

SpringerBriefs in Molecular Science

Chemistry of Foods

Series editor

Salvatore Parisi, Industrial Consultant, Palermo, Italy

The series Springer Briefs in Molecular Science: Chemistry of Foods presents compact topical volumes in the area of food chemistry. The series has a clear focus on the chemistry and chemical aspects of foods, topics such as the physics or biology of foods are not part of its scope. The Briefs volumes in the series aim at presenting chemical background information or an introduction and clear-cut overview on the chemistry related to specific topics in this area. Typical topics thus include: - Compound classes in foods – their chemistry and properties with respect to the foods (e.g. sugars, proteins, fats, minerals, ...) - Contaminants and additives in foods – their chemistry and chemical transformations - Chemical analysis and monitoring of foods - Chemical transformations in foods, evolution and alterations of chemicals in foods, interactions between food and its packaging materials, chemical aspects of the food production processes - Chemistry and the food industry – from safety protocols to modern food production The treated subjects will particularly appeal to professionals and researchers concerned with food chemistry. Many volume topics address professionals and current problems in the food industry, but will also be interesting for readers generally concerned with the chemistry of foods. With the unique format and character of Springer Briefs (50 to 125 pages), the volumes are compact and easily digestible. Briefs allow authors to present their ideas and readers to absorb them with minimal time investment. Briefs will be published as part of Springer's eBook collection, with millions of users worldwide. In addition, Briefs will be available for individual print and electronic purchase. Briefs are characterized by fast, global electronic dissemination, standard publishing contracts, easy-to-use manuscript preparation and formatting guidelines, and expedited production schedules. Both solicited and unsolicited manuscripts focusing on food chemistry are considered for publication in this series.

Contents

1	EU Regulation on Novel Foods	1
1.1	What Is ‘Novel’ on the Table?	2
1.2	A Comparative Overview of Novel Food Regulations.	3
1.2.1	Canada	5
1.2.2	Australia and New Zealand	6
1.2.3	China	7
1.2.4	The European Regulation on Novel Foods up to 2018	8
1.3	The New European Regulation	9
1.3.1	Major Changes	10
1.3.2	Novel Food: The EU Regulatory Definition	12
1.3.3	Determination of the Novel Food Status	18
1.3.4	The New Authorisation Procedures	18
1.3.5	Confidentiality and Data Protection	23
	References	25
2	Toxicological Studies in Assessing Novel Food Safety	31
2.1	Novel Foods and Toxicological Evaluation According to the New Regulation (EU) No 2015/2283. An Introduction	32
2.2	Human Health and Safety Risks. The Classification of Novel Foods	33
2.2.1	Nanofoods.	36
2.2.2	Cloned Animals.	38
2.2.3	Insect Food	40
2.3	Risk Evaluation of Novel Foods. Analytical Methods	41
2.4	The Problem of Traditional Foods from a Third Country	42
	References	43

- 3 Novel Foods: The ‘History of Safe Use’ Approach 47**
 - 3.1 Traditional Foods and the ‘History of Safe Use’ Concept 48
 - 3.2 Traditional Foods and ‘Substantial Equivalence’ 49
 - 3.3 ‘History of Safe Use’ Pillars: A First- and Second-Level
Description 50
