

Springer Tracts in Modern Physics 82

Ergebnisse der exakten Naturwissenschaften

Editor: G. Höhler

Associate Editor: E. A. Niekisch

Editorial Board: S. Flügge H. Haken J. Hamilton

H. Lehmann W. Paul

Springer Tracts in Modern Physics

- Volume 66 Quantum Statistics in Optics and Solid-State Physics
 - Volume 67 Conformal Algebra in Space-Time and Operator Product Expansion
 - Volume 68 Solid-State Physics
 - Volume 69 Astrophysics
 - Volume 70 Quantum Optics
 - Volume 71 Nuclear Physics
 - Volume 72 Van der Waals Attraction
 - Volume 73 Excitons at High Density
 - Volume 74 Solid-State Physics
 - Volume 75 Light Scattering by Phonon-Polaritons
 - Volume 76 Irreversible Properties of Type II Superconductors
 - Volume 77 Surface Physics
 - Volume 78 Solid-State Physics
 - Volume 79 Elementary Particle Physics
 - Volume 80 Neutron Physics
 - Volume 81 Point Defects in Metals I: Introduction to the Theory
 - Volume 82 Electronic Structure of Noble Metals, and Polariton-Mediated Light Scattering
-

Electronic Structure of Noble Metals and Polariton-Mediated Light Scattering

Contributions by
B. Bendow B. Lengeler

With 42 Figures

Springer-Verlag
Berlin Heidelberg New York 1978

Dr. Bernard Bendow

Rome Air Development Center, Deputy for Electronic Technology,
Hanscom AFB, MA 01731, USA

Dr. Bruno Lengeler

Institut für Festkörperforschung der Kernforschungsanlage Jülich
Postfach 1913, D-5170 Jülich

(Present address: Bell Laboratories, 600 Mountain Avenue, Murray Hill, NJ 07974, USA)

Manuscripts for publication should be addressed to :

Gerhard Höhler

Institut für Theoretische Kernphysik der Universität Karlsruhe
Postfach 6380, D-7500 Karlsruhe 1

*Proofs and all correspondence concerning papers in the process of publication
should be addressed to :*

Ernst A. Niekisch

Institut für Grenzflächenforschung und Vakuumphysik der Kernforschungsanlage Jülich
Postfach 1913, D-5170 Jülich

ISBN 3-540-08814-8 Springer-Verlag Berlin Heidelberg New York

ISBN 0-387-08814-8 Springer-Verlag New York Heidelberg Berlin

Library of Congress Cataloging in Publication Data. Bendow, Bernard, 1942 —. Electronic structure of noble metals and polariton-mediated light scattering. (Springer tracts in modern physics; v. 82) Bibliography: p. Includes index. 1. Polaritons. 2. Precious metals. 3. Electronic structure. I. Lengeler, B., 1939 —. joint author. II. Title. III. Series. QC1.S797 vol. 82 [QC176.8.P6] 539'.08s [530.4'1] ISBN 0-387-08814-8 78-18848

Contents

de Haas-van Alphen Studies of the Electronic Structure of the Noble Metals and Their Dilute Alloys

By *B. Lengeler*. With 26 Figures

1. Introduction	1
2. The de Haas-van Alphen (dHvA) Effect	3
2.1 Lifshitz-Kosevich Expression for the dHvA Effect	3
2.1.1 Conduction Electrons in a Homogeneous Magnetic Field	5
2.1.2 Density of States of the Electrons in the Magnetic Field	9
2.1.3 Origin of the dHvA Oscillations	9
2.1.4 Frequency of the dHvA Oscillations	10
2.1.5 Amplitude of the dHvA Oscillations	12
Damping of the dHvA Oscillations by Finite Temperature	12
Damping of the dHvA Oscillations by Electron Scattering	12
Influence of the Electron Spin on the dHvA Effect	13
2.1.6 Lifshitz-Kosevich Expression for the dHvA Effect	13
2.2 Influence of Electron-Phonon Interaction on the dHvA Effect	14
2.3 Information Derivable from the dHvA Effect	17
2.3.1 Geometry of the Fermi Surface	18
2.3.2 Cyclotron Masses and Fermi Velocities	18
2.3.3 Dingle Temperatures and Scattering Rates of the Conduction Electrons	19
2.3.4 g-Factor of the Conduction Electrons	19
3. Experimental Setup for dHvA Measurements in Cu, Ag, and Au	20
3.1 Field Modulation Technique	20
3.2 Magnet and Cryostat	22
3.3 Sample Holder	22
3.4 Single Crystals of the Noble Metals	22
3.5 Pitfalls in dHvA Measurements	24
3.5.1 Skin Effect	24
3.5.2 Harmonic dHvA Components	24

3.5.3	Magnetic Interaction	25
3.5.4	Phase Smearing	25
4.	The Fermi Surface of the Noble Metals	25
5.	Cyclotron Masses and Fermi Velocities of the Noble Metals	30
5.1	Cyclotron Masses of Cu, Ag, and Au	30
5.2	Determination of Energy Surfaces Adjacent to the Fermi Surface	33
5.3	Angular Dependence of the Cyclotron Masses in Cu, Ag, and Au	34
5.4	Fermi Velocities in the Noble Metals	37
5.5	Electron-Phonon Coupling Constant $\lambda(\mathbf{k})$ in Cu	42
5.6	Coefficient of Electronic Specific Heat for Cu, Ag, and Au	43
6.	Dingle Temperatures and Scattering Rates of Conduction Electrons in the Noble Metals	45
6.1	Dingle Temperatures and the Lifetime of Electron States	45
6.2	Anisotropy of the Scattering Rates in the Noble Metals	47
6.3	Phase Shift Analysis of the Scattering of Conduction Electrons at Defects in the Noble Metals	51
6.3.1	Substitutional Defect	53
6.3.2	Defects on Octahedral Interstices	58
6.3.3	Scattering of the Conduction Electrons by Hydrogen in Cu Occupying Octahedral Interstices and Lattice Sites	60
6.4	Phase Shift Analysis of Defect-Induced Fermi Surface Changes	60
	List of Symbols	63
	References	65

Polariton Theory of Resonance Raman Scattering in Solids

By *B. Bendow*. With 16 Figures

1.	Introduction	69
1.1	Purpose and Scope	69
1.2	Review of Perturbation Theory	71
2.	Polaritons and Their Scattering	75
2.1	Fundamentals of Polaritons	75
2.2	Formalism of Polariton-Mediated Scattering	81
3.	Polariton Theory of the Resonance Raman Effect	89
3.1	General Properties of the Scattering Rate	89
3.2	Calculations for Model Systems	92
3.3	Spatial Dispersion and Finite-Crystal Effects	101
3.4	Scattering by Polaritons	108
4.	Concluding Remarks	111
	References	112
