Advances in
Biometric
Person Authentication

International Workshop
on Biometric Recognition Systems, IWBRS 2005
Beijing, China, October 22-23, 2005
Proceedings
Preface

Automatic and reliable authentication of individuals is becoming an essential part of the modern world, for security and convenience in our life, in our work and in society. Biometrics-based systems utilize physiological or behavioral characteristics of an individual including the face, iris, fingerprint, palmprint, hand, voice, signature, or a combination of them, for this task. We are now seeing increasing interest and practical deployment of biometric systems.

The International Workshop on Biometric Recognition Systems (IWBRS 2005) was held in conjunction with ICCV 2005, providing an interactive forum for leading biometrics researchers and system designers. A biometric authentication competition (BAC) was conducted by the workshop to track the state-of-the-art biometrics technologies.

This volume of workshop proceedings includes 32 papers carefully selected from a total of 130 submissions. The papers address the problems in face, iris, fingerprint, palmprint, speech, writing and other biometrics, and contribute new ideas to research and development of reliable and practical solutions for biometric authentication.

We would like to express our gratitude to all the contributors, reviewers, and Program Committee and Organizing Committee members who made this a very successful workshop. We also wish to acknowledge the Institute of Automation, Chinese Academy of Sciences, and Springer for sponsoring this workshop. Special thanks are due to Miao Hong, Xin Yang, Zhuoshi Wei, Yinghao Cai, Zhaofeng He, Cheng Zhong, Shiqi Yu and Xianchao Qiu for their hard work in workshop organization.

We hope you could benefit from the fruitful workshop to improve the performance of your biometric systems.

September 2005

Stan Z. Li
Zhenan Sun
Tieniu Tan
David Zhang
Sharath Pankanti
Gerard Chollet
Organization

General Chairs
Anil K. Jain (Michigan State University, USA)
Josef Kittler (University of Surrey, UK)
Tieniu Tan (Institute of Automation, Chinese Academy of Sciences, China)

Program Chairs
David Zhang (Hong Kong Polytechnic University, Hong Kong, China)
Sharath Pankanti (IBM, USA)
Gerard Chollet (Ecole Nationale Supérieure des Télécommunications, France)
Stan Z. Li (Institute of Automation, Chinese Academy of Sciences, China)

Program Committee
Simon Baker (Carnegie Mellon University, USA)
Pawan Sinha (MIT, USA)
Samy Bengio (IDIAP, Switzerland)
Vijayakumar Bhagavatula (CMU, USA)
Volker Blanz (Max Planck Institute, Germany)
Ruud M. Bolle (IBM, USA)
John Daugman (University of Cambridge, UK)
Wen Gao (Institute of Computing Technology, CAS, China)
Jufu Feng (Peking University, China)
Julian Fierrez-Aguilar (Universidad Politecnica de Madrid, Spain)
Sadaoki Furui (Tokyo Institute of Technology, Japan)
Jiahie Kim (Yonsei University, Korea)
Seong-Whan Lee (Korea University, Korea)
Ales Leonardis (University of Ljubljana, Slovenia)
Shihong Lao (Omron Corporation, Japan)
Davide Maltoni (University of Bologna, Italy)
Shree K. Nayar (Columbia University, USA)
Mark Nixon (University of Southampton, UK)
Jonathon Phillips (NIST, USA)
Jamie Sherrah (Safehouse International Ltd., Australia)
Arun Ross (West Virginia University, USA)
Yang Ni (INT, France)
Xiaoou Tang (Microsoft Research Asia, China)
Yunhong Wang (Beihang University, China)
GuangYou Xu (Tsinghua University, China)
VIII Organization

Wei Yun Yau (Institute for Infocomm Research, Singapore)
PC Yuen (Hong Kong Baptist University, Hong Kong, China)
Changsui Zhang (Tsinghua University, China)
Young-Bin Kwon (Chung-Ang University, Korea)

Competition Coordinators

Yin Xie (Automatic Identification Manufacture Association of China)

Local Arrangements Chairs

Zhenan Sun (Institute of Automation, Chinese Academy of Sciences, China)
Xin Yang (Institute of Automation, Chinese Academy of Sciences, China)
Table of Contents

Face

Texture Features in Facial Image Analysis ........................................ 1
   Matti Pietikäinen and Abdenour Hadid

Enhance ASMs Based on AdaBoost-Based Salient Landmarks Localization
   and Confidence-Constraint Shape Modeling ............................... 9
   Zhiheng Niu, Shiguang Shan, Xilin Chen, Bingpeng Ma, and Wen Gao

Face Authentication Using One-Class Support Vector Machines ........ 15
   Manuele Bicego, Enrico Grosso, and Massimo Tistarelli

A Novel Illumination Normalization Method for Face Recognition ...... 23
   Yucong Guo, Xingming Zhang, Huangyuan Zhan, and Jing Song

Using Score Normalization to Solve the Score Variation Problem
   in Face Authentication ...................................................... 31
   Fei Yang, Shiguang Shan, Bingpeng Ma, Xilin Chen, and Wen Gao

Gabor Feature Selection for Face Recognition
Using Improved AdaBoost Learning ............................................. 39
   Linlin Shen, Li Bai, Daniel Bardsley, and Yangsheng Wang

An Automatic Method of Building 3D Morphable Face Model .......... 50
   Hui Guo, Chengming Liu, and Liming Zhang

Procrustes Analysis and Moore-Penrose Inverse Based Classifiers
   for Face Recognition ...................................................... 59
   K.R. Sujith and Gurumurthi V. Ramanan

Two Factor Face Authentication Scheme with Cancelable Feature ...... 67
   Jeonil Kang, DaeHun Nyang, and KyungHee Lee

Fingerprint

Local Feature Extraction in Fingerprints by Complex Filtering ......... 77
   Hartwig Fronthaler, Klaus Kollreider, and Josef Bigun

A TSVM-Based Minutiae Matching Approach
   for Fingerprint Verification ................................................ 85
   Jia Jia and Lianhong Cai
