Mobility Aware Technologies and Applications

First International Workshop, MATA 2004
Florianópolis, Brazil, October 20-22, 2004
Proceedings
Preface

It is becoming quite clear that there will be important technological advances in mobile and wireless connectivity, known as third-/fourth-generation (3G and 4G) mobile telecommunications systems. As a result we will be surrounded by ever-growing multidomain (technical and administrative) heterogeneous communications in both wired and wireless networks. This resulting environment deals with communication in multitoned networks, where people, devices, appliances and servers are connected to each other via different kinds of networks. Networks will be pervasive, ubiquitous, multiservice, multioperator and multiaccess. The mobility trend will also be spurred forward by the growing availability of mobile-enabled handheld devices.

Mobile systems are expected to provide mobile users with cost-effective, secure, yet ubiquitous service access anywhere and anytime. Users will then continue to enjoy the new-found freedom mobile access provides and will have increasingly high expectations of mobility-aware applications that should be capable of seamlessly supporting the mobile lifestyle.

The papers in this volume discuss issues from models, platforms, and architectures for mobility-aware systems to security, mobile agent technologies, sensitive communications, context awareness, mobile applications and management. They cover both practical experience and novel research ideas and concepts.

We would like to express our appreciation and thanks to the authors for their contributions to preparing and revising the papers as well as the technical program committee and the reviewers who helped put together an excellent technical program for the workshop. Special thanks are due to Hamid Harroud and Mohamed Khedr who kindly contributed their time and effort to help with the organization of the review process and the technical program.

October 2004

Ahmed Karmouch
**General Chair**
Edmundo Madeira, UNICAMP, Brazil

**Program Co-chairs**
Ahmed Karmouch, University of Ottawa, Canada
Larry Korba, National Research Council, Canada

**Tutorials Chair**
Antonio Liotta, University of Surrey, UK

**Publicity Chair**
Fabio Costa, UFG, Brazil

**Local Arrangements Co-chairs**
Joni Fraga, UFSC, Brazil
Fabio Verdi, Unicamp, Brazil

**Steering Committee**
Eric Horlait, LIP6, France
Ahmed Karmouch, University of Ottawa, Canada
Larry Korba, NRC, Canada
Thomas Magedanz, IKV++, Tec-AG, TU Berlin, Germany

**In Cooperation with**
IEEE Computer Society

# Table of Contents

## Context-Aware Support for Mobile Systems

- Mobility Prediction for Mobile Agent-Based Service Continuity in the Wireless Internet .................................................. 1
  *Paolo Bellavista, Antonio Corradi, and Carlo Giannelli*

- Development Methodology for Location-Aware Mobile Agent ............ 13
  *Kazutaka Matsuzaki, Nobukazu Yoshioka, and Shinichi Honiden*

- Distributed Shared Contexts ........................................... 27
  *Rosa Alarcón, César Collazos, and Luis A. Guerrero*

- Support for Context-Aware Collaboration ................................ 37
  *Hana K. Rubinsztejn, Markus Endler, Vagner Sacramento, Kleder Gonçalves, and Fernando Nascimento*

## Context-Aware Applications and Networks

- Building Policy-Based Context Aware Applications for Mobile Environments ... 48
  *Hamid Harroud, Mohamed Khedr, and Ahmed Karmouch*

- Contextware Research Challenges in Ambient Networks .................. 62
  *Ahmed Karmouch, Alex Galis, Raffaele Giaffreda, Theo Kanter, Annika Jonsson, Anders M. Karlsson, Roch Glitho, Mikhail Smirnov, Michael Kleis, Christoph Reichert, Alvin Tan, Mohamed Khedr, Nancy Samaan, Laamanen Heimo, May El Barachi, and John Dang*

- Awareness on Mobile Groupware Systems ................................ 78
  *Manuele Kirsch-Pinheiro, Jérôme Gensel, and Hervé Martin*

- ICoMP: A Mobile Portal Model Based on Reflective Middleware and Mobile Agents .................................................. 88
  *Marcos Vinicius Gialdi, Edmundo R.M. Madeira, Paul Grace, and Gordon Blair*

## Service and Network Management

- Configuration Management for Networked Reconfigurable Embedded Devices ... 98
  *Timothy O'Sullivan and Richard Studdert*

- A Programmable Network Enabling Content Adaptation ................. 108
  *Bertrand Mathieu, Yannick Carlinet, and Yvon Gourhant*
Agents Technology Extended with Mobile Devices ........................... 118
   Fabio Calhau, Lino Pereira, Paulo Costa, and Luís Botelho

Agent Migration as an Optional Service
in an Extendable Agent Toolkit Architecture .............................. 127
   Peter Braun, Ingo Müller, Sven Geisenhainer, Volkmar Schau,
   and Wilhelm Rossak

Grid and Agent Technologies in Mobile Environment

Remote Database Administration in Mobile Computational Environments ..... 137
   Fernando Siqueira and Angelo Brayner

MobiGrid – Framework for Mobile Agents on Computer Grid Environments .... 147
   Rodrigo M. Barbosa and Alfredo Goldman

Negotiation Process for Resource Allocation in Grid
Using a Multi-agent System ..................................................... 158
   Lilian Noronha Nassif, Mohamed Ahmed, José Marcos Nogueira,
   and Roger Impey

Mobile Agent Oriented Software Engineering (MAOSE) .................... 168
   Li Wang and Qiao Guo

Sensor Technologies

A Probabilistic Transmission Control Scheme for Low Power Consumption
in Sensor Networks ................................................................. 178
   Jungpil Ryu, Minsu Kim, Sungho Hwang, Byeongjik Lee, and Kijun Han

Designing a Self-organizing Wireless Sensor Network ...................... 186
   Fabrício A. Silva, Linnyer Beatrys Ruiz, Thais Regina M. Braga,
   José Marcos Nogueira, and Antonio A.F. Loureiro

Invited Paper

Ambient Networks Management Challenges and Approaches ............... 196
   Marcus Brunner, Alex Galis, Lawrence Cheng, Jorge Andrés Colás,
   Bengt Ahlgren, Anders Gunnar, Henrik Abrahamsson, Robert Szabo,
   Simon Csaba, Johan Nielsen, Alberto Gonzalez Prieto, Rolf Stadler,
   and Gergely Molnar

Security Issues

Scalability, Security Technologies and Mobile Applications .......... 217
   Larry Korba and Ronggong Song

Detecting and Proving Manipulation Attacks in Mobile Agent Systems .... 224
   Oscar Esparza, Miguel Soriano, Jose L. Muñoz, and Jordi Forné
