Janet L. Miller

Teachers College

New York, New York

USA

This series supports the internationalization of curriculum studies worldwide. At this historical moment, curriculum inquiry occurs within national borders. Like the founders of the International Association for the Advancement of Curriculum Studies, we do not envision a worldwide field of curriculum studies mirroring the standardization the larger phenomenon of globalization threatens. In establishing this series, our commitment is to provide support for complicated conversation within and across national and regional borders regarding the content, context, and process of education, the organizational and intellectual center of which is the curriculum.

*I refuse to be intimidated by
reality anymore...
I can take it in small doses, but as a lifestyle
I found it too confining.
It was just too needful;
it expected me to be there for it all the time, and with all
I have to do –
I had to let something go.*

– Wagner, *The Search for Signs of Intelligent
Life in the Universe*, 2012

ACKNOWLEDGMENTS

I would like to begin by acknowledging that the research storied in this book was conducted on the traditional, ancestral, unceded territory of the Musqueam people whose beautiful, diverse, and plentiful lands provided a rich teaching and learning environment.

This book is the result of research undertaken as part of the Think&EatGreen@School project, a Social Science and Humanities Research Council (SSHRC) Community-University Research Alliance (CURA) Grant. I am grateful to the diverse and knowledgeable academic team including Alejandro Rojas, Elena Orrego, Will Valley, Gwen Chapman, and Jennifer Black.

I would like to thank Donna Haraway, James Clifford, Lauriel J. Adsit, Tommy Leung, and Robert Brucker for allowing me to use and reproduce their images and illustrations. I would like to thank Hampton Press, Leesa Fawcett, Donna Haraway, Karen Barad, and Jenny Reardon for allowing me to use and reprint various quotes as epigraphs.

I would like to thank Alane Lublow for letting me come into her wonderful class and work with such energetic and creative students. It was such a pleasure to be able to work with and learn from such an experienced, passionate, and talented educator.

I would like to thank the theorists whose work provided inspiration, humor, and hope, especially Donna Haraway, Noel Gough, Leesa Fawcett, Rosi Braidotti, and Karen Barad.

I am grateful to my thesis committee, Susan Gerofsky, Pat O'Riley, Donna Trueit, and Carl Leggo. I would like to thank William E. Doll, Jr. for his never-ending enthusiasm for life and learning, for seeing my

potential and encouraging me to continue to inquire rigorously and playfully into the complexity of the world. I would like to thank Don Krug whose passion for eco-art, as well as his academic/teaching support and advisement, was vital to the success of this project.

I would also like to thank my family for creating such a supportive, loving, and creative environment for me to grow up with-in. For encouraging me to be passionate about my work, allowing me to “dance on the edges of things,” and challenge existing limitations (internal and external) knowing that they will always be there to support me. Last but not least, I am forever indebted to the generations of strong women (including my grandmother Aunita Adsit) who strove to create the generative possibilities I have taken up and carried with me in my work and my life.

CONTENTS

1	How to Create Human Humus Instead of Human Hubris	1
2	A Cartographic Mapping Practice: Environmental Education, the Material/Discursive, and a New Materialist Praxis	15
3	Bag-lady Storytelling: The Carrier-bag Theory of Fiction as Research Praxis	43
4	Doing: Exploring the Lost Streams of Vancouver Through Eco-Art	55
5	Thinking: A Narrative Inquiry into Possible Figurations and Multiple Modes of Ecological Thought	79
6	How to Keep the Story Going for Those Who Come After	117
	Index	143

LIST OF ABBREVIATIONS

BPA	Bisphenol-A, an endocrine disrupting chemical.
EE	Environmental Education.
MSG	Monosodium glutamate (a form of the neurotoxin glutamate) used in the food industry as a flavor enhancer particularly in Chinese, Japanese, and Korean cuisine.
PAC	Parent Advisory Committee.
SF	SF is a material-semiotic sign used to describe a multitude of terms at once: Science Fiction, Speculative Fiction, Science Fantasy, Speculative Futures, Speculative Fabulation, String Figures, Science Fact, and So Far.
WCHP	White Capitalist Heterosexist Patriarchy narratives.
