

Advances in Intelligent Systems and Computing

Volume 521

Series editor

Janusz Kacprzyk, Polish Academy of Sciences, Warsaw, Poland
e-mail: kacprzyk@ibspan.waw.pl

About this Series

The series “Advances in Intelligent Systems and Computing” contains publications on theory, applications, and design methods of Intelligent Systems and Intelligent Computing. Virtually all disciplines such as engineering, natural sciences, computer and information science, ICT, economics, business, e-commerce, environment, healthcare, life science are covered. The list of topics spans all the areas of modern intelligent systems and computing.

The publications within “Advances in Intelligent Systems and Computing” are primarily textbooks and proceedings of important conferences, symposia and congresses. They cover significant recent developments in the field, both of a foundational and applicable character. An important characteristic feature of the series is the short publication time and world-wide distribution. This permits a rapid and broad dissemination of research results.

Advisory Board

Chairman

Nikhil R. Pal, Indian Statistical Institute, Kolkata, India

Preface

This four-volume set of books contains the proceedings of the 37th International Conference on Information Systems Architecture and Technology, or ISAT 2016 for short, held on September 18–20, 2016, in Karpacz, Poland. The conference was organized by the Department of Management Systems and the Department of Computer Science, Wrocław University of Science and Technology, Poland.

The International Conference on Information Systems Architecture and Technology is organized by the Wrocław University of Science and Technology from the seventies of the last century. The purpose of the ISAT conference is to discuss a state of the art of the information systems concepts and applications as well as the architectures and technologies supporting modern information systems. Contemporary organizations seem to be knowledge-based organizations, and in connection with that, information becomes the most important resource. Knowledge management is the process through which organizations generate value from their intellectual and knowledge-based assets. It is a management philosophy, which combines good practice in purposeful information management with a culture of organizational learning, in order to improve the business performance. The computers are able to collect and select the information that can make some statistics, and so on but decisions have to be made by managers basing on their experience and taking into consideration computer support. An improvement in decision-making process is possible to be assured by analytical process supporting. Applying some analytical techniques, such as computer simulation, expert systems, and genetic algorithms, can improve the quality of managerial information.

One of the conference aims is also to consider an impact of the knowledge, information, computing, and the communication managing technologies of the organization functionality scope as well as the enterprise information systems design, implementation, and maintenance processes taking into the account various methodological, technological, and the technical aspects. It is also devoted to the information systems concepts and applications supporting exchange of goods and services by using different business models and exploiting opportunities offered by Internet-based electronic business and commerce solutions.

ISAT is a forum for specialized disciplinary research, as well as on interdisciplinary studies that aim to present original contributions and to discuss different subjects of today's information systems planning, designing, development, and implementation. The event is addressed to the scientific community, people involved in variety of topics related to information, management, computer, and communication systems and to people involved in the development of business information systems and business computer applications.

This year, we received more than 110 papers from about 10 countries. Each paper was reviewed by at least two members of Program Committee or independent reviewers. Only 86 best papers were selected for oral presentation and publication in the 37th International Conference on Information Systems Architecture and Technology proceedings.

This book is divided into four volumes, which splits papers into areas: Managing Complex Planning Environments, Systems Analysis and Modeling, Modeling of financial and Investment decisions, Risk Management, Project Management, Logistics and Market, Artificial Intelligence, Knowledge-Based Management, Web Systems, Computer Networks and Distributed Computing, High Performance Computing, Cloud Computing, Multi-agent Systems, Internet of Things, Mobile Systems, Service-Oriented Architecture Systems, Knowledge Discovery and Data Mining, Quality of Service, and E-Business Systems.

We would like to thank the Program Committee and external reviewers, who were essential for reviewing the papers and ensuring a high standard of the ISAT 2016 conference and its proceedings. We thank the authors, presenters, and participants of ISAT 2016, without them the conference could not have taken place. Finally, we thank the organizing team for their efforts during this and previous years which have led to a successful conclusion of the conference.

Contents

Part I Artificial Intelligence Methods

Identifying Project Alternatives with the Use of Constraint Programming	3
Marcin Relich	
A New Algorithm for Online Management of Fuzzy Rules Base for Nonlinear Modeling	15
Krystian Łapa	
Money Laundering Analytics Based on Contextual Analysis. Application of Problem Solving Ontologies in Financial Fraud Identification and Recognition	29
Mariusz Chmielewski and Piotr Stapor	
ALMM-Based Methods for Optimization Makespan Flow-Shop Problem with Defects	41
Edyta Kucharska, Katarzyna Grobler-Dębska and Krzysztof Rączka	
Dynamic Visualization of Generalized One-Sided Concept Lattices and Their Reductions	55
Miroslav Smatana and Peter Butka	
A Concept of Decision Support for Robust Resource—Constrained Scheduling Problems Using Hybrid Approach	67
Paweł Sitek and Jarosław Wikarek	
The Experimental Evaluation of Rules Partitioning Conception for Knowledge Base Systems	79
Roman Simiński	

Part II Project Management

Effective Project Management Using Web-Based System with Integrated Knowledge Base	93
František Babič and Barbora Čurová	
The Process of Verifying the Implementation of Design Patterns—Used Data Models	103
Rafał Wojszczyk and Włodzimierz Khadzhynov	
The Scrum Pricing Model for Developing a Common Software Framework in a Multi-project Environment	117
Michał Turek, Jan Werewka and Dariusz Pałka	
Environmental Management Systems According to ISO 14001	133
Jolanta Pakulska and Małgorzata Rutkowska-Podołowska	
Pre-testing of Polish Translation of System Usability Scale (SUS)	143
Anna Borkowska and Katarzyna Jach	

Part III Knowledge Discovery and Data Mining

Weighted Fuzzy Genetic Programming Algorithm for Structure and Parameters Selection of Fuzzy Systems for Nonlinear Modelling	157
Krystian Łapa and Krzysztof Cpałka	
Queuing Model of Wireless Access System	175
Sławomir Hanczewski, Maciej Stasiak and Piotr Zwierzykowski	
Clustering Algorithms and Data Streams for Supervised Control of Data and Prevention of Threats in Mobile Application Systems	187
Aneta Majchrzycka and Aneta Poniszewska-Marańda	
Using Fuzzy Knowledge Base to Evaluate a Classical Potential Barrier of Liquid Phase Reactions of <i>Tert</i>-Butyloxyl Radicals with Hydrocarbons	199
Vladimir E. Tumanov, Elena S. Amosova and Andrei I. Prokhorov	
Tree Based Reduction of Concept Lattices Based on Conceptual Indexes	211
Miroslav Smatana, Peter Butka and Lenka Čöveková	
An Experiment with Facebook as an Advertising Channel for Books and Audiobooks	221
Grzegorz Chodak and Grażyna Suchacka	

Performance Analysis of SPA Web Systems	235
Wojciech Stępiak and Ziemowit Nowak	
Application of Spatial Econometrics Methods in the Analysis of WLAN Performance	249
Leszek Borzemski, Jakub Barański and Anna Kamińska-Chuchmała	
Author Index	263
