For Anna

Acknowledgements

This book would not have been published without many wise people I had the privilege to meet. So, I would like to thank many great colleagues from the Polish Philosophy of Economics Network who offered me an inspiring environment for discussing many ideas presented in this book. Also, I would like to thank Professor T. Lawson, who invited me to the Cambridge Social Ontology Group where some parts of this book were written. I am grateful for financial support from the National Science Centre of Poland (research grant no. 2013/11/B/HS4/01074). I would like also to thank Brill Academic Publishers for their permission to reprint my paper originally published in *Poznań Studies in the Philosophy of the Sciences and Humanities* as Chap. 3 in this book. I thank referees for their suggestions and comments. Last but not least, my greatest debt is to my wife, Anna, whose constant support and help enable my scientific work.

Contents

1	Introduction	1
2	On the Nature of Economic Laws: From Adam Smith to Alfred Marshall	11
2.1	Introduction	11
2.2	A. Smith: Between Scylla of Universal Laws and Charybdis of Accidental Regularities	13
2.3	David Ricardo: Models and Economic Laws	32
2.4	John Stuart Mill: Economic Laws as Statements About Tendencies	37
2.5	Alfred Marshall and the Denial of Universal Laws of Economics	47
2.6	Conclusions	55
3	The Demise of Laws in Economics	63
3.1	Introduction	63
3.2	The End of Law-Centrism in the Philosophy of Science	64
3.3	Science Without Laws	71
3.4	Ceteris Paribus Laws in Economics	79

3.5	The Natural Laws Tradition in Economics and the Idea of Economics Without Laws of Nature	86
3.6	Economists and the Laws They Produce	90
3.7	Conclusions	93
4	Causal Explanations in Economics	99
4.1	Introduction	99
4.2	Regularity Theories of Causation	102
4.3	Probability View on Causation	107
4.4	Powers, Capacities, and Manifestations	111
4.5	Interventionist and Causal Process Approaches to Causation	118
4.6	Causation and Econometrics	122
4.7	Conclusions	125
5	Between Isolations and Constructions: Economic Models as Believable Worlds	133
5.1	Introduction	133
5.2	Hal Varian's Model of Sales and the Idea of Believable Worlds	136
5.3	Learning from Models	146
5.4	The Explanatory Paradox by Julian Reiss (2012) and an Attempt at Its Resolution	156
5.5	Conclusions	160
6	To What Extent Are Economic Explanations Distinctively Mathematical?	169
6.1	Introduction	169
6.2	Distinctively Mathematical Explanations in Science	170
6.3	Are Economic Explanations Distinctively Mathematical?	178
6.4	Conclusions	189

7 Conclusions **195**

References **199**
