Preface

Welcome to the proceedings of GCC 2004 and the city of Wuhan. Grid computing has become a mainstream research area in computer science and the GCC conference has become one of the premier forums for presentation of new and exciting research in all aspects of grid and cooperative computing. The program committee is pleased to present the proceedings of the 3rd International Conference on Grid and Cooperative Computing (GCC 2004), which comprises a collection of excellent technical papers, posters, workshops, and keynote speeches. The papers accepted cover a wide range of exciting topics, including resource grid and service grid, information grid and knowledge grid, grid monitoring, management and organization tools, grid portal, grid service, Web services and their QoS, service orchestration, grid middleware and toolkits, software glue technologies, grid security, innovative grid applications, advanced resource reservation and scheduling, performance evaluation and modeling, computer-supported cooperative work, P2P computing, automatic computing, and meta-information management.

The conference continues to grow and this year a record total of 581 manuscripts (including workshop submissions) were submitted for consideration. Expecting this growth, the size of the program committee was increased from 50 members for GCC 2003 for 70 in GCC 2004. Relevant differences from previous editions of the conference: it is worth mentioning a significant increase in the number of papers submitted by authors from outside China; and the acceptance rate was much lower than for previous GCC conferences. From the 427 papers submitted to the main conference, the program committee selected only 96 regular papers for oral presentation and 62 short papers for poster presentation in the program. Five workshops, International Workshop on Agents, and Autonomic Computing, and Grid Enabled Virtual Organizations, International Workshop on Storage Grids and Technologies, International Workshop on Information Security and Survivability for Grid, International Workshop on Visualization and Visual Steering, International Workshop on Information Grid and Knowledge Grid, complemented the outstanding paper sessions.

The submission and review process worked as follows. Each submission was assigned to three program committee members for review. Each program committee member prepared a single review for each assigned paper or assigned a paper to an outside reviewer for review. Given the large number of submissions, each program committee member was assigned roughly 15–20 papers. The program committee members consulted 65 members of the grid computing community in preparing the reviews. Based on the review scores, the program chairs made the final decision. Given the large number of submissions, the selection of papers required a great deal of work on the part of the committee members.

Putting together a conference requires the time and effort of many people. First, we would like to thank all the authors for their hard work in preparing submissions to the conference. We deeply appreciate the effort and contributions of the program committee members who worked very hard to select the very best submissions and to put together an exciting program. We are also very grateful for the numerous suggestions

we received from them. Also, we especially thank the effort of those program committee members who delivered their reviews in a timely manner despite having to face very difficult personal situations. The effort of the external reviewers is also deeply appreciated. We are also very grateful to Ian Foster, Jack Dongarra, Charlie Catlett, and Tony Hey for accepting our invitation to present a keynote speech, and to Depei Qian for organizing an excellent panel on a very exciting and important topic. Thanks go to the workshop chairs for organizing five excellent workshops on several important topics in grid computing. We would also like to thank Pingpeng Yuan for installing and maintaining the submission website and working tirelessly to overcome the limitations of the tool we used.

We deeply appreciate the tremendous efforts of all the members of the organizing committee. We would like to thank the general co-chairs, Prof. Andrew A. Chien and Prof. Xicheng Lu for their advice and continued support. Finally, we would like to thank the GCC steering committee for the opportunity to serve as the program chairs as well as their guidance through the process. We hope that the attendees enjoyed this conference and found the technical program to be exciting.

Hai Jin and Yi Pan

Conference Committees

Steering Committee

Guojie Li (Institute of Computing Technology, CAS, China)

Xiaodong Zhang (National Science Foundation, USA)

Zhiwei Xu (Institute of Computing Technology, CAS, China)

Xianhe Sun (Illinois Institute of Technology, USA)

Jun Ni (University of Iowa, USA)

Hai Jin (Huazhong University of Science and Technology, China)

Minglu Li (Shanghai Jiao Tong University, China)

Conference Co-chairs

Andrew A. Chien (University of California at San Diego, USA)

Xicheng Lu (National University of Defense Technology, China)

Program Co-chairs

Yi Pan (Georgia State University, USA)

Hai Jin (Huazhong University of Science and Technology, China)

Workshop Chair

Nong Xiao (National University of Defense Technology, China)

Panel Chair

Depei Qian (Xi'an Jiaotong University, China)

Publicity Chair

Minglu Li (Shanghai Jiao Tong University, China)

Tutorial Chair

Dan Meng (Institute of Computing Technology, CAS, China)

