## PREFACE

From June 27 to July 8, 1977, a symposium on algebraic geometry was held at the University of Tromsø, Norway. The lectures delivered there were primarily focused on the two topics of intersection theory and space curves. The contributions presented here are in large measure based on talks given at the symposium.

The symposium was supported financially by the Norwegian Research Council for Science and Humanities (NAVF) and by the University of Tromsø. We wish to express our thanks to both for their support.

Loren D. Olson
