Knowledge and Space

This book series entitled “Knowledge and Space” is dedicated to topics dealing with the production, dissemination, spatial distribution, and application of knowledge. Recent work on the spatial dimension of knowledge, education, and science; learning organizations; and creative milieus has underlined the importance of spatial disparities and local contexts in the creation, legitimation, diffusion, and application of new knowledge. These studies have shown that spatial disparities in knowledge and creativity are not short-term transitional events but rather a fundamental structural element of society and the economy.

The volumes in the series on Knowledge and Space cover a broad range of topics relevant to all disciplines in the humanities and social sciences focusing on knowledge, intellectual capital, and human capital: clashes of knowledge; milieus of creativity; geographies of science; cultural memories; knowledge and the economy; learning organizations; knowledge and power; ethnic and cultural dimensions of knowledge; knowledge and action; and mobilities of knowledge. These topics are analyzed and discussed by scholars from a range of disciplines, schools of thought, and academic cultures.

Knowledge and Space is the outcome of an agreement concluded by the Klaus Tschira Foundation and Springer in 2006.

Acknowledgements

The editors thank the Klaus Tschira Stiftung for funding the symposia and book series on Knowledge and Space. The team of the Klaus Tschira Stiftung and the Studio Villa Bosch have always been contributing greatly to the success of the symposia. Together with all the authors in this volume, we are especially grateful to Anna Mateja Schmidt for her superb assistance to the editors as well as to David Antal and James Bell for their tireless dedication to quality as technical editors of all the chapters and as translators for some of them. Volker Schniepp at the Department of Geography at Heidelberg University has generously helped get figures and maps into shape for publication. We also thank all student assistants and colleagues from the Department of Geography who have helped accomplish the symposium as well as this 13th volume in the Klaus Tschira Symposia book series. We are especially grateful to Katrin Janzen, Andreas Kalström, Pia Lieve, Leslie Ludwig, Florence Wieder and Hanna Wilbrand.
