Preface

In the era of big data and deep learning, the IDEAL conference has been playing an important role as an established forum for active, new, or leading researchers in the world to exchange the latest results and report new findings. The IDEAL conference has continued to devotedly serve the community over the last 19 years and has witnessed the ever fast-changing world of data science and machine learning. It has become one of the leading platforms for data-driven technology and learning algorithms with an emphasis on real-world problems and turning data into information, knowledge, and solutions. The IDEAL conference attracts international experts, new researchers, leading academics, practitioners, and industrialists from the communities of machine learning, computational intelligence, novel computing paradigms, data mining, knowledge management, biology, neuroscience, bio-inspired systems and agents, distributed systems, and robotics. It continues to evolve to embrace emerging topics and exciting trends.

This year IDEAL was held in one of most beautiful cities in mainland China, Guilin. The conference received 110 submissions, which were rigorously peer-reviewed by the Program Committee members and other experts. Only the papers judged to be of highest quality were accepted and included in the proceedings. This volume contains 65 papers accepted and presented at the 18th International Conference on Intelligent Data Engineering and Automated Learning (IDEAL 2017), held from October 30 to November 1, 2017, in Guilin, China. These papers provided a valuable and timely sample of the latest research outcomes in data engineering and automated learning, from methodologies, frameworks, and techniques to applications. They cover various topics such as evolutionary algorithms, deep learning neural networks, probabilistic modeling, particle swarm intelligence, big data analytics, and applications in image recognition, regression, classification, clustering, medical and biological modeling and prediction, text processing, and social media analysis. IDEAL 2017 also enjoyed stimulating keynotes from leaders in the field – Hojjat Adeli, Xiaoyang (Sean) Wang, and Xizhao Wang.

We would like to thank all the people who devoted so much time and effort to the successful running of the conference, in particular the members of the Program Committee and reviewers, as well as the authors who contributed to the conference. We are also very grateful for the hard work of the local organizing team at Guilin University of Electronic Technology, especially Prof. Yimin Wen, in local arrangements, as well as the help from Miss Yao Peng at the University of Manchester in
checking through all the camera-ready files. The continued support and collaboration from Springer’s LNCS team are also greatly appreciated.

Organization

Honorary Chair

Hojjat Adeli  Ohio State University, USA

General Chairs

Hujun Yin  University of Manchester, UK
Tianlong Guo  Guilin University of Electronic Technology, China
Yang Gao  Nanjing University, China

Program Co-chairs

Guoyong Cai  Guilin University of Electronic Technology, China
Songcan Chen  Nanjing University of Aeronautics and Astronautics, China
Junping Du  Beijing University of Posts and Telecommunications, China
Antonio J. Talón-Ballesteros  University of Seville, Spain

International Advisory Committee

Lei Xu (Chair)  Chinese University of Hong Kong, Hong Kong, SAR China
Yaser Abu-Mostafa  CALTECH, USA
Shun-ichi Amari  RIKEN, Japan
Michael Dempster  University of Cambridge, UK
José R. Dorronsoro  Autonomous University of Madrid, Spain
Nick Jennings  University of Southampton, UK
Soo-Young Lee  KAIST, South Korea
Erkki Oja  Helsinki University of Technology, Finland
Latit M. Patnaik  Indian Institute of Science, India
Burkhard Rost  Columbia University, USA
Xin Yao  University of Birmingham, UK

Steering Committee

Hujun Yin (Chair)  University of Manchester, UK
Laiwan Chan (Chair)  Chinese University of Hong Kong, Hong Kong, SAR China
Guilherme Barreto  Federal University of Ceará, Brazil
Yiu-ming Cheung  Hong Kong Baptist University, Hong Kong, SAR China
Emilio Corchado  University of Burgos, Spain
Jose A. Costa  Federal University of Rio Grande do Norte, Brazil
Colin Fyfe  University of the West of Scotland, UK
Marc van Hulle  K.U. Leuven, Belgium
Samuel Kaski  Helsinki University of Technology, Finland
John Keane  University of Manchester, UK
Jimmy Lee  Chinese University of Hong Kong, Hong Kong, SAR China
Malik Magdon-Ismail  Rensselaer Polytechnic Institute, USA
Vic Rayward-Smith  University of East Anglia, UK
Peter Tino  University of Birmingham, UK
Zheng Rong Yang  University of Exeter, UK
Ning Zhong  Maebashi Institute of Technology, Japan

Publicity Co-chairs

Emilio Corchado  University of Salamanca, Spain
Jose A. Costa  Federal University of Rio Grande do Norte, Brazil

International Liaisons

Xiangbin Li  Guilin University of Electronic Technology, China
David Camacho  Universidad Autónoma de Madrid, Spain
Guilherme Barreto  Federal University of Ceará, Brazil
Brijesh Verma  Central Queensland University, Australia

Local Organizing Committee

Yimin Wen (Chair)  Guilin University of Electronic Technology, China
Minling Zhang (Chair)  Southeast University, China

Program Committee

Ajith Abraham  Vicent Botti  Luís Cavique
Paulo Adeodata  Juan A. Botía  Darryl Charles
Jesus Alcala-Fdez  Antonio Braga  Richard Chbeir
Davide Anguita  Fernando Buarque  Songcan Chen
Francisco Assis  Robert Burduk  Xiaohong Chen
Ángel Arcos-Vargas  Luiz Pereira Caloba  Sung-Bae Cho
Romis Attux  José Luis Calvo Rolle  Andrzej Cichocki
Javier Bajo Pérez  David Camacho  Jacek Cichosz
Bruno Baruque  Heloisa Camargo  Stelvio Cimato
Carmelo Bastos Filho  Anne Canuto  André Coelho
Lordes Borrajo  Andre Carvalho  Leandro Coelho
Organization IX
Additional Reviewers

