Preface

IbPRIA 2005 (Iberian Conference on Pattern Recognition and Image Analysis) was the second of a series of conferences jointly organized every two years by the Portuguese and Spanish Associations for Pattern Recognition (APRP, AERFAI), with the support of the International Association for Pattern Recognition (IAPR).

This year, IbPRIA was hosted by the Institute for Systems and Robotics and the Geo-systems Center of the Instituto Superior Técnico and it was held in Estoril, Portugal. It provided the opportunity to bring together researchers from all over the world to discuss some of the most recent advances in pattern recognition and all areas of video, image and signal processing.

There was a very positive response to the Call for Papers for IbPRIA 2005. We received 292 full papers from 38 countries and 170 were accepted for presentation at the conference. The high quality of the scientific program of IbPRIA 2005 was due first to the authors who submitted excellent contributions and second to the dedicated collaboration of the international Program Committee and the other researchers who reviewed the papers. Each paper was reviewed by two reviewers, in a blind process. We would like to thank all the authors for submitting their contributions and for sharing their research activities. We are particularly indebted to the Program Committee members and to all the reviewers for their precious evaluations, which permitted us to set up this publication.

We were also very pleased to benefit from the participation of the invited speakers Prof. David Lowe, University of British Columbia (Canada), Prof. Wiro Niessen, University of Utrecht (The Netherlands) and Prof. Isidore Rigoutsos, IBM Watson Research Center (USA). We would like to express our sincere gratitude to these world-renowned experts.

We would like to thank Prof. João Sanches and Prof. João Paulo Costeira of the Organizing Committee, in particular for the management of the Web page and the submission system software.

Finally, we were very pleased to welcome all the participants who attended IbPRIA 2005. We are looking forward to meeting you at the next edition of IbPRIA, in Spain in 2007.

Video Retrieval Using an EDL-Based Timeline .................................. 401
José San Pedro, Nicolas Denis, and Sergio Domínguez

IV Image and Video Coding

A New Secret Sharing Scheme for Images
Based on Additive 2-Dimensional Cellular Automata .......................... 411
Gonzalo Álvarez Marañón, Luis Hernández Encinas,
and Ángel Martín del Rey

A Fast Motion Estimation Algorithm
Based on Diamond and Triangle Search Patterns .............................. 419
Yun Cheng, Zhiying Wang, Kui Dai, and Jianjun Guo

A Watermarking Scheme Based on Discrete Non-separable Wavelet Transform .. 427
Jianwei Yang, Xinge You, Yuan Yan Tang, and Bin Fang
A Fast Run-Length Algorithm for Wavelet Image Coding with Reduced Memory Usage ........................................ 435  
*Jose Oliver and Manuel P. Malumbres*

## V  Face Recognition

Multiple Face Detection at Different Resolutions for Perceptual User Interfaces . . 445  
*Modesto Castrillón-Santana, Javier Lorenzo-Navarro, Oscar Déniz-Suárez, José Isern-González, and Antonio Falcón-Martel*

Removing Shadows from Face Images Using ICA .......................... 453  
*Jun Liu, Xiangsheng Huang, and Yangsheng Wang*

An Analysis of Facial Description in Static Images and Video Streams .......... 461  
*Modesto Castrillón-Santana, Javier Lorenzo-Navarro, Daniel Hernández-Sosa, and Yeray Rodríguez-Domínguez*

Recognition of Facial Gestures Based on Support Vector Machines ............. 469  
*Attila Fazekas and István Sánta*

Performance Driven Facial Animation by Appearance Based Tracking .......... 476  
*José Miguel Buenaposada, Enrique Muñoz, and Luis Baumela*

Color Distribution Tracking for Facial Analysis ............................ 484  
*Juan José Gracia-Roche, Carlos Orrite, Emiliano Bernués, and José Elías Herrero*

Head Gesture Recognition Based on Bayesian Network ........................ 492  
*Peng Lu, Xiangsheng Huang, Xinshan Zhu, and Yangsheng Wang*

Detection and Tracking of Face by a Walking Robot .......................... 500  
*Do Joon Jung, Chang Woo Lee, and Hang Joon Kim*

## VI  Human Activity Analysis

Appearance-Based Recognition of Words in American Sign Language .......... 511  
*Morteza Zahedi, Daniel Keysers, and Hermann Ney*

Robust Person-Independent Visual Sign Language Recognition ............... 520  
*Jörg Zieren and Karl-Friedrich Kraiss*

A 3D Dynamic Model of Human Actions for Probabilistic Image Tracking ...... 529  
*Ignasi Rius, Daniel Rowe, Jordi González, and Xavier Roca*

Extracting Motion Features for Visual Human Activity Representation ....... 537  
*Filiberto Pla, Pedro Ribeiro, José Santos-Victor, and Alexandre Bernardino*
