P R E F A C E

In recent years in numerous countries, attempts have been made to develop natural language systems of communication with computers.

This research has been initiated by well-known research institutes sponsored often by government research programs.

This publication should facilitate an exchange of information, concerning the present state of research in this area.

The authors would like to express their thanks to Springer-Verlag for publishing this volume.

Warsaw, May 1978

Leonard Bolc

C O N T E N T S

A formalism for the description of question answering systems Camilla Schwind	1
Access to data base systems via natural language Klaus-Dieter Krägeloh, Peter C. Lockemann	49
An overview of PLIDIS A problem solving information system with German as query language G.L. Berry-Rogghe, H. Wulz	87
Metamorphosis grammars A. Colmerauer	133
The theory and practice of augmented transition network grammars Madeleine Bates	191
Syntactic analysis of written Polish Stanisław Szpakowicz	261
