Acknowledgements

This book is an updated version of my Ph.D. thesis from Science, Technology and Innovation Studies at the University of Edinburgh. Huge gratitude goes to my supervisors, Prof. Robin Williams and Dr. James Stewart, who guided me with insightful comments, constructive criticism and great patience. Great appreciation also goes to the interviewees who have taken time out of their busy schedules to share insights with me. Their input has played a vital role in bringing this book together, and this would not have been possible without their generosity. I am also grateful for Music 2025 team, particularly Peter Jenner and Paul O'Hagan who gave life to this research and rekindled my academic interest in the digital music industry. Special thanks go to David Humphries for his emotional and practical support.
