About this Series

The Smart Innovation, Systems and Technologies book series encompasses the topics of knowledge, intelligence, innovation and sustainability. The aim of the series is to make available a platform for the publication of books on all aspects of single and multi-disciplinary research on these themes in order to make the latest results available in a readily-accessible form. Volumes on interdisciplinary research combining two or more of these areas is particularly sought.

The series covers systems and paradigms that employ knowledge and intelligence in a broad sense. Its scope is systems having embedded knowledge and intelligence, which may be applied to the solution of world problems in industry, the environment and the community. It also focusses on the knowledge-transfer methodologies and innovation strategies employed to make this happen effectively. The combination of intelligent systems tools and a broad range of applications introduces a need for a synergy of disciplines from science, technology, business and the humanities. The series will include conference proceedings, edited collections, monographs, handbooks, reference books, and other relevant types of book in areas of science and technology where smart systems and technologies can offer innovative solutions.

High quality content is an essential feature for all book proposals accepted for the series. It is expected that editors of all accepted volumes will ensure that contributions are subjected to an appropriate level of reviewing process and adhere to KES quality principles.

Preface

Welcome to the 12th International Conference on Intelligent Information Hiding and Multimedia Signal Processing (IIH-MSP 2016) held in Kaohsiung, Taiwan on November 21–23, 2016. IIH-MSP 2016 is hosted by National Kaohsiung University of Applied Sciences and technically co-sponsored by Tainan Chapter of IEEE Signal Processing Society, Fujian University of Technology, Chaoyang University of Technology, Taiwan Association for Web Intelligence Consortium, Fujian Provincial Key Laboratory of Big Data Mining and Applications (Fujian University of Technology), and Harbin Institute of Technology Shenzhen Graduate School. It aims to bring together researchers, engineers, and policymakers to discuss the related techniques, to exchange research ideas, and to make friends.

We received a total of 268 papers and finally 84 papers are accepted after the review process. Keynote speeches were kindly provided by Prof. Chin-Chen Chang (Feng Chia University, Taiwan) on “Some Steganographic Methods for Delivering Secret Messages Using Cover Media,” and Prof. Shyi-Ming Chen (National Taiwan University of Science and Technology, Taiwan) on “Fuzzy Forecasting Based on High-Order Fuzzy Time Series and Genetic Algorithms.” All the above speakers are leading experts in related research area.

We would like to thank the authors for their tremendous contributions. We would also express our sincere appreciation to the reviewers, Program Committee members, and the Local Committee members for making this conference successful. Finally, we would like to express special thanks for Tainan Chapter of

IEEE Signal Processing Society, Fujian University of Technology, Chaoyang University of Technology, National Kaohsiung University of Applied Sciences, and Harbin Institute of Technology Shenzhen Graduate School for their generous support in making IHH-MSP 2016 possible.
