## **Editor-in-chief**

Hany Farouk Shehata, Cairo, Egypt

## **Advisory Board**

Dar-Hao Chen, Texas, USA

Khalid M. El-Zahaby, Giza, Egypt

### *About this Series*

Sustainable Infrastructure impacts our well-being and day-to-day lives. The infrastructures we are building today will shape our lives tomorrow. The complex and diverse nature of the impacts due to weather extremes on transportation and civil infrastructures can be seen in our roadways, bridges, and buildings. Extreme summer temperatures, droughts, flash floods, and rising numbers of freeze-thaw cycles pose challenges for civil infrastructure and can endanger public safety. We constantly hear how civil infrastructures need constant attention, preservation, and upgrading. Such improvements and developments would obviously benefit from our desired book series that provide sustainable engineering materials and designs. The economic impact is huge and much research has been conducted worldwide. The future holds many opportunities, not only for researchers in a given country, but also for the worldwide field engineers who apply and implement these technologies. We believe that no approach can succeed if it does not unite the efforts of various engineering disciplines from all over the world under one umbrella to offer a beacon of modern solutions to the global infrastructure. Experts from the various engineering disciplines around the globe will participate in this series, including: Geotechnical, Geological, Geoscience, Petroleum, Structural, Transportation, Bridge, Infrastructure, Energy, Architectural, Chemical and Materials, and other related Engineering disciplines.

# Preface

Toward building sustainable and longer civil infrastructures, the engineering community around the globe continues undertaking research and development to improve existing design, modeling, and analytical capability. Such initiatives are also the core mission of the Soil-Structure Interaction Group in Egypt (SSIGE) to contribute to the ongoing research toward sustainable infrastructure. This conference series “GeoMEast International Congress and Exhibition” is one of these initiatives.

Ancient peoples built their structures to withstand the test of time. If we think in the same way, our current projects will be a heritage for future generations. In this context, an urgent need has quickly motivated the SSIGE and its friends around the globe to start a new congress series that can bring together researchers and practitioners to pursue “Sustainable Civil Infrastructures.” The GeoMEast 2017 is a unique forum in the Middle East and Africa that transfers from the innovation in research into the practical wisdom to serve directly the practitioners of the industry.

More than eight hundred abstracts were received for the first edition of this conference series “GeoMEast 2017” in response to the Call for Papers. The abstracts were reviewed by the Organizing and Scientific Committees. All papers were reviewed following the same procedure and at the same technical standards of practice of the TRB, ASCE, ICE, ISSMGE, IGS, IAEG, DFI, ISAP, ISCP, ITA, ISHMII, PDCA, IUGS, ICC, and other professional organizations who have supported the technical program of the GeoMEast 2017. All papers received a minimum of two full reviews coordinated by various tracks chairs and supervised by the volumes editors through the Editorial Manager of the SUCI “Sustainable Civil Infrastructure” book series. As a result, 15 volumes have been formed of the final +320 accepted papers. The authors of the accepted papers have addressed all the comments of the reviewers to the satisfaction of the tracks chairs, the volumes editors, and the proceedings editor. It is hoped that readers of this proceedings of the GeoMEast 2017 will be stimulated and inspired by the wide range of papers written by a distinguished group of national and international authors.

Publication of this quality of technical papers would not have been possible without the dedication and professionalism of the anonymous papers reviewers. The names of these reviewers appear in the acknowledgment that follows. For any additional reviewers whose names were inadvertently missed, we offer our sincere apologies.

We are thankful to Dr. Hany Farouk Shehata, Dr. Nabil Khelifi, Dr. Khalid M. ElZahaby, Dr. Mohamed F. Shehata, and to all the distinguished volumes editors of the proceedings of the GeoMEast 2017. Appreciation is extended to the authors and track chairs for their significant contributions. Thanks are also extended to Springer for their coordination and enthusiastic support to this conference. The editors acknowledge the assistance of Ms. Janet Sterritt-Brunner, Mr. Arulmurugan Venkatasalam in the final production of the 15 edited volumes “Proceedings of GeoMEast 2017”.

# Contents

<b>Variation of the Structural Dynamic Characteristics of the Great Pyramid with the Limestone Properties</b> . . . . .	1
Mohamed Darwish	
<b>Structural Dynamic Characteristics of an Ancient Egyptian Obelisk</b> . . . . .	12
Mohamed Rashwan and Mohamed Darwish	
<b>Seismic Performance of Masonry Arches and Vaults</b> . . . . .	23
Mohd Aamir Khan and D.K. Paul	
<b>Analytically Derived Fragility Curves and Damage Assessment of Masonrybuildings</b> . . . . .	42
Mustapha Remki and Fouad Kehila	
<b>Assessment of Response Modification Factor of Reinforced Concrete Table Top Frames Structures Subjected to Seismic Loads</b> . . . . .	55
Yasser S. Salem, Giuseppe Lomiento, and Jawwad Khan	
<b><math>\mu</math>-Synthesis Control of a Seismic Excited Building</b> . . . . .	72
Karima Chaker, Abdelkrim Moussaoui, and Badreddine Sbartai	
<b>Design and Structural Dynamic Characteristics of an Irregular Staircase Under Earthquake Loading</b> . . . . .	83
John Magdy, Zeyad Khalil, Mohamed Ashraf, and Mohamed Darwish	
<b>Egyptian Code Seismic Load Design Provisions for Moment Resisting Frames</b> . . . . .	94
Ahmed Hossameldin Hanafy, Mohammed Darwish, and Moustafa Baraka	
<b>Magnetorheological Damper for Performance Enhancement Against Seismic Forces</b> . . . . .	104
C. Daniel, G. Hemalatha, Ajita Magdalene, D. Tensing, and S. Sundar Manoharan	

