Contents

1 Introduction 1
Conrad Kickert and Mahyar Arefi

Part I Agency Versus Authority

2 Everyday and Bottom-Up: A Counter-Narrative of American City Design 13
Jeffrey Hou

3 Guerrilla Architecture and Humanitarian Design 29
Scott Shall

4 The Practice of Urbanism: Civic Engagement and Collaboration by Design 51
David Brain

5 Lean Urbanism Is About Making Small Possible 67
Hank Dittmar and Douglas S. Kelbaugh

6 Informal Urbanism and the American City 83
Anastasia Loukaitou-Sideris and Vinit Mukhija

Part II Informalizing the Formal

7 DIY Neighborhoods 99
Emily Talen

8 New Trends in Bottom-Up Urbanism and Governance—Reformulating Ways for Mutual Engagement Between Municipalities and Citizen-Led Urban Initiatives 113
Rosa Danenberg and Tigran Haas

9 The Self-Made City—Urban Living and Alternative Development Models 131
Kristien Ring

10 Informal Place-Making: Mosques, Muslims, and Urban Innovation in Germany 149
Petra Kuppinger

11 Typologies of Bottom-Up Planning in Southern Europe: The Case of Greek Urbanism During the Economic Crisis 163
Konstantinos Serraos and Evangelos Asprogerakas

Part III Formalizing the Informal

12 Lean Urbanism in Central Africa 179
Stephen Coyle

13 Planning and Unplanning Amman: Between Formal Planning and Non-traditional Agency 201
Luna Khirfan

14 Endurance, Compliance, Victory: Learning from Informal Settlements in Five Iranian Cities 219
Mahyar Arefi and Neda Mohsenian-Rad

15 Space, Time, and Agency on the Indian Street 239
Vikas Mehta

16 Bottom-Up Urbanism in China Urban Villages and City Development 255
Stefan Al

Part IV Theory Versus Practice

17 Bottom-Down Urbanism 271
Nezar AlSayyad and Sujin Eom

18 Property, Planning and Bottom-Up Pedestrian Spaces in Toronto's Post-war Suburbs 287
Paul M. Hess

19 Privilege and Participation: On the Democratic Implications and Social Contradictions of Bottom-Up Urbanisms 305
Gordon C. C. Douglas

20 Pop-ups and Public Interests: Agile Public Space in the Neoliberal City 323
Quentin Stevens and Kim Dovey

Final Words 339

Index 349

Notes on Contributors

Stefan Al is an architect and urban designer based in New York whose design credentials include work on the 2000-tall Canton tower, briefly the world's tallest tower. His research focuses on high-density and transit-oriented cities, urbanization in developing countries, and climate change adaptation.

Nezar AlSayyad is a Professor of Architecture, City Planning, Urban Design, and Urban History at the UC Berkeley College of Environmental Design. He is the Faculty Director of the Center for Arab Societies and Environments Studies (CASES) and is currently serving as a President of the International Association for the Study of Traditional Environments (IASTE) and Editor of its journal *Traditional Dwelling and Settlements Review.* He has authored and edited numerous books in the field of urban studies.

Mahyar Arefi is a Professor of Planning at the University of Texas at Arlington, USA. He received his Ph.D. in Planning from the University of Southern California. In addition to his books, his publications have appeared in edited volumes and peer-reviewed flagship journals, and he is the Co-Editor of Palgrave's *Urban Design International.*

Evangelos Asprogerakas is an Assistant Professor of Spatial Planning in the Department of Spatial Planning and Regional Development at the University of Thessaly, Greece. His research interests include spatial planning and governance, urban network policy and development planning, and urban regeneration.

David Brain is a Professor of Sociology and Environmental Studies at the New College of Florida. His research and teaching interests focus on the connections between place-making, community-building, and civic engagement, and on sociological issues related to the planning and design of good neighborhoods, humane cities, and sustainable development at the regional scale.

Stephen Coyle is an urban planner, architect, developer, and an international expert in sustainable and resilience in development. He cofounded the National Charrette Institute, now part of Michigan State University's School of Planning, Design and Construction, the board of the California Chapter, Congress for the New Urbanism, Ingénieurs sans frontières, Gabon (Engineers Without Borders) and is currently Community Development Director in Woodland, CA.

Rosa Danenberg is a Ph.D. Candidate at KTH Royal Institute of Technology, and freelance urbanist in the field of Urban Planning and Design. Her research focuses on the intersection between buildings, public space, and the migrant economy.

