Acknowledgements

This book is the product of intense interdisciplinary collaboration between its editors, authors, reviewers and publishers. Its beginnings can be traced back to a series of workshops which took place at Universität Hamburg and at the UNESCO World Water Assessment Programme (WWAP) in Colombella, Italy, in 2013, 2014 and 2015. The events were organised within the framework of the international research network Gender, Conflict and Climate Change (www.gccn.de) and would not have been possible without the support of the Cluster of Excellence ‘Integrated Climate System Analysis and Prediction’ (CliSAP), Universität Hamburg, funded by the German Research Foundation (DFG).

We would like to thank the reviewers, who have put tremendous work into engaging with individual chapters; the publishers, who have given us the space to critically engage with a politically pressing topic; and our authors, who have dedicated a lot of time and energy to the individual chapters.

Special thanks go to Katharina Heider and Cordelia Moore, who helped us immensely with the final editing of the book manuscript.

Contents

Part I Introduction

- 1 Bridging Troubled Waters: Water Security Across the Gender Divide** 3
Henri Myrntinen, Roger Cremades, Christiane Fröhlich,
and Giovanna Gioli

Part II Research and Policy Challenges

- 2 Gender and Water in a Changing Climate: Challenges and Opportunities** 17
Farhana Sultana
- 3 More than Women and Men: A Framework for Gender and Intersectionality Research on Environmental Crisis and Conflict** 35
Amber J. Fletcher

Part III Regional Perspectives on Gender and Water Security

- 4 Gender and Water in the Middle East. Local and Global Realities** 61
Mauro van Aken and Anita De Donato
- 5 Land and Water Reforms in South Africa: “Men in White Coats”** 83
Deepa Joshi, Natasha Donn-Arnold, and Mart Kamphuis
- 6 Integrating Gender Equality in WASH Emergency Response in the Central African Republic** 101
Beatrice Mosello, Virginie Le Masson, Gladys Le Masson,
Elena Diato, and Véronique Barbelet

7	Engaging with Gender in Water Governance and Practice in Kenya	125
	Chinwe Ifejika Speranza and Edward Bikketi	
8	When Water Security Programmes Seek to Empower Women – A Case Study from Western Nepal	151
	Floriane Clement and Emma Karki	
Part IV Gender-Positive Transformation Potentials in Water Conflicts		
9	“Just Women” Is Not Enough: Towards a Gender-Relational Approach to Water and Peacebuilding	173
	Janpeter Schilling, Rebecca Froese, and Jana Naujoks	
10	Calming the Waters, Ploughing the Sea – Can Gender-Responsive Approaches to Intra-state Water Conflicts Lead to Peacebuilding? Evidence from Lebanon and Nepal	197
	Henri Myrntinen	
11	The Role of Women in Transboundary Water Dispute Resolution	211
	Lynette de Silva, Jennifer C. Veilleux, and Marian J. Neal	
	Erratum	E1
	Index	231

Contributors

Véronique Barbelet is a research fellow at the Humanitarian Policy Group of the Overseas Development Institute (ODI) where her research focuses on livelihoods, refugees, humanitarian access and protection. Veronique has published peer-reviewed papers and policy briefs through her work at ODI, in particular on addressing the protection gap in the Central African Republic.

Edward Bikketi is a gender postdoc fellow at ICRISAT. His research is based on using mixed methods to facilitate the collection of sex-disaggregated data and integration of GIS to assess and geovisualise gender gaps in grain legumes and dryland cereals, using case studies of groundnuts in Malawi and barley in Ethiopia. He has published works on the intersections of gender with agriculture and natural resource management

Floriane Clement is a senior researcher and gender focal point at the International Water Management Institute (IWMI), Nepal Office. Her research has explored the gaps between discourses and practices in natural resource policies and development programmes. She has published in geography and political and environmental science journals, including *Applied Geography*, *Environmental Conservation*, *Geoforum*, *Land Use Policy* and *Policy Science*.