<b>Repair Measures for a Seismically Retrofitted Steel Bridge Experiencing Distortion-Induced Fatigue Cracks: Numerical Study . . . .</b>	118
Mehdi Motaleb, Nick Duong, Ahmed Ibrahim, Will Lindquist, and Riyadh Hindi	
<b>Assessment of Response Modification Factor of Open Steel Platform Structures Subjected to Seismic Loads . . . . .</b>	131
Yasser S. Salem, Lisa Wang, and Germaine Aziz	
<b>Analytical Fragility Curves for Reinforced Concrete Dual System Subjected to Seismic Loads . . . . .</b>	144
Yasser S. Salem, Aaron B. Lucas, and Ghada M. Gad	
<b>Seismic Performance of RC Building Using Spectrum Response and Pushover Analyses . . . . .</b>	158
Mehani Youcef, Kibboua Abderrahmane, and Chikh Benazouz	
<b>Approximate Multimodal Dynamic Analysis to Estimate the Seismic Demands of Structures . . . . .</b>	170
Benazouz Chikh, Youcef Mehani, Mohamed Hadid, Abdelmadjid Boubaya, and Berra Ibrahim	
<b>Nonlinear Static Analysis Procedures for Seismic Performance Evaluation of Existing Buildings – Evolution and Issues . . . . .</b>	180
Fawad Ahmed Najam	
<b>Effect of Combined ASR and Cyclic Loading on Concrete Bridges . . . .</b>	199
Salhin M. Alaud and Gideon P.A.G. van Zijl	
<b>Study on Health Monitoring System Design of Cable-Stayed Bridge . . .</b>	216
Heng Lin, Yiqiang Xiang, and Yakun Jia	
<b>A New Precast Concrete Deck System for Accelerated Bridge Construction . . . . .</b>	229
George Morcouc, Fouad Jaber, and Jason Volz	
<b>Clustering-Based Threshold Model for Condition Assessment of Concrete Bridge Decks Using Infrared Thermography . . . . .</b>	242
Tarek Omar and Moncef L. Nehdi	
<b>Time-Dependent Behavior Prediction, Serviceability and Sustainability Problems for High-Performance Concrete Bridges . . . . .</b>	254
Banti A. Gedam, N.M. Bhandari, and Akhil Upadhyay	
<b>Bumps at Bridge Approaches: Two Case Studies for Bridges at El-Minia Governorate, Egypt . . . . .</b>	265
Fayek Hassona, Mostafa D. Hashem, Remon I. Abdelmalak, and Beshoy M. Hakeem	

**I-495 in Wilmington, Delaware USA – The Leaning Towers; Lateral Squeeze Effects on Pile Supported Bridge Piers Due to Mudwave; Emergency Response and Retrofit** . . . . . 281  
 Paul H. Moffitt, Bruce A. Shelly, Hany Fekry, and Karen Armfield

**Mitigation of Exterior Beam Rotation in Bridge Construction Through Experimental Investigation of Different Bracing Systems**. . . . . 293  
 Md. Ashiquzzaman, Li Hui, Ahmed Ibrahim, Will Lindquist, and Riyadh Hindi

**Seismic Assessment of Algerian Bridge** . . . . . 307  
 Kehila Fouad, Remki Mustapha, and Kibboua Abderrahmane

**Non-linear Soil-Structure Interaction Analysis of Multi-storey Shear Wall Buildings with Site Specific Ground Response**. . . . . 318  
 B.R. Jayalekshmi and H.K. Chinmayi

**Statistical Prediction Equations for RC Deep Beam Without Stirrups**. . . . . 329  
 Ahmed I. Ramadan and Aly G. Aly Abd-Elshafy

**A Time-Stepping DRBEM for 3D Anisotropic Functionally Graded Piezoelectric Structures Under the Influence of Gravitational Waves**. . . . . 350  
 Mohamed Abdelsabour Fahmy

**Nonlinear Transient Vibration Analysis of Arbitrary Thin Plates Using Superparametric Element** . . . . . 366  
 Saleema Panda and Manoranjan Barik

**Experimental Investigation on Shell Footing Models Employing High-Performance Concrete**. . . . . 373  
 R. Rinaldi, M. Abdel-Rahman, and A. Hanna

**Automated Data Collection for Progress Tracking Purposes: A Review of Related Techniques** . . . . . 391  
 Tarek Omar and Moncef L. Nehdi

**Health Monitoring of Civil Infrastructures Designed with Pre-stressing Steel**. . . . . 406  
 Md. Shahidul Islam

**Fatigue Analysis of FRP Strengthened RC Slabs Reinforced with Plain Bars Under Moving Load**. . . . . 419
