
Section IV

Planet Discovery Methods

Alexander Wolszczan

Alexander Wolszczan is the Evan Pugh Professor of Astronomy and Astrophysics at Pennsylvania State University. His research interests focus on astronomy of planets beyond the Solar System. He has also worked on topics in relativistic gravitation, pulsars, brown dwarfs, and the physics of the interstellar medium. He is best known for his discovery, in 1992, and the subsequent confirmation, of the first planets orbiting a star other than the Sun. He is also a discoverer and co-discoverer of many pulsars and giant planets around evolved stars.