Roger Cremades is an environmental economist and works as research associate at the Climate Service Center Germany (GERICS), where he engages communities and decision makers in his research about the nexus of water, land and energy in diverse environmental, technological and socio-economic contexts. He is a pioneer in the economics of this nexus. His water research has been published in *Environmental Research Letters*, *Earth System Dynamics* and *Earth's Future*.

Lynette de Silva is an educator, mediator and facilitator. She has 20 years of experience working in water resources and land management practices. She directs the Program in Water Conflict Management and Transformation, at Oregon State University, USA, overseeing a professional certificate programme, and the

Transboundary Freshwater Dispute Database. Through the university and as a consultant to UNESCO, de Silva conducts skills-building workshops in water conflict management. Her interests include transboundary freshwater dispute resolution, particularly as it relates to the role of women.

Anita De Donato is a PhD student in anthropology at the University of Milano-Bicocca and the University of Paris 8 Vincennes-Saint-Denis. Her research focuses on water as mediator of political and cultural dynamics in the context of the building of a Palestinian nation-state, as well as on cultural belonging as an identity and political practice carried out by Palestinian refugees.

Elena Diato is development programme manager for Gruppo di Volontariato Civile (GVC), an Italian NGO, in Lebanon where she is supporting water public utilities. Before joining GVC, Elena worked as WASH programme manager with Action Contre la Faim (ACF). She has experience running post-emergency projects in the Central African Republic and the Democratic Republic of the Congo.

Natasha Donn-Arnold is a master's student at the University of the Western Cape, South Africa. She has a focus on agriculture, water management and food security. She has previously been active in research based in Elim and has studied in the UK, researching soil quality and mining pollution in Northern Wales.

Amber J. Fletcher is associate professor of sociology and social studies at the University of Regina, Canada. Her research examines the social and gender dimensions of climate change and public policy, with particular focus on agriculture. Her work has been published in numerous journals and anthologies, and her edited book *Women in Agriculture Worldwide* (with Dr. Wendee Kubik) was published by Routledge in 2016.

Christiane Fröhlich is a postdoctoral researcher at Universität Hamburg, Germany. With a background in environmental conflict research, she has worked extensively on water conflicts on the international, national and local levels, as well as on environmental drivers of human mobility, both with a regional focus on the Southern Mediterranean. More information is available at www.christianefroehlich.de.

Rebecca Froese is a PhD candidate in the research group Climate Change and Security (CLISEC) at Universität Hamburg. Her research focuses on the role of non-party stakeholders in climate action. Recently she published in the Springer *Handbook on Sustainability Transition and Sustainable Peace* and in the journal *Global Change, Peace and Security*.

Giovanna Gioli works as livelihoods adaptation specialist at the International Centre for Integrated Mountain Development, Nepal. Drawing on political ecology, participatory research and critical geography, her research revolves around the

nexus between livelihoods, human mobility and the environment, with a focus on South Asia. She also engages with water resources geography and hazards.

Deepa Joshi is a senior research fellow of the Centre for Agroecology, Water and Resilience at Coventry University. Her work focuses on the politics of water, agriculture and energy policies; her research work analyses how shifts in policies reiterate and restructure contextually complex intersections of gender, poverty, class, ethnicity and identity. She leads several projects on environmental justice in South Asia and has worked in Southeast Asia, Latin America and South Africa.

Mart Kamphuis is a graduate of Wageningen University, with a specialisation in water resources management. He focuses on social and political dimensions of water management and international development. His previous research looks into notions of social justice within the allocation of water rights between emerging and existing farmers in South Africa.

Emma Karki works as a research officer of agriculture and water resources at the International Water Management Institute (IWMI) in Nepal. Her research interests focus on water access in the context of male out-migration and climate stress, with a key focus on gender.

Gladys Le Masson is a disaster management and resilience consultant who has supported humanitarian and development projects for a range of private companies, government departments, research institutions and non-governmental organisations at the international level. Her areas of expertise include disaster preparedness and response, climate change adaptation and monitoring and evaluation of development projects.

