Preface

We present in this volume the collection of finally accepted papers of the eighth edition of the “IWANN” conference (“International Work-Conference on Artificial Neural Networks”). This biennial meeting focuses on the foundations, theory, models and applications of systems inspired by nature (neural networks, fuzzy logic and evolutionary systems).

Since the first edition of IWANN in Granada (LNCS 540, 1991), the Artificial Neural Network (ANN) community, and the domain itself, have matured and evolved. Under the ANN banner we find a very heterogeneous scenario with a main interest and objective: to better understand nature and beings for the correct elaboration of theories, models and new algorithms. For scientists, engineers and professionals working in the area, this is a very good way to get solid and competitive applications.

We are facing a real revolution with the emergence of embedded intelligence in many artificial systems (systems covering diverse fields: industry, domotics, leisure, healthcare, …). So we are convinced that an enormous amount of work must be, and should be, still done. Many pieces of the puzzle must be built and placed into their proper positions, offering us new and solid theories and models (necessary tools) for the application and praxis of these current paradigms.

The above-mentioned concepts were the main reason for the subtitle of the IWANN 2005 edition: “Computational Intelligence and Bioinspired Systems.” The call for papers was launched several months ago, addressing the following topics:

1. **Mathematical and theoretical methods in computational intelligence.** Complex and social systems; evolutionary and genetic algorithms; fuzzy logic; mathematics for neural networks; RBF structures; self-organizing networks and methods; support vector machines.

2. **Neurocomputational formulations.** Single-neuron modeling; perceptual modeling; system-level neural modeling; spiking neurons; models of biological learning.

3. **Learning and adaptation.** Adaptive systems; imitation learning; reconfigurable systems; supervised, non-supervised, reinforcement and statistical algorithms.

4. **Emulation of cognitive functions.** Decision making; multi-agent systems; multi-sensory integration; natural languages; pattern recognition; perceptual and motor functions (visual, auditory, tactile, etc.); robotics; planning motor control.

5. **Bioinspired systems and neuroengineering.** Embedded neural networks and fuzzy systems; evolvable computing; evolving hardware; microelectronics for neural, fuzzy and bioinspired systems; neural prostheses; retinomorphic systems.

6. **Applications.** Biomimetic applications; data analysis and preprocessing; data mining; economics and financial engineering; fuzzy systems for control; the internet; neural networks for control; power systems; signal processing; telecommunication applications; time series and prediction.
After a careful review process of the more than 240 submissions, 150 papers were accepted for publication including the contribution of three invited speakers. In this edition a special emphasis was put on the organization of special sessions. A total of 10 sessions containing 46 papers were accepted for presentation, covering specific aspects like the modelling of neurons, design of neural topologies, applications, etc. This review and selection process was done with the help and cooperation of the members of our International Program Committee.

The organization of this book does not follow the scheme and the order of the main mentioned topics, but is organized in a rational way according to the contents of the accepted papers, going from the more abstract concepts to the concrete and applicable questions and considerations. The result is a 20-chapter volume with the following main parts:

1. Mathematical and Theoretical Methods
2. Evolutionary Computation
3. Neurocomputation-Inspired Models
4. Learning and Adaptation
5. Radial Basis Function Structures
6. Self-organizing Networks and Methods
7. Support Vector Machines
8. Cellular Neural Networks
9. Hybrid Systems
10. Neuroengineering and Hardware Implementations
11. Pattern Recognition
12. Perception and Robotics
13. Applications on Data analysis and Preprocessing
14. Applications on Data Mining
15. Applications on Signal Processing
16. Applications on Image Processing
17. Applications on Forecasting
18. Applications on Independent Component Analysis and Blind Source Separation
19. Applications on Power Systems
20. Other Applications

IWANN 2005 was organized by the Universitat Politècnica de Catalunya, UPC, with the strong cooperation of the Universidad de Granada and the Universidad de Málaga. Sponsorship was obtained from the organizing university, UPC, the Spanish Ministerio de Educación y Ciencia, the AGAUR agency of the Generalitat de Catalunya, and the City Council of Vilanova i la Geltrú.

We would like to express our gratitude to the members of the IWANN Organizing Committee, and to all the people who participated in the event (delegates, invited speakers, special session organizers). The editors would like to address a special mention to the people who helped in the review process as special or additional reviewers.
Finally, we would like to thank Springer, and especially Alfred Hofmann and Anna Kramer, for their continuous support and cooperative work from the very beginning of the IWANN conferences.

