	Magdalena Dej and Paweł Capik	

Editors and Contributors

About the Editors

Paweł Capik lectures in international business at Keele University (UK). His research explores interdependencies between international business strategies and operations and regional development theory and practice, particularly in the context of emerging and transition economies. Paweł's research areas include inward investment attraction and place marketing, sourcing and shoring strategies, large and small firms' internationalization and location motivations and their impacts on regional and local economies.

Magdalena Dej is a geography researcher at the National Institute for Spatial Policy and Housing (Poland). She received her Ph.D. from Jagiellonian University and specializes in economic local and regional development, particularly the development of rural areas. She authored and coauthored several books, numerous reports and research papers on the impacts of large companies on local communities as well as on rural areas and their relationship with major metropolitan areas and labor markets. Magdalena led and participated in several international research projects financed by the European Union Interreg IVC, International Visegrad Fund, Polish-German Foundation for Science and National Science Centre, Polish Ministry of Science and Higher Education.