Poster Chair

Song Wu (Huazhong University of Science and Technology, China)

Program Committee Members

Table of Contents

Workshop 1: International Workshop on Information Grid and Knowledge Grid (IGKG'2004)

ART Based Predictive Caching System for XML P2P Database	3
<i>Wan-Song Zhang and Da-Xin Liu</i>	
DART-FAS: Federated Access Service on Database Grid	11
<i>Guozhou Zheng, Zhaohui Wu, and Chang Huang</i>	
A Scalable Information Grid Architecture Based on P2P and Web Service Technologies	19
<i>Dugki Min and Eunmi Choi</i>	
Research on Service-Oriented Software Framework	27
<i>Ying Li, Zhaohui Wu, and Shuiguang Deng</i>	
An Accounting and QoS Model for Grid Computing	36
<i>Yang Guangwen, Yongwei Wu, Dazheng Huang, and Weimin Zheng</i>	
Reputation-Aware Contract-Supervised Grid Computing	44
<i>Xiangli Qu, Nong Xiao, Guang Xiang, and Xue-Jun Yang</i>	
The Analysis of Efficient Monitoring Grid Traffic with Flow Conservation Equation	52
<i>Xianghui Liu, Jianping Yin, Xicheng Lu, Zhiping Cai, and Jianmin Zhao</i>	
Dynamic Semantic Clustering Approach for Web User Interest	59
<i>Jiu Jun Chen, Ji Gao, Bei Shui Liao, and Jun Hu</i>	
Building Interoperable Software Components Repository Based on MMF	67
<i>Bing Li, Keqing He, Jin Liu, Qiang Wang, Peng Liang, and Rong Peng</i>	
An Approach for Constructing Software Component Repository in Grid Environments	75
<i>Dehui Du, Shi Ying, Keqing He, and Yangfan He</i>	
Agent-Based Modeling for Virtual Organizations in Grid	83
<i>Yuqing Zhai, Yuzhong Qu, and Zhiqiang Gao</i>	
A Pattern-Based Approach to Facilitating Service Composition	90
<i>Haitao Hu, Yanbo Han, Kui Huang, Gang Li, and Zhuofeng Zhao</i>	

Automatic Service Matching and Service Discovery Based on Ontology	99
<i>Chuan Lin, Zhaohui Wu, Shuiguang Deng, and Li Kuang</i>	
An Algorithm for Calculating Process Similarity to Cluster Open-Source Process Designs	107
<i>Kui Huang, Zhaotao Zhou, Yanbo Han, Gang Li, and Jing Wang</i>	
A Study on Semantic Web-Based Credit Evaluation Service	115
<i>Jing Fan, Bo Ren, and Jia-Mei Cai</i>	
Research on System Architecture and Service Composition of Spatial Information Grid	123
<i>Yu Tang and Ning Jing</i>	
Open Language Approach for Dynamic Service Evolution	132
<i>Thomas Weishäupl and Erich Schikuta</i>	
Adaptive Grid Workflow Scheduling Algorithm	140
<i>Shaohua Zhang, Yujin Wu, and Ning Gu</i>	
Building a Courseware Grid upon Dart Database Grid	148
<i>Meiyu Fang, Zhaohui Wu, Huajun Chen, Yuxin Mao, Guozhou Zheng, Zhao Xu, and Xiaojun Wu</i>	
A Novel Agent-Based Load Balancing Algorithm for Grid Computing	156
<i>Shudong Chen, Wenju Zhang, Fanyuan Ma, Jianhua Shen, and Minglu Li</i>	
Virtual Battlefield Attack-Defense Countermeasure Simulation on the Grid	164
<i>Jianhua Yang, Zhaohui Wu, Siliang Tang, and Xiaosheng Guo</i>	
Virtual Semantic Resource Routing Algorithm for Multimedia Information Grid	173
<i>Haiyang Zhang and Huadong Ma</i>	
Digital Library Application Grid – An Opportunity to Open Cultural Infrastructure	181
<i>Zhongzhi Luan, Depei Qian, Xiaoshe Dong, Xingjun Zhang, and Yunchun Li</i>	
Workshop 2: International Workshop on Storage Grid and Technologies (SGT'2004)	
A JDO Storage Cluster Based on Object Devices	187
<i>Youhui Zhang, Dongsheng Wang, Chongnan Gao, and Weimin Zheng</i>	
iNASC: A iSCSI-Based NAS Storage Cluster	195
<i>Dezhi Han, Changsheng Xie, and Faling Yi</i>	