June 2005

Joan Cabestany, Universitat Politècnica de Catalunya
Alberto Prieto, Universidad de Granada
Francisco Sandoval, Universidad de Málaga
IWANN 2005 Chairs and Committees

Organizing Committee

Conference Chairs
Joan Cabestany (Univ. Politécnica de Cataluña)
Alberto Prieto (Univ. de Granada)
Francisco Sandoval (Univ. de Málaga)

Technical Program Chairs
Gonzalo Joya (Univ. de Málaga)
Francisco García Lagos (Univ. de Málaga)
Miguel Atencia (Univ. de Málaga)

Publicity and Publication Chairs
Pedro Castillo (Univ. de Granada)
Alberto Guillén (Univ. de Granada)
Francisco Illeras (Univ. de Granada)
Beatriz Prieto (Univ. de Granada)

Registration and Local Arrangements Chairs
Andreu Catalá (Univ. Politécnica de Cataluña)
Cecilio Angulo (Univ. Politécnica de Cataluña)
Xavier Parra (Univ. Politécnica de Cataluña)

Special Sessions Chairs
Christian Jutten (INPG-LIS Grenoble)
Richard Duro (Univ. La Coruña)

Program Committee

Igor Aleksander, Imperial College London, UK
Andreas Andreu, Johns Hopkins University, USA
Antonio Bahamonde, Univ. Oviedo, Gijón, Spain
Sergi Bermejo, Univ. Politécnica de Catalunya, Spain
Gert Cauwenberghs, Johns Hopkins University, USA
Jesus Cid-Sueiro, Univ. Carlos III, Madrid, Spain
Carlos Cotta, Univ. Málaga, Spain
Marie Cottrell, Univ. Paris 1, France
Luiza de Macedo Mourelle, State University of Rio de Janeiro, Brazil
José Dorronsoro, Univ. Autónoma de Madrid, Spain
Richard Duro, Univ. Coruña, Spain
X Organization

Reinhard Eckhorn, Philipps-Universität Marburg, Germany
José Manuel Fernández, Univ. Politécnica de Cartagena, Spain
Kunihiro Fukushima, Osaka Univ., Japan
Dario Floreano, Swiss NSF, EPFL, Switzerland
Patrik Garda, Orsay, France
Karl Goser, Univ. Dortmund, Germany
Manuel Graña, Univ. País Vasco, Spain
Anne Guérin-Dugué, CLIPS, IMAG, Grenoble, France
Alister Hamilton, Univ. Edinburgh, UK
Jeanny Hérault, INP Grenoble, France
Francisco Herrera, Univ. Granada, Spain
Giacomo Indiveri, Institute of Neuroinformatics ETH/UNIZ, Zurich, Switzerland
Pedro Isasi, Univ. Carlos III, Spain
Christian Jutten, INP Grenoble, France
Heinrich Klar, Mikroelektronik, TU Berlin, Germany
Jordi Madrenas, Univ. Politécnica de Catalunya, Spain
Dario Maravall, Univ. P. Madrid, Spain
Bonifacio Martín del Brio, Univ. Zaragoza, Spain
Francesco Masulli, Univ. La Spezia, Genoa, Italy
Juan M. Moreno Aróstegui, Univ. P. de Catalunya, Spain
Alan F. Murray, Edinburgh University, UK
Nadia Nedjah, State University of Rio de Janeiro, Brazil
Julio Ortega, Univ. Granada, Spain
Francisco J. Pelayo, Univ. Granada, Spain
Andrés Perez-Uribe, Univ. of Applied Science of Western Switzerland, Switzerland
Vicenzo Piuiri, University of Milan, Italy
Angel P. del Pobil, Univ. Jaume I. de Castellón, Spain
Carlos G. Puntonet, Univ. Granada, Spain
Leonardo Reyneri, Politecnico di Torino, Italy
Luigi M. Ricciardi, Univ. di Napoli Federico II, Italy
Ulrich Rückert, Heinz Nixdorf Institute, Univ. of Paderborn, Germany
Ignacio Rojas, Univ. Granada, Spain
Eduardo Ros, Univ. Granada, Spain
Javier Ruiz-del-Solar, Universidad de Chile, Chile
Eduardo Sanchez, LSI, EPFL, Switzerland
Juan V. Sanchez-Andrés, Univ. de La Laguna, Spain
Juan A. Siguénza, Univ. Autónoma de Madrid, Spain
Jordi Solé-Casals, Univ. de Vic, Spain
Peter Szolgay, Hungarian Academy of Sciences, Hungary
Carme Torras, IRI (CSIC-UPC), Barcelona, Spain
Marley Vellasco, Pontif. Univ. Católica Rio de Janeiro, Brazil
Michel Verleysen, Univ. Cath. de Louvain-la-Neuve, Belgium
Changjiu Zhou, Singapore Polytechnic, Singapore
Barbara Hammer, Univ. of Osnabrück, Germany
Peter Tino, Univ. of Birmingham, UK