Virginie Le Masson is a research fellow at the Overseas Development Institute (ODI) in London. Her research interests combine social inclusion, disaster risk reduction and climate change adaptation, in both development and humanitarian settings. Her work has been published in *Natural Hazards* and *Mountain Research and Development*. She also co-edited a book on gender relations and climate change published by Routledge in spring of 2017.

Beatrice Mosello is a research fellow at the Overseas Development Institute (ODI) in London. She specialises in water governance with a focus on equity and climate resilience and has published numerous peer-reviewed papers, policy briefs and blogs on these topics. Beatrice has also authored a book on adaptive water management in Central Asia published by Springer in 2015.

Henri Myrntinen head of gender in peacebuilding at International Alert, has over 15 years of experience working on gender, conflict sensitivity and peacebuilding. He has worked extensively in fragile and conflict-affected contexts and has also published numerous papers and chapters on various aspects of gender and

peacebuilding, including integrating men and masculinities into peacebuilding, gender and reintegrating former combatants, gender and security sector reform as well as gender and small arms. He holds a PhD in conflict resolution and peace studies from the University of KwaZulu-Natal, South Africa, with a thesis on masculinities and violence in Timor-Leste.

Jana Naujoks is an independent consultant based in Myanmar. Her research on gender and peacebuilding, with a focus on natural resource management (e.g. forest governance), masculinities, humanitarian interventions, sexual and gender-based violence, justice and security, has been published by civil society (International Alert) and in academic journals (*Peace Review*, *Critical Military Studies*).

Marian J. Neal is the transboundary programme manager for the Stockholm International Water Institute. She has an interdisciplinary research background in wetland/landscape ecology, water governance, transboundary water management and water justice. She has worked in the fields of water allocation decision making and complex social-ecological systems and examined how the issue of scale impacts on the management of shared water resources. Dr. Neal has over 15 years of experience in transboundary water governance and is currently the manager of the UNESCO Cat II International Centre on Water Cooperation in Sweden based at SIWI.

Janpeter Schilling holds a Klaus Töpfer Junior Professorship for Landuse Conflicts at the University of Koblenz-Landau. He is associated with the research group Climate Change and Security (CLISEC) at Universität Hamburg, International Alert in London and the Peace Academy Rhineland-Palatinate in Landau. He has published widely on environmental security, conflict and resilience.

Chinwe Ifejika Speranza is professor of geography and sustainable development. She heads the research group Sustainable Land Management and Land Systems at the Institute of Geography, University of Bern, Switzerland. She has published works on the intersections of gender with sustainable land and water management, public policies, climate risks, vulnerability and resilience.

Farhana Sultana is associate professor of geography in the Maxwell School of Citizenship and Public Affairs of Syracuse University, USA. Her research focuses on water governance, climate justice, international development, sustainability, gender relations and human rights. Her latest books are *The Right to Water: Politics, Governance and Social Struggles* (Routledge 2012) and *Eating, Drinking: Surviving* (Springer, 2016). Her research has been published in several renowned journals, such as the *Annals of the American Association of Geographers* and *Transactions of the Institute of British Geographers*.

Mauro van Aken associated professor of anthropology at the University of Milano-Bicocca, has conducted fieldworks on the relation of place and belonging among

Palestinian refugees and migrants in the Middle East and on the patterns of relatedness between society and environment, with particular focus on water relations and imaginaries of environment in the Anthropocene.

Jennifer C. Veilleux is a geographer who specialises in transboundary freshwater systems. She is currently working as a postdoctoral associate with the Global Water Security Forum at the Steven J. Green School of International and Public Affairs (SIPA), Florida International University (FIU), Miami, Florida, USA. Her published work on the Nile and Missouri Rivers has appeared in *Science*, *Limnology and Oceanography* and *Water International*, among other scientific journals, and her research has been written about in *Science*, *Foreign Affairs*, *High Country News* as well as other news publications.
