About this Series

The series “Studies in Systems, Decision and Control” (SSDC) covers both new developments and advances, as well as the state of the art, in the various areas of broadly perceived systems, decision making and control- quickly, up to date and with a high quality. The intent is to cover the theory, applications, and perspectives on the state of the art and future developments relevant to systems, decision making, control, complex processes and related areas, as embedded in the fields of engineering, computer science, physics, economics, social and life sciences, as well as the paradigms and methodologies behind them. The series contains monographs, textbooks, lecture notes and edited volumes in systems, decision making and control spanning the areas of Cyber-Physical Systems, Autonomous Systems, Sensor Networks, Control Systems, Energy Systems, Automotive Systems, Biological Systems, Vehicular Networking and Connected Vehicles, Aerospace Systems, Automation, Manufacturing, Smart Grids, Nonlinear Systems, Power Systems, Robotics, Social Systems, Economic Systems and other. Of particular value to both the contributors and the readership are the short publication timeframe and the world-wide distribution and exposure which enable both a wide and rapid dissemination of research output.

Preface

How to guarantee that a global society without a common legal framework will operate smoothly? If charity and generosity do not arise spontaneously, one might design transactions so that helping others remains the best rational option.

This is precisely the goal of *co-utility*, which can be defined in game-theoretic terms as any interaction between peers in which the best option for a player to maximize her utility is to make sure the other players also get a fair share of utility. Example utilities in the information society transactions are functionality, security, and privacy. A protocol or mechanism designed using the co-utility principle ensures that helping others is the best rational option even if players are selfish.

This contributed book has been written under the umbrella of project *Co-utility: Conciliating individual freedom and common good in the information society*, which was supported by the *Templeton World Charity Foundation*. The first chapters lay the theoretic foundations of co-utility, either when it naturally arises in peer-to-peer interactions or when artificial incentives should be added to compensate the influence of negative utilities. Co-utility is also discussed in the context of the literature on social choice. Then, several applications of co-utility within the information society are presented: anonymous keyword search, digital oblivion, P2P content distribution, ridesharing, and collaborative data anonymization.

However, the applicability of co-utility is not restricted to the above domains investigated within the *Co-utility* project. This book also includes contributions by some of the participants in the *1st Co-utility Workshop*, which took place in Tarragona on March 10 and 11, 2016. In particular, there are chapters exploring the application of co-utility to environmental agreements, business model design, and the collaborative economy.

Contents

Part I Theory of Co-utility

Co-utility: Designing Self-enforcing and Mutually Beneficial Protocols	3
Josep Domingo-Ferrer, David Sánchez and Jordi Soria-Comas	
Incentive-Based Co-utility: Co-utile Reputation Management	17
Josep Domingo-Ferrer, Oriol Farràs and David Sánchez	
On the Different Forms of Individual and Group Strategic Behavior, and Their Impact on Efficiency	33
Salvador Barberà, Dolors Berga and Bernardo Moreno	

Part II Applications of Co-utility

Co-utile P2P Anonymous Keyword Search	51
Josep Domingo-Ferrer, Sergio Martínez, David Sánchez and Jordi Soria-Comas	
Co-utile Enforcement of Digital Oblivion	71
Josep Domingo-Ferrer	
Co-utile Privacy-Aware P2P Content Distribution	87
David Megías and Josep Domingo-Ferrer	
Co-utile Ridesharing	117
David Sánchez, Sergio Martínez and Josep Domingo-Ferrer	
Self-enforcing Collaborative Anonymization via Co-utility	139
Jordi Soria-Comas and Josep Domingo-Ferrer	
Aspects of Coalitions for Environmental Protection Under Co-utility	153
Dritan Osmani	

United We Stand: Exploring the Notion of Cooperation Support System for Business Model Design 167
Riccardo Bonazzi and Vincent Grèzes

The Need of Co-utility for Successful Crowdsourcing 189
Enrique Estellés-Arolas

Problems in the Undertakings of the Collaborative Economy: Co-utile Solutions 201
Abeba Nigussie Turi, Josep Domingo-Ferrer and David Sánchez
