
Section II

Solar System–Exoplanet Synergies

Agustín Sánchez Lavega

Agustín Sanchez-Lavega is Full Professor (Catedrático) of Physics at the Faculty of Engineering of UPV/EHU in Bilbao. He founded and heads the “Aula Espazío Gela” dedicated to promote studies and research in space science and technology. His research interests are the study of the dynamics, of meteorological phenomena, and of cloud and hazes in planetary atmospheres. He participates in space missions to Venus, Mars, and Jupiter from ESA and NASA, and in different committees for ESA and ESO. Currently, he is the manager of Spain’s national astronomy and astrophysics program. In 2014, the Royal Spanish Society of Physics awarded him the Price in Physics Education and Outreach at university level, while in 2016 he received the Euskadi Research Award from the Basque Country Government.
