Preface

The International Conference on Intelligent Computing (ICIC) was started to provide an annual forum dedicated to the emerging and challenging topics in artificial intelligence, machine learning, pattern recognition, bioinformatics, and computational biology. It aims to bring together researchers and practitioners from both academia and industry to share ideas, problems, and solutions related to the multifaceted aspects of intelligent computing.

ICIC 2018, held in Wuhan, China, August 15–18, 2018, constituted the 14th International Conference on Intelligent Computing. It built upon the success of ICIC 2017, ICIC 2016, ICIC 2015, ICIC 2014, ICIC 2013, ICIC 2012, ICIC 2011, ICIC 2010, ICIC 2009, ICIC 2008, ICIC 2007, ICIC 2006, and ICIC 2005 that were held in Liverpool, UK, Lanzhou, Fuzhou, Taiyuan, Nanning, Huangshan, Zhengzhou, Changsha, China, Ulsan, Korea, Shanghai, Qingdao, Kunming, and Hefei, China, respectively.

This year, the conference concentrated mainly on the theories and methodologies as well as the emerging applications of intelligent computing. Its aim was to unify the picture of contemporary intelligent computing techniques as an integral concept that highlights the trends in advanced computational intelligence and bridges theoretical research with applications. Therefore, the theme for this conference was “Advanced Intelligent Computing Technology and Applications.” Papers focused on this theme were solicited, addressing theories, methodologies, and applications in science and technology.

ICIC 2018 received 632 submissions from 19 countries and regions. All papers went through a rigorous peer-review procedure and each paper received at least three reviews. Based on the review reports, the Program Committee finally selected 275 high-quality papers for presentation at ICIC 2018, included in three volumes of proceedings published by Springer: two volumes of *Lecture Notes in Computer Science* (LNCS) and one volume of *Lecture Notes in Artificial Intelligence* (LNAI).

This volume of *Lecture Notes in Computer Science* (LNCS) includes 93 papers.

The organizers of ICIC 2018, including Tongji University, Wuhan University of Science and Technology, and Wuhan Institute of Technology, made an enormous effort to ensure the success of the conference. We hereby would like to thank the members of the Program Committee and the referees for their collective effort in reviewing and soliciting the papers. We would like to thank Alfred Hofmann, executive editor at Springer, for his frank and helpful advice and guidance throughout and for his continuous support in publishing the proceedings. In particular, we would like to thank all the authors for contributing their papers. Without the high-quality submissions from the authors, the success of the conference would not have been possible. Finally, we are

especially grateful to the IEEE Computational Intelligence Society, the International Neural Network Society, and the National Science Foundation of China for their sponsorship.

of Optimization Algorithms 681
Qunfeng Liu, Wei Chen, Yingying Cao, Yun Li, and Ling Wang

Mosquito Host-Seeking Algorithm Based on Random Walk and Game of Life	693
<i>Yunxin Zhu, Xiang Feng, and Huiqun Yu</i>	
A Novel Energetic Ant Optimization Algorithm for Routing Network Analysis	705
<i>Xiang Feng and Hanyu Xu</i>	
A Comparison Study of Surrogate Model Based Preselection in Evolutionary Optimization	717
<i>Hao Hao, Jinyuan Zhang, and Aimin Zhou</i>	
A Grouping Genetic Algorithm Based on the GES Local Search for Pickup and Delivery Problem with Time Windows and LIFO Loading	729
<i>Feng Zhang, Bin Li, and Kun Qian</i>	
Evolutionary Structure Optimization of Convolutional Neural Networks for Deployment on Resource Limited Systems	742
<i>Qianyu Zhang, Bin Li, and Yi Wu</i>	
Research on Vehicle Routing Problem and Its Optimization Algorithm Based on Assembled Building	754
<i>Kun Jiang, Jun-qing Li, Ben Niu, Yongqin Jiang, Xiaoping Lin, and Pei-yong Duan</i>	
Research on Vehicle Routing Problem with Time Windows Restrictions	763
<i>Yun-Qi Han, Jun-Qing Li, Yong-Qin Jiang, Xing-Rui Chen, Kun Jiang, Xiao-Ping Lin, and Pei-Yong Duan</i>	
Research on Swarm Intelligence Algorithm Based on Prefabricated Construction Vehicle Routing Problem	771
<i>Xingrui Chen, Jun-Qing Li, Yongqin Jiang, Yunqi Han, Kun Jiang, Xiaoping Lin, and Pei-Yong Duan</i>	
Improved Digital Password Authentication Method for Android System.	780
<i>Bo Geng, Lina Ge, Qiuyue Wang, and Lijuan Wang</i>	
Steepest Descent Bat Algorithm for Solving Systems of Non-linear Equations	792
<i>Gengyu Ge, Jiaxian Song, Juan Wang, and Aijia Ouyang</i>	
User Engagement Prediction Using Tweets.	802
<i>Ameesha Mittal, Geetika Arora, Kamlesh Tiwari, Vandana Dixit Kaushik, and Phalguni Gupta</i>	
Discrimination and Prediction of Protein-Protein Binding Affinity Using Deep Learning Approach	809
<i>Rahul Nikam, K. Yugandhar, and M. Michael Gromiha</i>	

Principal Component Analysis-Based Unsupervised Feature Extraction Applied to Single-Cell Gene Expression Analysis <i>Y-h. Taguchi</i>	816
Finding Protein-Binding Nucleic Acid Sequences Using a Long Short-Term Memory Neural Network <i>Jinho Im, Byungkyu Park, and Kyungsook Han</i>	827
Constructing Gene Co-expression Networks for Prognosis of Lung Adenocarcinoma. <i>Byungkyu Park, Jinho Im, and Kyungsook Han</i>	831
RMCL-ESA: A Novel Method to Detect Co-regulatory Functional Modules in Cancer <i>Jiawei Luo and Ying Yin</i>	840
Author Index	847
