Preface

This volume contains papers presented at the first joint conference of the Software Process Workshop and the International Workshop on Software Process Simulation and Modeling (SPW/ProSim 2006) held in Shanghai, P.R. China, on May 20-21, 2006.

The theme of SPW/ProSim 2006 was “Software Process Change – Meeting the Challenge.” Software developers are under ever-increasing pressure to deliver their products more quickly and with higher levels of quality. These demands are set in a dynamic context of frequently changing technologies, limited resources and globally distributed development teams. At the same time, global competition is forcing organizations that develop software to cut costs by rationalizing processes, outsourcing part or all of their activities, reusing existing software in new or modified applications and evolving existing systems to meet new needs, while still minimizing the risk of projects failing to deliver.

To address these difficulties, new or modified processes are emerging, including agile methods and plan-based product line development. Open Source, COTS and community-developed software are becoming more popular. Outsourcing coupled with 24/7 development demands well-defined processes and interfaces to support the coordination of organizationally and geographically separated teams. All of these challenges combine to increase demands on the efficiency and effectiveness of software processes.

For the first time, in 2006 two successful series of conferences combined efforts to address these and other related questions. Previous Software Process Workshops have provided a high-quality forum for assessing current and emerging software process capabilities, and for obtaining insights into worthwhile directions in software process research. ProSim is the leading event for researchers and practitioners focusing on the simulation and modeling of software processes.

In response to the call for papers, 225 submissions were received from 17 different countries and regions: Australia, Belgium, Canada, China, France, Germany, Hong Kong, India, Italy, Japan, Korea, Mexico, Pakistan, Spain, Taiwan, UK, and USA. Every paper was rigorously reviewed and held to very high-quality standards, and finally 34 papers were accepted as regular papers for presentation at the workshop, representing a 15% acceptance rate for regular papers.

The papers were clustered around topics and presented in seven regular sessions, each consisting of two threads. Topics included Process Tailoring and Decision-Support, Process Tools and Metrics, Process Management, Process Representation, Analysis and Modeling, Process Simulation Modeling, Process Simulation Applications, and Experience Reports.

The SPW/ProSim2006 program was highlighted by four keynote speeches, delivered by (in alphabetical order): Barry Boehm (University of Southern California: “A Value-Based Software Process Framework”), Ross Jeffery (University of New South Wales: “Exploring the Business Process–Software Process Relationship”), Mingshu Li (Institute of Software at the Chinese Academy of Sciences: “3-D Integrated Software

Development Processes: A New Benchmark”), and Leon J. Osterweil (University of Massachusetts Amherst: “Ubiquitous Process Engineering: Applying Software Process Technology to Other Domains”).

A conference such as this can only succeed as a team effort. All of this work would not have been possible without the dedication and professional work of many colleagues. We wish to express our gratitude to all contributors for submitting papers. Their work forms the basis for the success of the workshop. We also would like to thank the Program Committee members and reviewers because their work is the guarantee for the high quality of the workshop. Particular thanks also go to the keynote speakers for their excellent presentations. Finally, we also would like to thank the members of the Steering Committee for their advice, encouragement and support.

We wish to express our thanks to the organizers for their hard work. The workshop was sponsored by the Institute of Software, the Chinese Academy of Sciences (ISCAS) and the ISCAS Laboratory for Internet Software Technologies, and the Shanghai Municipal Informatization Commission (SMIC). We also wish to thank the 28th International Conference on Software Engineering (ICSE 2006) for sponsoring this meeting as an ICSE Co-Located Event. Finally, we acknowledge the editorial support from Springer for the publication of this proceeding.

