About this Series

Sustainable Infrastructure impacts our well-being and day-to-day lives. The infrastructures we are building today will shape our lives tomorrow. The complex and diverse nature of the impacts due to weather extremes on transportation and civil infrastructures can be seen in our roadways, bridges, and buildings. Extreme summer temperatures, droughts, flash floods, and rising numbers of freeze-thaw cycles pose challenges for civil infrastructure and can endanger public safety. We constantly hear how civil infrastructures need constant attention, preservation, and upgrading. Such improvements and developments would obviously benefit from our desired book series that provide sustainable engineering materials and designs. The economic impact is huge and much research has been conducted worldwide. The future holds many opportunities, not only for researchers in a given country, but also for the worldwide field engineers who apply and implement these technologies. We believe that no approach can succeed if it does not unite the efforts of various engineering disciplines from all over the world under one umbrella to offer a beacon of modern solutions to the global infrastructure. Experts from the various engineering disciplines around the globe will participate in this series, including: Geotechnical, Geological, Geoscience, Petroleum, Structural, Transportation, Bridge, Infrastructure, Energy, Architectural, Chemical and Materials, and other related Engineering disciplines.

Preface

Toward building sustainable and longer civil infrastructures, the engineering community around the globe continues undertaking research and development to improve existing design, modeling, and analytical capability. Such initiatives are also the core mission of the Soil-Structure Interaction Group in Egypt (SSIGE) to contribute to the ongoing research toward sustainable infrastructure. This conference series “GeoMEast International Congress and Exhibition” is one of these initiatives.

Ancient peoples built their structures to withstand the test of time. If we think in the same way, our current projects will be a heritage for future generations. In this context, an urgent need has quickly motivated the SSIGE and its friends around the globe to start a new congress series that can bring together researchers and practitioners to pursue “Sustainable Civil Infrastructures.” The GeoMEast 2017 is a unique forum in the Middle East and Africa that transfers from the innovation in research into the practical wisdom to serve directly the practitioners of the industry.

More than eight hundred abstracts were received for the first edition of this conference series “GeoMEast 2017” in response to the Call for Papers. The abstracts were reviewed by the Organizing and Scientific Committees. All papers were reviewed following the same procedure and at the same technical standards of practice of the TRB, ASCE, ICE, ISSMGE, IGS, IAEG, DFI, ISAP, ISCP, ITA, ISHMII, PDCA, IUGS, ICC, and other professional organizations who have supported the technical program of the GeoMEast 2017. All papers received a minimum of two full reviews coordinated by various tracks’ chairs and supervised by the volumes editors through the Editorial Manager of the SUCI “Sustainable Civil Infrastructure” book series. As a result, 15 volumes have been formed of the final +320 accepted papers. The authors of the accepted papers have addressed all the comments of the reviewers to the satisfaction of the tracks’ chairs, the volumes editors, and the proceedings editor. It is hoped that readers of this proceedings of the GeoMEast 2017 will be stimulated and inspired by the wide range of papers written by a distinguished group of national and international authors.

Publication of this quality of technical papers would not have been possible without the dedication and professionalism of the anonymous papers reviewers. The names of these reviewers appear in the acknowledgment that follows. For any additional reviewers whose names were inadvertently missed, we offer our sincere apologies.

We are thankful to Dr. Hany Farouk Shehata, Dr. Nabil Khelifi, Dr. Khalid M. ElZahaby, Dr. Mohamed F. Shehata, and to all the distinguished volumes' editors of the proceedings of the GeoMEast 2017. Appreciation is extended to the authors and tracks' chairs for their significant contributions. Thanks are also extended to Springer for their coordination and enthusiastic support to this conference. The conference staff acknowledges the assistance of Ms. Janet Sterritt-Brunner, Mr. Arulmurugan Venkatasalam in the final production of the 15 edited volumes "Proceedings of GeoMEast 2017".

