Steve Depoe
McMicken College of Arts & Sciences
University of Cincinnati
Cincinnati, OH, USA

Drawing on both leading and emerging scholars of environmental communication, the Palgrave Studies in Media and Environmental Communication Series features books on the key roles of media and communication processes in relation to a broad range of global as well as national/local environmental issues, crises and disasters. Characteristic of the cross-disciplinary nature of environmental communication, the books showcase a broad variety of theories, methods and perspectives for the study of media and communication processes regarding the environment. Common to these is the endeavour to describe, analyse, understand and explain the centrality of media and communication processes to public and political action on the environment.

NOTES ON CONTRIBUTORS

Manuel Chavez is the Director of the Information and Media Studies doctoral program and a professor of journalism at the College of Communication Arts and Science at Michigan State University. He concentrates his research on crisis and risk communication, and international journalism. He has published in the areas of media and governmental accountability, border studies, migration issues, and natural resources protection.

Denisse J. Flores is a science and environmental journalist who holds a master's degree in communication from the Department of Communication, Universidad Iberoamericana, Mexico City. She has received a number of awards for her work in areas related to communication and environmental education and her interests focus on the conservation of natural resources.

Manuel A. Guerrero is the Director of the Department of Communication of the Universidad Iberoamericana, Mexico City, and UNESCO Chair in Communication and Society. His research has focused on the role of the media in new democracies, especially in the framing of political issues, and on media and political attitudes. He has also published in areas of transparency, accountability, and anticorruption policies and regulation.

Fermín Koop is an experienced Argentine environmental journalist, who currently works as a freelancer for local and international media outlets. He is the cofounder of Claves21, a network of Latin American environmental journalists and journalism students, and a local partner of the Earth

Journalism Network (EJN). He has a bachelor's degree in journalism, a postgraduate degree in climate change and an MSc degree in environment and development. He has taken part in three COP climate-change summits (COP20, COP21, and COP23), where he worked as a reporter and provided training for journalists on the subject of climate change.

Mireya Marquez is the coordinator of the master's program in Communication and Professor of Journalism Studies and Media Theory at the Dept. of Communication, Universidad Iberoamericana, Mexico City. Her research interests include comparative journalism cultures, media systems in Latin America, beat journalism, freedom of speech and anti-press violence, theories of media democratization, and mixed-methods research.

Lilliam Martínez-Bustos is an assistant professor in the Department of Journalism and Media at Florida International University. Ms. Martínez-Bustos has worked as an executive producer for CBS Telenoticias, as a producer in the Washington offices of the NBC-Telemundo and Univision networks, and has also worked at local affiliates of PBS, CBS, and ABC in Boston.

María Teresa Mercado-Sáez is an associate professor in the School of Journalism at Universidad Cardenal Herrera-CEU, CEU Universities (Valencia, Spain). She teaches environmental journalism and her research focuses on climate change and energy in the media. She is editor of *El debate energético en los medios*, of a book about the energy debate on Spanish media. She contributes to the local newspaper *Levante-EMV* as a TV columnist. She spent 2010 in Argentina conducting research there.

Rachel R. Mourão is an assistant professor of innovative technologies at the School of Journalism, Michigan State University. Her research focuses on the relationships between journalism, technology, and politics in Latin America and the USA. Employing both quantitative and qualitative methods, her projects analyze how multiple influences shape journalistic coverage of protests and elections in Brazil, and how that compares to the US press.

Juliet Pinto is an associate professor in the Department of Journalism, Donald P. Bellisario College of Communications, Pennsylvania State University. Dr. Pinto studies environmental communication in Spanish and English-language media and has produced an award-winning documentary on sea-level rise, *South Florida's Rising Seas* (2014).

Heloisa Aruth Sturm is a doctoral candidate at The University of Texas at Austin School of Journalism and the student leader of the Digital Media Research Group at the Annette Strauss Institute for Civic Life. Her research interests include political communication, social media, and journalistic practices. She previously worked as a reporter in Brazil covering education, culture, and science.

Bruno Takahashi is an associate professor of environmental journalism and communication at Michigan State University. Dr. Takahashi is also the research director of the Knight Center of Environmental Journalism. His research interests include media coverage of environmental affairs, environmental journalism practices, risk communication, and the links between media and policy.

María Angela Torres-Kremers is an environmental journalist in Berlin, Germany. Over many years she has worked as part of the academic staff in the departments of Social Communication and Journalism of several Colombian universities. She is also the editor of *Revista YARUMO Internacional*. Dr. Torres-Kremers's PhD degree was in Journalism and Communication Sciences, with a special focus on environmental communication in Germany.

Mercedes Vigón is an associate professor at Florida International University's Department of Journalism and Media, and is the associate director of the FIU International Media Center. Dr. Vigón has worked as an executive producer and international writer for CBS Telenoticias, a journalist with UPI, and a news director for Net Financial News.

Hildegard Willer is a German journalist and journalism lecturer at the Catholic University of Peru (PUCP). Her journalistic work focuses on environmental and social issues and has appeared in German-language publications, for example in the *NZZ*, *taz*, *welt-sichten*, and *Tageswoche*, as well as English-language publications like *Eco-Americas* and *The Lancet*.