Software Process Workshop

Workshop on Software Process Simulation and Modeling 2006

Shanghai, China
May 20-21, 2006

General Chair

David M. Raffo, Portland State University, USA

Steering Committee

Barry Boehm, University of Southern California, USA

Mingshu Li, Institute of Software, Chinese Academy of Sciences, China

Leon J. Osterweil, University of Massachusetts, USA

Program Co-chairs

Dietmar Pfahl, University of Calgary, Canada

Qing Wang, Institute of Software, Chinese Academy of Sciences, China

Publicity Chair

Paul Wernick, University of Hertfordshire, UK

Program Committee Members

Thomas Birkhölzer	University of Applied Science, Konstanz, Germany
Keith C.C. Chan	Hong Kong Polytechnic University, Hong Kong
Sorana Cimpan	University of Savoie at Annecy, France
James Collofello	Arizona State University, USA
Bill Curtis	Borland Software Corporation, USA
Jacky Estublier	French National Research Center in Grenoble, France
Anthony Finkelstein	University College London, UK
Volker Gruhn	University of Leipzig, Germany
Paul Grünbacher	Johannes Kepler University Linz, Austria
Dan Houston	Honeywell, USA
Liguo Huang	University of Southern California, USA
Watts S. Humphrey	Carnegie Mellon University, USA

Hajimu Iida	Nara Institute of Science and Technology, Japan
Katsuro Inoue	Osaka University, Japan
Ross Jeffery	University of New South Wales, Australia
Natalia Juristo	Universidad Politécnica de Madrid, Spain
Jyrki Kontio	Helsinki University of Technology, Finland
Philippe Kruchten	University of British Columbia, Canada
Barbara Staudt Lerner	Williams College, USA
Jian Lv	Nanjing University, China
Ray Madachy	University of Southern California, USA
Robert H. Martin	Portland State University, USA
Hong Mei	Peking University, China
Jürgen Münch	University of Kaiserslautern, Germany
Flavio Oquendo	University of South Brittany, France
Dewayne E. Perry	University of Texas at Austin, USA
Dietmar Pfahl	University of Calgary, Canada
Antony Powell	Science Applications International Corporation, USA
David M. Raffo	Portland State University, USA
Juan F. Ramil	The Open University, UK
H. Dieter Rombach	University of Kaiserslautern, Germany
Guenther Ruhe	University of Calgary, Canada
Mercedes Ruiz	University of Cádiz, Spain
Ioana Rus	Fraunhofer Center, USA
Kevin Ryan	University of Limerick, Ireland
Walt Scacchi	University of California, Irvine, USA
Stanley M. Sutton Jr.	IBM T. J. Watson Research Center, USA
Thomas Thelin	Lund University, Sweden
Colin Tully	Middlesex University, UK
Qing Wang	Institute of Software, Chinese Academy of Sciences, China
Yongji Wang	Institute of Software, Chinese Academy of Sciences, China
Brian Warboys	University of Manchester, UK
Paul Wernick	University of Hertfordshire, UK
Alexander Wolf	University of Colorado at Boulder, USA
Ye Yang	University of Southern California, USA

Organizing Committee Chair

Yingchen Gu, Shanghai Municipal Informatization Commission, China

Table of Contents

Keynotes

A Value-Based Software Process Framework <i>Barry Boehm, Apurva Jain</i>	1
Exploring the Business Process-Software Process Relationship <i>Ross Jeffery</i>	11
Assessing 3-D Integrated Software Development Processes: A New Benchmark <i>Mingshu Li</i>	15
Ubiquitous Process Engineering: Applying Software Process Technology to Other Domains <i>Leon J. Osterweil</i>	39

Process Tailoring and Decision-Support

Dependencies Between Data Decisions <i>Frank G. Goethals, Wilfried Lemahieu, Monique Snoeck, Jacques Vandenbulcke</i>	48
Tailor the Value-Based Software Quality Achievement Process to Project Business Cases <i>Liguo Huang, Hao Hu, Jidong Ge, Barry Boehm, Jian Lü</i>	56
Optimizing Process Decision in COTS-Based Development Via Risk Based Prioritization <i>Ye Yang, Barry Boehm</i>	64

Process Tools and Metrics

Project Replayer – An Investigation Tool to Revisit Processes of Past Projects <i>Keita Goto, Noriko Hankawa, Hajimu Iida</i>	72
Software Process Measurement in the Real World: Dealing with Operating Constraints <i>Luigi Lavazza, Marco Mauri</i>	80

Evaluation of Project Quality: A DEA-Based Approach
Shen Zhang, Yongji Wang, Jie Tong, Jinhui Zhou, Li Ruan 88