Hank Dittmar is a global sustainability authority and urbanist, advising governments, companies and communities all over the world on making cities and towns more liveable and resilient. He is a former Chief Executive of The Prince's Foundation for the Built Environment in London, Board Chair of the Congress for the New Urbanism, and President and CEO of Reconnecting America.

Gordon C. C. Douglas is an Assistant Professor of Urban and Regional Planning, and Director of Metropolitan Studies at San Jose State University. His research addresses questions of local identity, peoples' relationships to their physical surroundings, and social and spatial inequality in the city.

Kim Dovey is a Professor of Architecture and Urban Design in the faculty of Architecture, Building, and Planning at the University of Melbourne. His research on social issues in architecture and urban design has included investigations of the relations of place to power, urban informality and the politics of public space.

Sujin Eom is an historian of the built environment and holds a Ph.D. in architecture from the University of California, Berkeley. She is currently working on a book manuscript that examines the mobility of architecture and urban form, with a regional focus on East Asia, interrogating how technologies of dividing cities are produced and circulated at specific historical junctures.

Tigran Haas is an Associate Professor of Urban Design and Planning and the Director of the Centre for the Future of Places and Director of the Graduate Program in Urbanism at the School of Architecture and the Built Environment at KTH. His research and teaching focus on contemporary trends and paradigms in urban planning and design, new urbanism, sustainable urbanism, social housing and urban transformations, and city development.

Paul M. Hess is an Associate Professor int the Department of Geography and Planning at the University of Toronto. His research focuses on pedestrian

environments and design, streets as public space, transport equity, and suburban form and transformation.

Jeffrey Hou is a Professor of Landscape Architecture and Adjunct Professor in Architecture and Urban Design and Planning at the University of Washington, Seattle. His work focuses on community design, design activism, public space and democracy, and transcultural urbanism.

Douglas S. Kelbaugh FAIA is Professor and former Dean at the University of Michigan's Taubman College of Architecture and Urban Planning. He has taught design at nine schools of architecture in the USA, Europe, Japan, and Australia and is a former principal in Kelbaugh, Calthorpe and Associates in Seattle and in Kelbaugh+Lee in Princeton, New Jersey, both award-winning firms. Among many other writings, he coauthored the national best seller *The Pedestrian Pocket Book*.

Luna Khirfan is an Associate Professor at the School of Planning at the University of Waterloo. Her current research focuses on community climate change adaptation, community engagement, participatory planning, and urban governance, knowledge transfer, and historic preservation.

Conrad Kickert is an Assistant Professor of Urban Design at the University of Cincinnati, USA. He received his Ph.D. in Architecture from the University of Michigan. He has worked as an urban researcher and designer in The Netherlands, the UK, and the USA, specializing in urban morphology.

Petra Kuppinger is a Professor of Anthropology at Monmouth College, Illinois and former President of the Society of Urban National and Transnational Anthropology. Her research focuses on cities and spaces; space and power; Middle Eastern cities and space culture and Islam in Germany.

Anastasia Loukaitou-Sideris is an Associate Provost for Academic Planning at UCLA and a Professor of Urban Planning at the UCLA Luskin School of Public Affairs. Her research focuses on the public environment of the city, its physical representation, aesthetics, social meaning and impact on the urban resident.

Vikas Mehta is an Associate Professor of Urbanism at the University of Cincinnati's School of Planning. He is the Fruth/Gemini Chair and Ohio Eminent Scholar of Urban/Environmental Design and the school's coordinator for the Urban Design Certificate. Dr. Mehta's work focuses on the role of design and planning in creating a more responsive, equitable, stimulating and communicative environment.

Neda Mohsenian-Rad is an Architect and Urban Designer in Atlanta. She graduated from the University of Cincinnati's School of Planning graduate program on the redesign of downtown Cincinnati.

Vinit Mukhija is a Professor and Department Chair of Urban Planning in the Luskin School of Public Affairs at the University of California, Los Angeles (UCLA). His research focuses on informal housing and slums in developing countries and "Third World-like" housing conditions (including colonias, unpermitted trailer parks, and illegal garage apartments) in the USA.

Kristien Ring is an Assistant Professor of Architecture at the University of South Florida's School of Architecture and Community Design. She is the Principal of the interdisciplinary studio AA-PROJECTS, which is engaged in the production of interdisciplinary projects on future-oriented themes in the realm of architecture and urban planning and was the Founding Director of the DAZ German Architecture Center, Berlin.

