

## Who's to Blame for Greece?

'The new book by Michael Mitsopoulos and Theodore Pelagidis offers insightful analysis of the Greek drama. It makes fascinating reading and well demonstrates that the blame is widely shared.'

—André Sapir, University Professor, *Université libre de Bruxelles, Belgium*, and former Economic Advisor to the President of the European Commission

'Who is to blame for Greece? If I could pick just two experts on the Greek debacle to answer this question it would be Theodore Pelagidis and Michael Mitsopoulos. And thankfully they have done just that in this penetrating analysis of what has happened to Greece over the past five years. It's a timely and incisive work and no one gets off easy a must read.'

—Landon Thomas, Jr, Financial Reporter, *New York Times, USA*

Theodore Pelagidis • Michael Mitsopoulos

# Who's to Blame for Greece?

How Austerity and Populism  
are Destroying a Country with  
High Potential

Second Edition

## About the Authors

**Michael Mitsopoulos** holds a PhD in Economics from Boston University, USA. He is an economist at the Hellenic Federation of Enterprises, Greece, and has taught at the University of Piraeus and the Economic University of Athens, Greece. He has published in academic journals and is the co-author with Pelagidis of *Understanding the Crisis in Greece: From Boom to Bust* (2011) and of *Greece: From Exit to Recovery?* (2014). The content of this book does not necessarily represent the positions of the Hellenic Federation of Enterprises.

**Theodore Pelagidis** is a non-resident senior fellow at the Brookings Institution, USA, and Professor of Economics at the University of Piraeus, Greece. He has also been a NATO scholar at the Center for European Studies at Harvard University, USA; an NBG fellow at the London School of Economics, UK; and a Fulbright fellow at Columbia University, USA. He has also served as an advisor to the International Monetary Fund in the Internal Evaluation Office, USA. He is currently a senior economic advisor to the president of the New Democracy party in Greece.

- Fig. 2.2 Labor migration in key economic areas. Source: US Census Bureau, Current Population Survey, Eurostat LFS. McKinsey and Company (Germany) (2012) analysis of this data 16
- Fig. 2.3 Intra-EU and intra-euro area shares of export on total export of the two groups respectively. Source: Bruegel based on IMF data (Direction of Trade Statistics database). Note: The above figure shows intra-EU and intra-euro area shares of export on total export of the two groups respectively. Each of the two lines were constructed taking into account the changing composition of the European Union and the euro area over time, meaning that a given country is included in the series only by the time it joined the EU or the euro. However, further calculations show results do not change dramatically if considering a fixed group of countries in either series. | Read more at Bruegel [http://www.bruegel.org/nc/blog/detail/article/1420-chart-sharp-decline-in-intra-eu-trade-over-the-past-4-years/?utm\\_source=Bruegel+Chart+of+the+Week&utm\\_campaign=8bca3a3d23-Bruegel+Chart\\_Week\\_35\\_2014&utm\\_medium=email&utm\\_term=0\\_c8cb239d3a-8bca3a3d23-277603541](http://www.bruegel.org/nc/blog/detail/article/1420-chart-sharp-decline-in-intra-eu-trade-over-the-past-4-years/?utm_source=Bruegel+Chart+of+the+Week&utm_campaign=8bca3a3d23-Bruegel+Chart_Week_35_2014&utm_medium=email&utm_term=0_c8cb239d3a-8bca3a3d23-277603541) 21
