Evolution of Thinking Models in Automatic Incident Processing Systems .................................................... 271
Alexander Toschev, Max Talanov and Salvatore Distefano

Quality Attributes in Practice: Contemporary Data .................. 281
Rasul Tumyrkin, Manuel Mazzara, Mohammad Kassab, Giancarlo Succi and JooYoung Lee

Robot Dream ........................................... 291
Alexander Tchitchigin, Max Talanov, Larisa Safina and Manuel Mazzara

Part VI Business Informatics and Gaming through Agent-Based Modelling

Model-Driven Development of Water Hammer Analysis Software for Irrigation Pipeline System ......................... 301
Yoshikazu Tanaka and Kazuhiko Tsuda

A Health Policy Simulation Model of Ebola Haemorrhagic Fever and Zika Fever .............................................. 319
Setsuya Kurahashi

Analyzing the Influence of Indexing Strategies on Investors’ Behavior and Asset Pricing Through Agent-Based Modeling: Smart Beta and Financial Markets ............................. 331
Hiroshi Takahashi
Text Analysis System for Measuring the Influence of News Articles on Intraday Price Changes in Financial Markets
Keiichi Goshima and Hiroshi Takahashi