Konstantinos Serraos is a Professor in Urban Planning and Design at the National Technical University of Athens (NTUA), School of Architecture. He is an architect engineer and city and regional planner.

Scott Shall is an Associate Professor of Architecture and Associate Dean of the College of Architecture and Design at Lawrence Technological University. His work focuses on developing effective socially responsive design and pedagogic practices for architects, planners, and others working within extra-legal settlements.

Quentin Stevens is an Associate Professor of urban design at RMIT University in Melbourne. His research focuses on people's perception and behavior in urban open spaces, with a particular interest in playful appropriations of underused spaces, waterfronts, memorials, and public artworks.

Emily Talen is a Professor of Urbanism at the University of Chicago. Her research is devoted to urban design and urbanism, especially the relationship between the built environment and social equity.

List of Figures

Fig. 2.1 Performances in Seattle's Nord Alley. Photograph by Jeffrey Hou 14

Fig. 2.2 Community gardens, such as this in the West Seattle neighborhood, serve as nearby nature for urban dwellers. Photograph by Jeffrey Hou 19

Fig. 2.3 Parking lot shrine in East Los Angeles: adaptation of an everyday urban landscape. Photograph by Jeffrey Hou 21

Fig. 2.4 Park(ing) Day, Seattle (2012). Photograph by Jeffrey Hou 22

Fig. 3.1 projectionMAIL is a $2 projector made from commandeered postal service boxes. It borrows resources, such as newsbins in off-hours or the shadows generated by park benches, to display image-based artwork within the streetscape, expanding the gallery space and, transitively, the definition of patron, artist, curator, and critic (Image courtesy of the International Design Clinic) 32

Fig. 3.2 Vista Oculta packages art education into small lessons that could be completed in less than five minutes and disseminated on a standard postcard. The authors charted the use, movement and popularity of the cards to collaboratively generate a street-based educational system in La Paz, Bolivia (Image courtesy of the International Design Clinic) 37

Fig. 3.3 To design a school system with the migrant workers living on construction sites in India, the International Design Clinic initiated various small-scale creative actions to reveal the perspective of all parties who might one day be a part of this system. From this, projects such as a $2 water filter and foldable school-scape developed—ideas that are not obviously related to education, but emerged through the process as fundamental to the exercise of any educational activities within this specific community (Image courtesy of the International Design Clinic) 43

Fig. 3.4 fencePOCKET uses reclaimed tarp to create usable space within the thickening of the assumed line between public and private realms caused by the horizontal distortion of chainlink fencing. The size and shape of spaces thereby created are determined by the specific nature of the deviation of the fencing, the programmed use is determined by nearby residents and passersby (Image courtesy of the International Design Clinic) 45
Fig. 3.5 PARK-IN-A-CART borrows the architecture and rituals of vending culture to provide parks within the unplanned community of El Alto, Bolivia. The need for this work emerged through research on a completely different project, as did mobileMAKERSPACE—a project that provides educational and vocational opportunities for the residents in working wood, metal, and fabric (Image courtesy of the International Design Clinic) 48
Fig. 5.1 Renovation of old factory for housing (Image courtesy of DPZ Partners) 74
Fig. 5.2 Example of housing with PV roof panels in the Vauban neighborhood of Freiberg, Germany (Image courtesy of Douglas Kelbaugh) 78
Fig. 6.1 Annual Italian street fair, Manhattan (*Source* Anastasia Loukaitou-Sideris) 88
Fig. 6.2 Guerilla gardening (*Source* http://greenbookpages.com/blog/291217/guerrilla-gardening/) 90
Fig. 6.3 A second unit or accessory dwelling unit (ADU) in Santa Cruz, California (*Source* Vinit Mukhija) 92
Fig. 8.1 *Trädgård På Spåret*, Stockholm 117
Fig. 8.2 *Cyklopen*, Stockholm, Sweden 118
Fig. 8.3 *Ìlk Adim*, a Women's and Children's Center (*WCC*), Istanbul, Turkey 120
Fig. 8.4 *Sokak Bizim* (Streets Belong to Us), Istanbul, Turkey 121
Fig. 8.5 Music for Peace, Istanbul, Turkey 122
Fig. 9.1 Oderberger mix diagram of spaces, interaction and adaptability © BARarchitekten 140
Fig. 9.2 Oderberger mix interior of live-work space © Andrea Kroth 141
Fig. 9.3 Big Yard development by Zanderroth Architects, a family-oriented living community © Simon Menges 142
Fig. 9.4 R50—Co-housing development, an incubator for improving urban interaction and qualities in the neighborhood © AndreaKroth 144
Fig. 11.1 **a** Navarino Park before (*Source* K. Serraos, March 1987). **b** Navarino Park after (*Source* K. Serraos, November 2017) 169
Fig. 11.2 General view of KAPAPS Park as redesigned by the City of Athens (*Source* E. Asprogerakas, August 2017) 170
Fig. 11.3 General view of the Stavros Niarchos Cultural Center (*Source* K. Serraos, June 2016) 172