Design and Implementation of a Non-volatile RAM Disk in the SAN Environment	203
<i>Ji-wu Shu, Bing Yu, and Rui Yan</i>	
Engineering Web Storage Servers Using Session Management	213
<i>Min Qu, Yafei Dai, and Yang Zhao</i>	
Topology and Resource Discovery in Peer-to-Peer Overlay Networks	221
<i>Dongsheng Li, Nong Xiao, and Xicheng Lu</i>	
An Implementation of Semi-synchronous Remote Mirroring System for SANs	229
<i>Rui Yan, Ji-wu Shu, and Dong-chan Wen</i>	
A Security Scheme for United Storage Network	238
<i>Yihui Luo, Changsheng Xie, and Chengfeng Zhang</i>	
STS: A Share Taper System for Storage Area Networks	246
<i>Jiefeng Xu and Zheng Qin</i>	
Storage Virtualization System with Load Balancing for SAN	254
<i>Weitao Sun, Ji-wu Shu, and Weimin Zheng</i>	
Design and Optimization of an iSCSI System	262
<i>Bigang Li, Ji-wu Shu, and Weimin Zheng</i>	
Measurement and Modeling of Large-Scale Peer-to-Peer Storage System	270
<i>Gang Liu, Mingzeng Hu, Binxing Fang, and Hongli Zhang</i>	
A Virtual Tape System Based on Storage Area Networks	278
<i>Fei Mu, Ji-wu Shu, Bigang Li, and Weimin Zheng</i>	
Cocktail Search in Unstructured P2P Networks	286
<i>Xiuguo Bao, Binxing Fang, and Mingzeng Hu</i>	
Data I/O Optimization in Storage Systems	294
<i>Di Wang, Ji-wu Shu, and Meiming Shen</i>	
Data Resource Discovery in a Computational Grid	303
<i>Sajindra Jayasena, Chin-Peng Yee, Jie Song, Abele Stoelwinder, Chong Wee See, and Wai-Hong Wong</i>	
The Design and Implementation of a Locking Mechanism for a Distributed Com- puting Environment	311
<i>Jaechun No, Hyo Kim, and Jang-sun Lee</i>	
Replica Location Mechanism Based on DHT and the Small-World Theory	319
<i>Xindong You, Guiran Chang, Wei Yang, Wandan Zeng, and Xueyao Chen</i>	

Workshop 3: International Workshop on Information Security and Survivability for Grid (GISS'2004)

A New Chameleon Multi-signature Based on Bilinear Pairing 329
Chunbo Ma and Dake He

A Topology-Adapted Network Defense Model Based on Mobile Agent 335
Yichuan Jiang, Yiping Zhong, and Shiyong Zhang

AT-RBAC: An Authentication Trustworthiness-Based RBAC Model 343
Lunwei Wang, Lifeng Wei, Xiangke Liao, and Huaimin Wang

WBEM Based Distributed Network Monitoring 351
Bo Liu and Hui Liu

Multiparty Joint Authentication: Extending the Semantics of Single Sign-On for Grids 358
Hui Liu and Minglu Li

A Software Engineering Perspective for Services Security 366
Jun Han

Algorithms for Congestion Detection and Control 374
Wu Liu, Hai-Xin Duan, Jian-Ping Wu, Xing Li, and Ping Ren

Modeling Time-Related Trust 382
Chenlin Huang, Hua-Ping Hu, and Zhiying Wang

Defending DDoS Attacks Using Network Traffic Analysis and Probabilistic Packet Drop 390
Jungtaek Seo, Cheolho Lee, and Jongsub Moon

Building a Secure Infrastructure for P2P Applications in Mobile Ad Hoc Networks 398
Guangming Hu, Zunguo Huang, Hua-Ping Hu, and Zhenghu Gong

Middleware Framework for Secure Grid Application in Mobile Web Services Environment 406
Namje Park, Kiyoung Moon, Jongsu Jang, and Sungwon Sohn

Autonomic Computing for Defense-in-Depth Information Assurance: Architecture and a Case Study 414
Xin Xu, Zunguo Huang, and Lei Xuan

Mining Maximal Frequent Itemsets for Intrusion Detection 422
Hui Wang, Qing-Hua Li, Huanyu Xiong, and Sheng-Yi Jiang

Context-Aware Role-Based Access Control Model for Web Services	430