Table of Contents

Mathematical and Theoretical Methods

Role of Function Complexity and Network Size in the Generalization Ability of Feedforward Networks
Leonardo Franco, José M. Jerez, José M. Bravo .................................................. 1

Analysis of the Sanger Hebbian Neural Network
J. Andrés Berzal, Pedro J. Zufiría ................................................................. 9

Considering Multidimensional Information Through Vector Neural Networks
J.L. Crespo, R.J. Duro ............................................................................. 17

Combining Ant Colony Optimization with Dynamic Programming for Solving the $k$-Cardinality Tree Problem
Christian Blum, Maria Blesa ................................................................. 25

Evolutionary Computation

A Basic Approach to Reduce the Complexity of a Self-generated Fuzzy Rule-Table for Function Approximation by Use of Symbolic Interpolation
G. Rubio, H. Pomares ............................................................................. 34

Average Time Complexity of Estimation of Distribution Algorithms
C. González, A. Ramírez, J.A. Lozano, P. Larrañaga .................................. 42

A Comparison of Evolutionary Approaches to the Shortest Common Supersequence Problem
Carlos Cotta............................................................................................. 50

Simultaneous Evolution of Neural Network Topologies and Weights for Classification and Regression
Miguel Rocha, Paulo Cortez, José Neves .................................................. 59

Applying Bio-inspired Techniques to the $p$-Median Problem
E. Domínguez, J. Muñoz ............................................................................. 67

Optimal Strategy for Resource Allocation of Two-Dimensional Potts Model Using Genetic Algorithm
Wing Keung Cheung, Kwok Yip Szeto ...................................................... 75

Memetic Algorithms to Product-Unit Neural Networks for Regression
Francisco Martínez-Estudillo, César Hervás-Martínez, Alfonso Martínez-Estudillo, Domingo Ortíz-Boyer .................................................. 83
Lamarckian Clonal Selection Algorithm Based Function Optimization  
*Wuhong He, Haifeng Du, Licheng Jiao, Jing Li* ............................................. 91

**Neurocomputational Inspired Models**

Artificial Neural Networks Based on Brain Circuits Behaviour and Genetic Algorithms  
*Ana Porto, Alejandro Pazos, Alfonso Araque* ................................................... 99

Modeling Synaptic Transmission and Quantifying Information Transfer in the Granular Layer of the Cerebellum  
*Egidio D’Angelo, Thierry Nieus, Michele Bezzi, Angelo Arleo, Olivier J.-M.D. Coenen* ................................................................. 107

The After-Hyperpolarization Amplitude and the Rise Time Constant of IPSC Affect the Synchronization Properties of Networks of Inhibitory Interneurons  
*Angelo Di Garbo, Alessandro Panarese, Michele Barbi, Santi Chillemi* ...... 115

TiViPE Simulation of a Cortical Crossing Cell Model  
*Tino Lourens, Emilia Barakova* ........................................................................ 122

A Model of Spiking-Bursting Neuronal Behavior Using a Piecewise Linear Two-Dimensional Map  
*Carlos Aguirre, Doris Campos, Pedro Pascual, Eduardo Serrano* ............ 130

Real-Time Spiking Neural Network: An Adaptive Cerebellar Model  
*Christian Boucheny, Richard Carrillo, Eduardo Ros, Olivier J.-M.D. Coenen* ................................................................. 136

Modeling Neural Processes in Lindenmayer Systems  
*Carlos Martín-Vide, Tseren-Onolt Ishdorj* ...................................................... 145

Modeling Stimulus Equivalence with Multi Layered Neural Networks  
*Hiroyuki Okada, Masamichi Sakagami, Hiroshi Yamakawa* .................... 153

Instability of Attractors in Auto-associative Networks with Bio-inspired Fast Synaptic Noise  
*Joaquín J. Torres, Jesús M. Cortés, Joaquín Marro* ..................................... 161

Lookup Table Powered Neural Event-Driven Simulator  
*Richard R. Carrillo, Eduardo Ros, Eva M. Ortigosa, Boris Barbour, Rodrigo Agís* ................................................................. 168

