

Sustainability and Innovation

Editor-in-Chief

Jens Horbach

Series editors

Valentina de Marchi

René Kemp

Marco Lehmann-Waffenschmidt

Arthur P. J. Mol

Rainer Walz

Technological, institutional and social innovation promotes economic development and international competitiveness, and can do much to reduce environmental burdens. Thus, innovation is an essential factor in the realisation of the principles of sustainable development.

The series 'Sustainability and Innovation' aims to positively contribute to a better understanding of the connection between innovation and sustainability. It is interdisciplinary in coverage, concentrating primarily on the links between environmental and innovation research. Individual titles in the series focus on topical issues and cover both theoretical and empirical aspects: concepts of major practical relevance are also discussed. The series is addressed to researchers and policy makers, as well as to specialists and leaders in business and industry.

Contents

1	New Developments in Eco-Innovation Research: Aim of the Book and Overview of the Different Chapters	1
	Jens Horbach and Christiane Reif	
2	Changing Patterns in Eco-Innovation Research: A Bibliometric Analysis	13
	Serdar Türkeli and René Kemp	
3	On the Economic Returns of Eco-Innovation: Where Do We Stand?	55
	Claudia Ghisetti	
4	Shaping System Innovation: Transformative Environmental Policies	81
	Klaus Jacob	
5	Outlook: Can Environmental Product Standards Enable Eco-Innovation?	95
	Albert Roger	
6	Disentangling Technological Innovations: A Micro-Econometric Analysis of their Determinants	123
	Andreas Ziegler	
7	The Impact of Resource Efficiency Measures on the Performance of Small and Medium-Sized Enterprises	147
	Jens Horbach	
8	Good Enough! Are Socially Responsible Companies the More Successful Environmental Innovators?	163
	Christiane Reif and Sascha Rexhäuser	

- 9 Environmental Innovation and Corporate Sustainability:
A 15-Year Comparison Based on Survey Data 193**
Hüseyin Doluca, Benedikt Holzner, and Marcus Wagner
- 10 Effects of Innovation and Domestic Market Factors on OECD
Countries’ Exports of Wind Power Technologies 219**
Joachim Schleich and Rainer Walz
- 11 Exploring the Role of Instrument Design and Instrument
Interaction for Eco-Innovation: A Survey-Based Analysis
of Renewable Energy Innovation in Germany 233**
Karoline S. Rogge and Joachim Schleich
- 12 Corporate Social Responsibility in the Fashion Industry: How
Eco-Innovations Can Lead to a (More) Sustainable Business
Model in the Fashion Industry 257**
Thomas Cleff, Gwen van Driel, Lisa-Marie Mildner,
and Nadine Walter
- 13 Towards a Dynamic Understanding of Innovation Systems:
An Integrated TIS-MLP Approach for Wind Turbines 277**
Rainer Walz
