Preface

This volume comprises the final versions of the technical papers presented at the UML 2004 conference held in Lisbon (Portugal), October 11–15, 2004.

UML 2004 was the seventh conference in a series of annual UML conferences. The series started in 1998 and was located at Mulhouse (France); the following years saw the conference move to Fort Collins (USA) in 1999, York (UK) in 2000, Toronto (Canada) in 2001, Dresden (Germany) in 2002, San Francisco (USA) in 2003, and now Lisbon (Portugal) in 2004. During this time, the UML conference became one of the leading conferences in the area of object-oriented modeling. While in the first years the focus of the conference was on the scientific investigation of the Unified Modeling Language (UML), which had just been adopted by the Object Management Group (OMG) at the time, the focus has changed in recent years to innovations in techniques such as metamodeling, model transformations, model validation and verification, aspect orientation, and beyond. Many recent research activities have been especially stimulated by the Model Driven Architecture (MDA) initiative, started in 2000 by the OMG. The goal of MDA is the definition of a framework to enable the development of software purely based on models. In order to reflect the changes of recent years, the conference series UML will be continued, from 2005 onwards, under the name MODELS (MOdel Driven Engineering, Languages and Systems).

The call for papers for UML 2004 encouraged authors around the world to submit 157 abstracts and 135 technical papers. Each submission was reviewed by at least three referees, in most cases by four. Based on the reviews, the whole program committee discussed in four rounds the submissions’ quality, leading to the selection of 30 submissions (26 research papers, 4 experience reports) for publication. In addition, the program committee selected one paper for the Best Paper Award UML 2004. After a detailed discussion of selected candidates the committee came to the conclusion that the paper by Alexandre Correa, Cláudia Werner (Brazil), “Applying Refactoring Techniques to UML/OCL Models”, deserved the award. Congratulations to the authors!

For managing the review process, the free version of Cyberchair (http://www.cyberchair.org) was used. We are grateful to its author Richard van de Stadt who also helped with advice. We also want to take the opportunity to express our greatest gratitude to Arnaud di Clemente whose work on the technical side was invaluable for managing the review process and preparing the conference proceedings.

Besides the presentation of technical papers in 10 sessions, the scientific program of UML 2004 included 3 keynote talks, “Generative Software Development”, given by Krzysztof Czarnecki (University of Waterloo), “Goals, Viewpoints, and Components — an MDA Perspective”, given by Desmond D’Souza (Kinetium), and “Putting Change at the Center of the Software Process”, given
by Oscar Nierstrasz (University of Bern), 12 workshops, including a doctoral symposium, 6 tutorials, and a special track with industry papers. In addition to this proceedings, a postconference book entitled "UML 2004 Satellite Activities" was published by Springer as LNCS volume 3297. This book includes the papers of the industry track, summaries of the workshops, tool papers and poster papers.

We are glad to express our gratitude to all persons and organizations who were involved in the organization of the conference: to the sponsors and supporters for the financial, organizational, and moral aid, to the reviewers for their dedication in writing reports and contributing to the discussion, and to the members of the local organization committee for their incredible work in coordinating all activities and making the local arrangements.

July 2004

Thomas Baar
Alfred Strohmeier
Ana Moreira
Stephen J. Mellor
Organization

Executive Committee

General Chair  Stephen J. Mellor (Mentor Graphics, USA)
Conference Chair  Ana Moreira (New University of Lisbon, Portugal)
Program Co-chairs  Thomas Baar (EPFL, Switzerland)
                  Alfred Strohmeier (EPFL, Switzerland)
Industry Track Chair  Bran Selic (IBM Rational Software, Canada)
Tutorial Chair  Ezra K. Mugisa (University of the West Indies at Mona, Jamaica)
Workshop Chair  Ambrosio Toval (University of Murcia, Spain)
Panel Chair  Jon Whittle (NASA Ames Research Center, USA)
Poster Chair  Nuno Jardim Nunes (University of Madeira, Portugal)

Organizing Team

Publicity Chairs  João Araújo (New University of Lisbon, Portugal)
                  Geri Georg (Colorado State University, USA)
Local Arrangements Chair  Isabel Sofia Brito (Politécnico de Beja, Portugal)
Tools Exhibition Chair  Alberto Silva (Technical University of Lisbon, Portugal)
Local Sponsors Chair  Fernando Brito e Abreu (New University of Lisbon, Portugal)
Web Chair  Miguel Goulão (New University of Lisbon, Portugal)