Contents

Learning Convolutional Ranking-Score Function by Query Preference Regularization ................................. 1
Guohui Zhang, Gaoyuan Liang, Weizhi Li, Jian Fang, Jingbin Wang,
Yanyan Geng, and Jing-Yan Wang

Dynamic Community Detection Algorithm Based on Automatic Parameter Adjustment ............................ 9
Kai Lu, Xin Wang, and Xiaoping Wang

An Ant Colony Random Walk Algorithm for Overlapping Community Detection ........................................ 20
TianRen Ma, Zhengyou Xia, and Fan Yang

UK - Means Clustering for Uncertain Time Series Based on ULDTW Distance ........................................... 27
Xiaoping Zhu, Zongmin Ma, and Qijie Tang

Predicting Physical Activities from Accelerometer Readings in Spherical Coordinate System .................... 36
Kittikawin Lehsan and Jakramate Bootkrajang

A Community Detection Algorithm Based on Jaccard Similarity Label Propagation ................................. 45
Meng Wang, Xiaodong Cai, Yan Zeng, and Xiaoxi Liang

A Robust Object Tracking Method Based on CamShift for UAV Videos ................................................. 53
Chang Zhao, Jiabin Yuan, and Huiting Zheng

Multi-output LSSVM-Based Forecasting Model for Mid-Term Interval Load Optimized by SOA and Fresh Degree Function ................................................................. 63
Huiting Zheng, Jiabin Yuan, and Chang Zhao

A Potential-Based Density Estimation Method for Clustering Using Decision Graph .............................. 73
Huanqian Yan, Yonggang Lu, and Li Li

Optimization of Grover’s Algorithm Simulation Based on Cloud Computing ........................................... 83
Xuwei Tang, Juan Xu, and Ye Zhou

Cross-Media Retrieval of Tourism Big Data Based on Deep Features and Topic Semantics ....................... 94
Yang Li, Junping Du, Zijian Lin, and Lingfei Ye
Information Retrieval with Implicitly Temporal Queries

Jingjing Wang and Shengli Wu

On the Relations of Theoretical Foundations of Different Causal Inference Algorithms

Furui Liu and Laiwan Chan

SibStCNN and TBCNN + kNN-TED: New Models over Tree Structures for Source Code Classification

Anh Viet Phan, Minh Le Nguyen, and Lam Thu Bui

A Community Detection Algorithm Based on Local Double Rings and Fireworks Algorithm

TianRen Ma and Zhengyou Xia

Cost Sensitive Matrix Factorization for Face Recognition

Jianwu Wan, Ming Yang, and Hongyuan Wang

Research of Dengue Fever Prediction in San Juan, Puerto Rico Based on a KNN Regression Model

Ying Jiang, Guohun Zhu, and Ling Lin

Identification of Nonlinear System Based on Complex-Valued Flexible Neural Network

Lina Jia, Wei Zhang, and Bin Yang

Research on the Method of Splitting Large Class Diagram Based on Multilevel Partitioning

JinShuai Li, XiaoFei Zhao, and BaoShan Sun

Ford Motorcar Identification from Single-Camera Side-View Image Based on Convolutional Neural Network

Shui-Hua Wang, Wen-Juan Jia, and Yu-Dong Zhang

Predicting Personality Traits of Users in Social Networks

Zhili Ye, Yang Du, and Li Zhao

Face Anti-spoofing Algorithm Based on Gray Level Co-occurrence Matrix and Dual Tree Complex Wavelet Transform

Xiaofeng Qu, Hengjian Li, and Jiwen Dong

High-Accuracy Deep Convolution Neural Network for Image Super-Resolution

Wen’an Tan and Xiao Guo

An Improved Density Peak Clustering Algorithm

Jian Hou and Xu E
Consensus-based Parallel Algorithm for Robust Convex Optimization with Scenario Approach in Colored Network .................................................. 222
Fan Feng and Feilong Cao

Heterogeneous Context-aware Recommendation Algorithm with Semi-supervised Tensor Factorization .......................... 232
Guoyong Cai and Weidong Gu

Object Detection with Proposals in High-Resolution Optical Remote Sensing Images .................................................. 242
Huoping Ding, Qinhan Luo, Zhengxia Zou, Cuicui Guo, and Zhenwei Shi

Towards Spectral-Texture Approach to Hyperspectral Image Analysis for Plant Classification .................................................. 251
Ali AlSuwaidi, Bruce Grieve, and Hujun Yin

Face Attributes Retrieval by Multi-Label Contractive Hashing .................................................. 261
Xuan Zhao, Xin Jin, and Xiao Guo

Trajectory Similarity-Based Prediction with Information Fusion for Remaining Useful Life .................................................. 270
Zhongyu Wang, Wang Tang, and Dechang Pi

Co-clustering with Manifold and Double Sparse Representation .................................................. 279
Fang Li and Sanyuan Zhang

Artifact Removal Methods in Motor Imagery of EEG .................................................. 287
Yanlong Zhu, Zhongyu Wang, Chenglong Dai, and Dechang Pi

Clustering by Searching Density Peaks via Local Standard Deviation .................................................. 295
Juanying Xie, Weiliang Jiang, and Lijuan Ding

Sparse Representation Based on Discriminant Locality Preserving Dictionary Learning for Face Recognition .................................................. 306
Guang Feng, Hengjian Li, Jiwen Dong, and Xi Chen

Cost-Sensitive Alternating Direction Method of Multipliers for Large-Scale Classification .................................................. 315
Huihui Wang, Yinghuan Shi, Xingguo Chen, and Yang Gao

Fuzzy 2D-LDA Face Recognition Based on Sub-image .................................................. 326
Xingrui Zhang, Yulian Zhu, and Xiaohong Chen