**Learning and Adaptation**

Joint Kernel Maps  
*Jason Weston, Bernhard Schölkopf, Olivier Bousquet* ................................. 176
Statistical Ensemble Method (SEM): A New Meta-machine Learning Approach Based on Statistical Techniques
Andrés Yáñez Escolano, Pedro Galindo Riaño, Joaquín Pizarro Junquera, Elisa Guerrero Vázquez ................................................................. 192

Neural Network Modeling by Subsampling
Michele La Rocca, Cira Perna .............................................................. 200

Balanced Boosting with Parallel Perceptrons
Iván Cantador, José R. Dorronsoro ......................................................... 208

A Reinforcement Learning Algorithm Using Temporal Difference Error in Ant Model
SeungGwan Lee, TaeChoong Chung ........................................................ 217

Selection of Weights for Sequential Feed-Forward Neural Networks: An Experimental Study
Enrique Romero .................................................................................. 225

Exploiting Multitask Learning Schemes Using Private Subnetworks
Pedro J. García-Laencina, Aníbal R. Figueiras-Vidal, Jesús Serrano-García, José-Luis Sancho-Gómez ......................................................... 233

Co-evolutionary Learning of Liquid Architectures
Igal Raichelgauz, Karina Odinaev, Yehoshua Y. Zeevi ............................... 241

Extended Sparse Nonnegative Matrix Factorization
Kurt Stadlthanner, Fabian J. Theis, Carlos G. Puntonet, Elmar W. Lang ... 249

Radial Basic Functions Structures

Using a Mahalanobis-Like Distance to Train Radial Basis Neural Networks
J.M. Valls, R. Aler, O. Fernández .......................................................... 257

Robustness of Radial Basis Functions
Ralf Eickhoff, Ulrich Rückert ............................................................... 264

Improving Clustering Technique for Functional Approximation Problem Using Fuzzy Logic: ICFA Algorithm

Input Variable Selection in Hierarchical RBF Networks
Mohammed Awad, Héctor Pomares, Ignacio Rojas, Luis J. Herrera, Alberto Prieto ................................................................. 280
Approximating I/O Data Using Radial Basis Functions: A New Clustering-Based Approach  
Mohammed Awad, Héctor Pomares, Luis Javier Herrera, Jesús González, Alberto Guillén, Fernando Rojas  
289

Application of ANOVA to a Cooperative-Coevolutionary Optimization of RBFNs  
Antonio J. Rivera, Ignacio Rojas, Julio Ortega  
297

**Self-organizing Networks and Methods**

Characterizing Self-developing Biological Neural Networks: A First Step Towards Their Application to Computing Systems  
Hugues Berry, Olivier Temam  
306

Cooperative Bees Swarm for Solving the Maximum Weighted Satisfiability Problem  
Habiba Drias, Souhila Sadeg, Safa Yahi  
318

Deriving Cortical Maps and Elastic Nets from Topology-Preserving Maps  
Valery Tereshko  
326

Evolution of Cooperating ANNs Through Functional Phenotypic Affinity  
F. Bellas, J.A. Becerra, R.J. Duro  
333

Robust Growing Hierarchical Self Organizing Map  
Sebastián Moreno, Héctor Allende, Cristian Rogel, Rodrigo Salas  
341

**Support Vector Machines**

Web Usage Mining Using Support Vector Machine  
Sung-Hae Jun  
349

Multi-kernel Growing Support Vector Regressor  
D. Gutiérrez-González, E. Parrado-Hernández, A. Navia-Vázquez  
357

**Cellular Neural Networks**

Stability Results for Cellular Neural Networks with Time Delays  
Daniela Danciu, Vladimir Răsvan  
366

Global Exponential Stability Analysis in Cellular Neural Networks with Time-Varying Coefficients and Delays  
Qiang Zhang, Dongsheng Zhou, Xiaopeng Wei, Jin Xu  
374
Hybrid Systems

Diversity and Multimodal Search with a Hybrid Two-Population GA: An Application to ANN Development
Juan R. Rabuñal, Julián Dorado, Marcos Gestal, Nieves Pedreira .......... 382

Identification of Fuzzy Systems with the Aid of Genetic Fuzzy Granulation
Sung-Kwun Oh, Keon-Jun Park, Yong-Soo Kim, Tae-Chon Ahn ............... 391