Program Committee

Mehmet Aksit (The Netherlands)  John Daniels (UK)
Omar Aldawud (USA)  Stéphane Ducasse (Switzerland)
Colin Atkinson (Germany)  Gregor Engels (Germany)
Doo-Hwan Bae (Korea)  Andy Evans (UK)
Jean Bézivin (France)  Robert France (USA)
Marko Boger (Germany)  Sébastien Gérard (France)
Ruth Breu (Austria)  Martin Gogolla (Germany)
Jean-Michel Bruel (France)  Jeff Gray (USA)
David Bustard (UK)  Constance Heitmeyer (USA)
Alessandra Cavarra (UK)  Brian Henderson-Sellers (Australia)
Betty Cheng (USA)  Heinrich Hussmann (Germany)
Siobhán Clarke (Ireland)  Pankaj Jalote (India)
VIII Organization

## Metamodelling

Empirically Driven Use Case Metamodel Evolution ........................... 1

A. Durán, B. Bernárdez, M. Genero, M. Piattini

Applying OO Metrics to Assess UML Meta-models ......................... 12

H. Ma, W. Shao, L. Zhang, Z. Ma, Y. Jiang

An OCL Formulation of UML2 Template Binding ........................... 27

O. Caron, B. Carré, A. Muller, G. Vanwormhoudt

A Metamodel for Generating Performance Models from UML Designs ... 41

D.B. Petriu, M. Woodside

On the Classification of UML’s Meta Model Extension Mechanism ...... 54

Y. Jiang, W. Shao, L. Zhang, Z. Ma, X. Meng, H. Ma

Modeling Business Processes in Web Applications with ArgoUWE ...... 69

A. Knapp, N. Koch, G. Zhang, H.-M. Hassler

## Aspects

Model Composition Directives ................................................. 84

G. Straw, G. Georg, E. Song, S. Ghosh, R. France, J.M. Bieman

Query Models ............................................................................ 98

D. Stein, S. Hanenberg, R. Unland

Specifying Cross-Cutting Requirement Concerns ......................... 113

G. Georg, R. Reddy, R. France

## Profiles and Extensions

A UML Profile to Model Mobile Systems ................................. 128

V. Grassi, R. Mirandola, A. Sabetta

Experimental Evaluation of the UML Profile for Schedulability,
Performance, and Time ......................................................... 143

A.J. Bennett, A.J. Field, C.M. Woodside

A UML Profile for Executable and Incremental Specification-Level
Modeling ................................................................. 158

R. Pitkänen, P. Selonen
OCL

Applying Refactoring Techniques to UML/OCL Models .................. 173
A. Correa, C. Werner

Detecting OCL Traps in the UML 2.0 Superstructure: An Experience
Report ................................................................. 188
H. Bauerdick, M. Gogolla, F. Gutsche

From Informal to Formal Specifications in UML ....................... 197
M. Giese, R. Heldal

Building Precise UML Constructs to Model Concurrency Using OCL .... 212
A. Goñi, Y. Eterovic

An ASM Definition of the Dynamic OCL 2.0 Semantics ................ 226
S. Flake, W. Mueller

Towards a Framework for Mapping Between UML/OCL and
XML/XQuery ....................................................... 241
A. Gaafar, S. Sakr

Model Transformation

Model-Driven Architecture for Automatic-Control: An Experience
Report ................................................................. 260
P.-A. Muller, D. Bresch, P. Studer

Model-Driven Development for Non-functional Properties: Refinement
Through Model Transformation ....................................... 275
S. Röttger, S. Zschaler

Generic and Meta-transformations for Model Transformation
Engineering .......................................................... 290
D. Varró, A. Pataricza

Verification and Model Consistency

Supporting Model Refactorings Through Behaviour Inheritance
Consistencies ........................................................ 305
R. Van Der Straeten, V. Jonckers, T. Mens

Determining the Structural Events That May Violate an Integrity
Constraint ........................................................... 320
J. Cabot, E. Teniente

Deductive Verification of UML Models in TLPVS ...................... 335
T. Arons, J. Hooman, H. Kugler, A. Pnueli, M. van der Zwaag
# Table of Contents

**Security**

Integrating a Security Requirement Language with UML ............... 350  
*H. Abie, D.B. Aredo, T. Kristoffersen, S. Mazaher, T. Raguin*

Automated Verification of UMLsec Models for Security Requirements..... 365  
*J. Jürjens, P. Shabalin*

Extending OCL for Secure Database Development ..................... 380  
*E. Fernández-Medina, M. Piattini*

**Methodology**

Test Driven Development of UML Models with SMART Modeling System ........................................................................ 395  
*S. Hayashi, P. YiBing, M. Sato, K. Mori, S. Sejeon, S. Haruna*

Behavioral Domain Analysis — The Application-Based Domain Modeling Approach .......................................................... 410  
*I. Reinhartz-Berger, A. Sturm*

Using UML-based Feature Models and UML Collaboration Diagrams to Information Modelling for Web-Based Applications ............. 425  
*P. Dolog, W. Nejdl*

**Workshops and Tutorials**

Workshops at the UML 2004 Conference ................................. 440  
*A. Toval*

Tutorials at the UML 2004 Conference ..................................... 449  
*E.K. Mugisa*