Process Management

A Pattern-Based Solution to Bridge the Gap Between Theory and Practice in Using Process Models
Antonio Amescua, Javier García, Maria-Isabel Sánchez-Segura, Fuensanta Medina-Domínguez 97

On Mobility of Software Processes
Mingshu Li, Qiusong Yang, Jian Zhai, Guowei Yang 105

Software Process Fusion: Uniting Pair Programming and Solo Programming Processes
Kim Man Lui, Keith C.C. Chan 115

Towards an Approach for Security Risk Analysis in COTS Based Development
Dan Wu, Ye Yang 124

COCOMO-U: An Extension of COCOMO II for Cost Estimation with Uncertainty
Da Yang, Yuxiang Wan, Zinan Tang, Shujian Wu, Mei He, Mingshu Li 132

A Product Line Enhanced Unified Process
Weishan Zhang, Thomas Kunz 142

Process Representation, Analysis and Modeling

Automatic Fault Tree Derivation from Little-JIL Process Definitions
Bin Chen, George S. Avrunin, Lori A. Clarke, Leon J. Osterweil 150

Workflows and Cooperative Processes
Jacky Estublier, Sergio Garcia 159

Spiral Lifecycle Increment Modeling for New Hybrid Processes
Raymond Madachy, Barry Boehm, Jo Ann Lane 167

Definition and Analysis of Election Processes
Mohammad S. Raunak, Bin Chen, Amr Elssamadisy, Lori A. Clarke, Leon J. Osterweil 178

The Design of a Flexible Software Process Language <i>Beijun Shen, Cheng Chen</i>	186
Building Business Process Description and Reasoning Meta-model M_{bp} in <i>A-Prolog</i> <i>Hai Wan, Yunxiang Zheng, Yin Chen, Lei Li</i>	195
A Process-Agent Construction Method for Software Process Modeling in SoftPM <i>Qing Wang, Junchao Xiao, Mingshu Li, M. Wasif Nisar,</i> <i>Rong Yuan, Lei Zhang</i>	204
Applying Little-JIL to Describe Process-Agent Knowledge in SoftPM <i>Junchao Xiao, Leon J. Osterweil, Lei Zhang, Alexander Wise,</i> <i>Qing Wang</i>	214

Process Simulation Modeling

Reusable Model Structures and Behaviors for Software Processes <i>Raymond Madachy</i>	222
Organization-Theoretic Perspective for Simulation Modeling of Agile Software Processes <i>Levent Yilmaz, Jared Phillips</i>	234
Semi-quantitative Simulation Modeling of Software Engineering Process <i>He Zhang, Barbara Kitchenham</i>	242

Process Simulation Applications

Analysis of Software-Intensive System Acquisition Using Hybrid Software Process Simulation <i>KeungSik Choi, Doo-Hwan Bae</i>	254
Simulation-Based Stability Analysis for Software Release Plans <i>Dietmar Pfahl, Ahmed Al-Emran, Günther Ruhe</i>	262
Exploring the Impact of Task Allocation Strategies for Global Software Development Using Simulation <i>Siri-on Setamanit, Wayne Wakeland, David Raffo</i>	274
Users and Developers: An Agent-Based Simulation of Open Source Software Evolution <i>Neil Smith, Andrea Capiluppi, Juan Fernández-Ramil</i>	286

Simulating the Structural Evolution of Software
Benjamin Stopford, Steve Counsell 294

Experience Report

An Empirical Study on SW Metrics for Embedded System
Taehee Gwak, Yoonjung Jang..... 302

Process-Family-Points
Sebastian Kiebusch, Bogdan Franczyk, Andreas Speck 314

Automated Recognition of Low-Level Process: A Pilot Validation Study
of Zorro for Test-Driven Development
Hongbing Kou, Philip M. Johnson 322

Process Evolution Supported by Rationale: An Empirical Investigation
of Process Changes
Alexis Ocampo, Jürgen Münch..... 334

Implementing Process Change in a Software Organization – An
Experience Based Study
Shaowen Qin 342

Practical Experiences of Cost/Schedule Measure Through Earned
Value Management and Statistical Process Control
Qing Wang, Nan Jiang, Lang Gou, Meiru Che, Ronghui Zhang 348

Author Index 355