Clustering-Based TSK Neuro-fuzzy Model for Function Approximation with Interpretable Sub-models
Luis Javier Herrera, Héctor Pomares, Ignacio Rojas, Alberto Guillén, Jesús González, Mohammed Awad ............................................................... 399

Genetically Optimized Hybrid Fuzzy Neural Networks with the Aid of TSK Fuzzy Inference Rules and Polynomial Neural Networks
Sung-Kwun Oh, Witold Pedrycz, Hyun-Ki Kim, Yong-Kab Kim ............... 407

IG-Based Genetically Optimized Fuzzy Polynomial Neural Networks
Sung-Kwun Oh, Seok-Beom Roh, Witold Pedrycz, Jong-Beom Lee .......... 416

Hierarchical Neuro-fuzzy Models Based on Reinforcement Learning for Intelligent Agents
Karla Figueiredo, Marley Vellasco, Marco Aurélio Pacheco ................. 424

Neuroengineering and Hardware Implementations

Interfacing with Patterned in Vitro Neural Networks by Means of Hybrid Glass-Elastomer Neurovectors: Progress on Neuron Placement, Neurite Outgrowth and Biopotential Measurements
Enric Claverol-Tinturé, Xavier Rosell, Joan Cabestany ......................... 433

Using Kolmogorov Inspired Gates for Low Power Nanoelectronics
Valeriu Beiu, Artur Zawadski, Răzvan Andonie, Snorre Aunet ............... 438

CMOL CrossNets as Pattern Classifiers
Jung Hoon Lee, Konstantin K. Likharev ........................................... 446

Analog VLSI Implementation of Adaptive Synapses in Pulsed Neural Networks
Tim Kaulmann, Markus Ferber, Ulf Witkowski, Ulrich Rückert ............... 455

Smart Sensing with Adaptive Analog Circuits
Guillermo Zatorre, Nicolás Medrano, Santiago Celma, Bonifacio Martín-del-Brío, Antonio Bono .............................................................. 463
Spiking Neurons Computing Platform
*M. Ros, Eva M. Ortigosa, Rodrigo Agís, Richard Carrillo,
Alberto Prieto, Mike Arnold* ................................................................. 471

Inter-spike-intervals Analysis of Poisson Like Hardware Synthetic AER Generation
*A. Linares-Barranco, M. Oster, D. Cascado, G. Jiménez, A. Civit,
B. Linares-Barranco* .............................................................................. 479

Ultra Low-Power Neural Inspired Addition: When Serial Might Outperform Parallel Architectures
*Valeriu Beiu, Asbjørn Djupdal, Snorre Aunet* .......................................... 486

An Asynchronous 4-to-4 AER Mapper
*H. Kolle Riis, Ph. Häfliger* ...................................................................... 494

Fast Optoelectronic Neural Network for Vision Applications
*Marta Ruiz-Llata, Horacip Lamela* .......................................................... 502

A Computational Tool to Test Neuromorphic Encoding Schemes for Visual Neuroprostheses
*Christian A. Morillas, Samuel F. Romero, Antonio Martínez,
Francisco J. Pelayo, Eduardo Fernández* .................................................. 510

Test Infrastructure for Address-Event-Representation Communications
*R. Paz, F. Gomez-Rodriguez, M.A. Rodríguez, A. Linares-Barranco,
G. Jimenez, A. Civit* .................................................................................. 518

Automatic Generation of Bio-inspired Retina-Like Processing Hardware
*Antonio Martínez, Leonardo M. Reyneri, Francisco J. Pelayo,
Samuel F. Romero, Christian A. Morillas, Begoña Pino* .......................... 527

Two Hardware Implementations of Exhaustive Synthetic AER Generation Method
*F. Gomez-Rodriguez, R. Paz, L. Miro, A. Linares-Barranco,
G. Jimenez, A. Civit* .................................................................................. 534

On the Design of a Parallel Genetic Algorithm Based on a Modified Survival Method for Evolvable Hardware
*Dong-Sun Kim, Hyun-Sik Kim, Youn-Sung Lee, Duck-Jin Chung* ............ 541

A Novel Approach for the Implementation of Large Scale Spiking Neural Networks on FPGA Hardware
*B. Glackin, T.M. McGinnity, L.P. Maguire, Q.X. Wu, A. Belatreche* ........... 552

A Quaternary CLB Design Using Quantum Device Technology on Silicon for FPGA Neural Network Architectures
*P.M. Kelly, T.M. McGinnity, L.P. Maguire, L.M. McDaid* ......................... 564