Contents

Development and Finite Element Analysis of Piezoelectric-Based Prototypes for Harvesting Energy from Roadway Pavement.	1
Hossein Roshani, Samer Dessouky, Arturo Montoya, A.T. Papagiannakis, and Ala Abbas	
A Bitumen-Based Prototype to Predict the Workability of Asphalt Concrete Mixtures.	14
Aboelkasim Diab and Zhanping You	
The Use of Wastewater in Construction of Base Course Layers in Pavement Structures.	31
Farid H. Abed, Munir D. Nazzal, Mousa F. Attom, Magdi E. El-Emam, Nouran ElMessalami, and Saif Al-Dabagh	
Hydraulic Conductivity of Layered Compacted Granular Materials Used as Pavement Foundation	38
Namir K.S. Al-Saoudi and Khawla H.H. Shubber	
Extending the Service Life of Bridges Through Proper Compaction of Asphalt Decks	49
Amir Abd El Halim, Ahmed El-Desouky, and Abd El Halim	
Characteristics of Jointed Rigid Airfield Pavement Using Different Material Parameters and Modeling Techniques	66
Ahmed E. Abu El-Maaty, Ghada M. Hekal, Eman M. Salah El-Din, and Saad El-Hamrawy	
Effect of Construction Induced Cracks on Tensile Strength and Bonding Between Asphalt Concrete Layers of Pavement Under Different Temperatures.	85
Graziela Girardi, Mohammad Ramezani, and A.O. Abd El Halim	

Effect of Wet-Dry Cycle on Durability of Cement-Stabilized Recycled Pavement Base Aggregates	98
Saif Bin Salah, Sahadat Hossain, Mohammad Faysal, Mohammad Sadik Khan, and Carla Maria Flores	
Full Depth Reclamation (FDR) to Repair Road Damaged in the Energy Sector	115
Dar Hao Chen, Tom Scullion, and Kun Li	
Prediction of Strength and Stiffness Properties of Recycled Pavement Base Materials Using Non-destructive Impact Echo Test	121
Masrur Mahedi, Sahadat Hossain, Mohammad Faysal, Mohammad Sadik Khan, and Asif Ahmed	
Predicting Performance of Flexible Pavement Using Finite Element Method	137
Anand B. Tapase and M.S. Ranadive	
Implementation Initiatives of the Mechanistic-Empirical Pavement Design Guide in Countries with Insufficient Design Input Data – The Case of Lebanon	147
Ghassan R. Chehab, Rana Hajj Chehade, Lamis Houssami, and Rayane Mrad	
Structural Evaluation of Flexible Pavement Using Non-destructive Techniques in Low Volume Road	168
Vinod Kumar, Sunny Deol, and Rakesh Kumar	
Application of Artificial Neural Networks for Hot Mix Asphalt Dynamic Modulus (E*) Prediction	185
Sherif El-Badawy and Ragaa Abd El-Hakim	
Potentials for Using Mechanically Activated Concrete Powder in Stabilized Granular Pavement Mixtures	203
Jan Valentin, George Karráa, Jan Suda, Jakub Šedina, Pavel Tesárek, and Zdeněk Prošek	
Pavement Modification Using Enzymatic Lime	221
Greeshma Nizy Eujine, S. Chandrakaran, and N. Sankar	
Numerical Modeling of Heat Production for a Snow-Melting System Using Geothermal Energy in North Dakota	232
I-Hsuan Ho	
Assessment of Interlayer Bonding Properties with Static and Dynamic Devices	244
Christiane Raab, Elise Fourquet, Omar Abd El Halim, and Manfred N. Partl	

Wavelet-Spectrogram Analysis of Surface Wave Technique for Quick NDT Measurement on Surface Layer of Pavement 256
Sri Atmaja P. Rosyidi

Thermal Energy Harvesting from Asphalt Roadway Pavement 272
Utpal Datta, Samer Dessouky, and A.T. Papagiannakis

Monitoring the Impact of Micro Cracks Healing Cycles on the Deformation of Asphalt Concrete Under Repeated Loading 287
Saad Issa Sarsam and Hanan Kadim Husain

A State-of-the-Art Review of Different Conditions Influencing the Behavioral Aspects of Flexible Pavement 300
Piyush G. Chandak, Anand B. Tapase, Sabir S. Sayyed, and Abdulrashid C. Attar

Performance Testing of Paving Mixes for Libya’s Hot and Arid Conditions, Using Marshall Stability and SUPERPAVE Gyrotory Compactor Methods 313
Fathi S. Almadwi and Gabriel J. Assaf

Author Index 325
