Preface

This volume is intended for SPI (software process improvement) managers and researchers, quality managers, and experienced project and research managers. The papers constitute the research proceedings of the 12th EuroSPI (European Software Process Improvement, www.eurospi.net) conference held in Budapest, 9–11 November 2005, Hungary. Conferences have been held in 1994 in Dublin, 1995 in Vienna (Austria), 1997 in Budapest (Hungary), 1998 in Gothenburg (Sweden), 1999 in Pori (Finland), 2000 in Copenhagen (Denmark), 2001 in Limerick (Ireland), 2002 in Nuremberg (Germany), 2003 in Graz (Austria), and 2004 in Trondheim (Norway). EuroSPI established an experience library (library.eurospi.net) which will be continuously extended over the next years and will be made available to all attendees. EuroSPI also created an umbrella initiative for establishing a European Qualification Network in which different SPINs and national initiatives join mutually beneficial collaborations.

From 2005, through EuroSPI partners and networks, in collaboration with the European Union (supported by the EU Leonardo da Vinci Programme), a certification body will be created for the IT and services sector so as to offer SPI knowledge and certificates to industry, establishing close knowledge transfer links between research and industry. The biggest value of EuroSPI lies in its function as a European knowledge and experience exchange mechanism between SPI research institutions and industry.

September 2005

Dr. Richard Messnarz
General Chair EuroSPI
www.eurospi.net
Organization Committee

EuroSPI 2005 is organized by the EuroSPI partnership (www.eurospi.net), internationally coordinated by ISCN, and locally supported by the John von Neumann Computer Society.

Table of Contents

Introduction

Software Process Improvement – EuroSPI 2005 Conference
Richard Messnarz, Pekka Abrahamsson, Ita Richardson ............. 1

Agile Methods and Software Issues

Framework of Agile Patterns
Teodora Bozheva, Maria Elisa Gallo ........................................ 4

Deploying Agile Practices in Organizations: A Case Study
Minna Pikkarainen, Outi Salo, Jari Still .............................. 16

Pair Programming vs. Side-by-Side Programming
Jerzy R. Nawrocki, Michał Jasiński, Łukasz Olek, Barbara Lange .... 28

SPI Studies

Finding and Ranking Research Directions for Software Testing
Ossi Taipale, Kari Smolander, Heikki Kälviäinen ......................... 39

Quality: Attitudes and Experience Within the Irish Software Industry
Brendan Keane, Ita Richardson ........................................... 49

How Things Should Not Be Done: A Real-World Horror Story of Software Engineering Process Improvement
Jarmo J. Ahonen, Hanna-Miina Sihvonen ............................... 59

Improvement Methods

AIM – Ability Improvement Model
Jan Pries-Heje, Jørn Johansen .............................................. 71

Customer-Oriented Specification and Evaluation of IT Service Level Agreements
Wolfram Pietsch ................................................................. 83