Fig. 12.1 View southwest over the Akanda Commune, a growing middle class settlement on the Gabon Estuary, with the Pongara National Park across the bay in the far distance 181
Fig. 12.2 A "catch all" drainage ditch flanked by self-built homes, snakes through a semi-rural village in an area within the Libreville Commune subject to periodic flooding 182
Fig. 12.3 Children and adults circulate on elevated walkways that circumvent trash and water in flood-prone basins that house families unable to afford the rents of apartments along the ridges 184
Fig. 12.4 Professional Gabonese planners, engineers and geographers astutely apply the new Gabon SmartCode's "transect-based neighborhoods" within the PK5-12 Redevelopment Plan 186
Fig. 12.5 The Akanda and Ntoum Commune SmartCode Sector Plans, by simply identifying where and where not to build, help protect fragile, mangroves-lined estuaries and streams from unrestricted, damaging development 190
Fig. 12.6 French colonial-period homes and the traditional African wooden dwellings were designed to capture the prevailing breezes off the Gabon Estuary, unlike the modern structures dependent on mechanical cooling 191
Fig. 13.1 The new Hashemite Plaza is a large swath of concrete 208
Fig. 13.2 Litter on the streets of (West) Amman 212
Fig. 14.1 Location of the five target cities in Iran (*Source* Neda Mohsenian-Rad) 221
Fig. 15.1 Vendors make the street a useful and meaningful place for many more by increasing the range of goods and services, thus also increasing the diversity and difference on the street. Photograph by Prem Mehta 244
Fig. 15.2 Vendors create an inhabitable field of space that expands the occupancy on the street beyond the edges. Photograph by Shilpa Mehta 245
Fig. 15.3 Vendors negotiate and occupy space, in this case an area for parking, in ways that challenge the linearity of the street. Photograph by Shilpa Mehta 245
Fig. 15.4 The complex pattern of territorialization, adjacencies and overlaps on the street occurs through an elaborate act of dialogue, negotiation and compromise among the occupants. Photograph by Shilpa Mehta 246
Fig. 15.5 The street displays various levels of contact between the classes. Photograph by Shilpa Mehta 247
Fig. 15.6 Multiple social practices of active and passive interaction and transaction make the street space dynamic and fluid. Photograph by Shilpa Mehta 248
Fig. 16.1 'Thin Line Sky' in Xiasha urban village, located in Shenzhen. Caged balconies, hanging clothes and dripping air-conditioning units adorn the narrow streets, with only a small strip of daylight seeping in. Credit: Stefan Al 258

Fig. 16.2 Shanghai's typical modern housing areas are devoid of the fine-grained urbanism of its urban villages. Credit: Lawrence Wang, Flickr (licensed under Creative Commons) 260
Fig. 16.3 Visitors and villagers in Daxin Village play pool outdoors. Photo by Stefan Al 262
Fig. 17.1 Zabaleen after the collapse 280
Fig. 17.2 The datum is always assumed to be a line but in the case of urbanism is a zone 282
Fig. 18.1 Neighborhood units within the concession grid as part of Scarborough Township's official plan, 1966. Copyright: In public domain, crown copyright expired, Scarborough Planning Board, Ontario 290
Fig. 18.2 The Peanut as planned in 1965, right, and built, left, with modernist slabs arrayed around a community space and adjoining neighborhood units (North York Planning Board. 1965. District 12 Plan. North York, Ontario. Air photo courtesy of Lockwood Surveying Corporation) 295
Fig. 18.3 Common routes across private property used by Peanut focus group participants (left) and the 'Goodview' informal path through a fence cut (right). Photo: Katherine H. Childs 296
Fig. 18.4 Important informal Scarborough Village routes. Figure by author 297
