Preface

In recent years, concepts in object-oriented modeling and programming have been extended in several directions, giving rise to new paradigms such as agent-orientation and feature-orientation.

This volume came out of a Dagstuhl seminar exploring the relationship between the original paradigm and the two new ones. Following the success of the seminar, the idea emerged to edit a volume with contributions from participants – including those who were invited but could not come. The participants' reaction was very positive, and so we, the organizers of the seminar, felt encouraged to edit this volume. All submissions were properly refereed, resulting in the present selection of high-quality papers in between the topics of objects, agents and features. The editors got help from a number of additional reviewers, viz. Peter Ahlbrecht, Daniel Amyot, Lynne Blair, Jan Broersen, Mehdi Dastani, Virginia Dignum, Dimitar Guelev, Benjamin Hirsch, Maik Kollmann, Alice Miller, Stephan Reiff-Marganiec, Javier Vazquez-Salceda, and Gerard Vreeswijk.

Finally, we would like to take this opportunity to thank all the persons involved in the realization of the seminar and this book: attendees, authors, reviewers, and, last but not least, the staff from Schloss Dagstuhl and Springer-Verlag.

February 2004

The Editors

Table of Contents

Objects, Agents, and Features: An Introduction	1
<i>John-Jules Ch. Meyer, Mark D. Ryan, and Hans-Dieter Ehrich</i>	
Coordinating Agents in OO	8
<i>Frank S. de Boer, Cees Pierik, Rogier M. van Eijk, and John-Jules Ch. Meyer</i>	
On Feature Orientation and on Requirements Encapsulation Using Families of Requirements	26
<i>Jan Brederke</i>	
Detecting Feature Interactions: How Many Components Do We Need?	45
<i>Muffy Calder and Alice Miller</i>	
Software Evolution through Dynamic Adaptation of Its OO Design	67
<i>Walter Cazzola, Ahmed Ghoneim, and Gunter Saake</i>	
Modelling and Analysis of Agents' Goal-Driven Behavior Using Graph Transformation	81
<i>Ralph Depke and Reiko Heckel</i>	
Giving Life to Agent Interactions	98
<i>Juliana Küster Filipe</i>	
Organising Computation through Dynamic Grouping	117
<i>Michael Fisher, Chiara Ghidini, and Benjamin Hirsch</i>	
Adding Features to Component-Based Systems	137
<i>Maritta Heisel and Jeanine Souquière</i>	
Components, Features, and Agents in the ABC	154
<i>Tiziana Margaria</i>	
Towards a Formal Specification for the AgentComponent	175
<i>Philipp Meier and Martin Wirsing</i>	
Policies: Giving Users Control over Calls	189
<i>Stephan Reiff-Marganiec</i>	
Agents and Coordination Artifacts for Feature Engineering	209
<i>Alessandro Ricci</i>	
Author Index	227
