

# **Molecular Pathology Library**

**Series Editor**

Philip T. Cagle  
Houston, TX, USA

Creating a diagnostic, prognostic, and therapeutic treatment strategy precisely tailored to each patient's requirements is the fundamental idea behind precision medicine. The Molecular Pathology Library series integrates molecular biology with clinical data for treatment designed for the patient's individual genetic makeup. This approach is widely recognized as the future of medicine and it is vital for practicing pathologists to know the molecular biology, diagnostics and predictive biomarkers for specific forms of cancer or other diseases and their implications for treatment. Each volume focuses on a specific type of cancer or disease and provides concise essential information in a readily accessible, user friendly, convenient format. Each volume is oriented towards the pathologist who needs this information for daily practice, tumor boards, and conferences or for preparation for certification boards or other tests. Written by experts focusing on patient care, these books are indispensable aids to pathologists' participation in precision medicine in the 21st century.

# Contents

## Part I Molecular Pathology of Pediatric Neoplasms: General Principles

- 1 Principles of Molecular Biology and Oncogenesis** . . . . . 3  
Rachel L. Stewart, Selene C. Koo, and Larissa V. Furtado
- 2 Molecular Methods in Oncology:  
Targeted Mutational Analysis** . . . . . 9  
Jason A. Jarzembowski
- 3 Molecular Methods in Oncology: Genomic Analysis** . . . . . 33  
Jason A. Jarzembowski
- 4 Molecular Testing in Pediatric Oncology Practice** . . . . . 45  
Jeremy P. Segal and Lauren Ritterhouse
- 5 Molecular Targeted Therapy of Pediatric Neoplasms** . . . . . 67  
Elizabeth A. Sokol and Navin R. Pinto

## Part II Molecular Pathology of Specific Pediatric Neoplasms

- 6 Hematolymphoid System** . . . . . 89  
John Choi, Jeffery M. Klco, and Kamran Mirza
- 7 Pediatric Brain Tumors** . . . . . 137  
Peter Pytel and Carrie Fitzpatrick
- 8 Neuroblastoma and Neuroblastic Tumors** . . . . . 151  
Hiroyuki Shimada and Naohiko Ikegaki
- 9 Soft Tissue and Bone Neoplasms** . . . . . 169  
Peter Pytel and Nicole A. Cipriani
- 10 Skin, Melanocytic Neoplasms** . . . . . 195  
Kristen M. Paral and Thomas Krausz

<b>11 Salivary Gland, Thyroid, and Parathyroid Neoplasms: Molecular Features</b> .....	203
M. John Hicks	
<b>12 Cardiovascular and Respiratory Systems</b> .....	239
