

This series aims at speedy, informal, and high level information on new developments in mathematical research and teaching. Considered for publication are:

1. Preliminary drafts of original papers and monographs
2. Special lectures on a new field, or a classical field from a new point of view
3. Seminar reports
4. Reports from meetings

Out of print manuscripts satisfying the above characterization may also be considered, if they continue to be in demand.

The timeliness of a manuscript is more important than its form, which may be unfinished and preliminary. In certain instances, therefore, proofs may only be outlined, or results may be presented which have been or will also be published elsewhere.

The publication of the "*Lecture Notes*" Series is intended as a service, in that a commercial publisher, Springer-Verlag, makes house publications of mathematical institutes available to mathematicians on an international scale. By advertising them in scientific journals, listing them in catalogs, further by copyrighting and by sending out review copies, an adequate documentation in scientific libraries is made possible.

Manuscripts

Since manuscripts will be reproduced photomechanically, they must be written in clean typewriting. Handwritten formulae are to be filled in with indelible black or red ink. Any corrections should be typed on a separate sheet in the same size and spacing as the manuscript. All corresponding numerals in the text and on the correction sheet should be marked in pencil. Springer-Verlag will then take care of inserting the corrections in their proper places. Should a manuscript or parts thereof have to be retyped, an appropriate indemnification will be paid to the author upon publication of his volume. The authors receive 25 free copies.

Manuscripts in English, German or French should be sent to Prof. Dr. A. Dold, Mathematisches Institut der Universität Heidelberg, Tiergartenstraße or Prof. Dr. B. Eckmann, Eidgenössische Technische Hochschule, Zürich.

Die „*Lecture Notes*“ sollen rasch und informell, aber auf hohem Niveau, über neue Entwicklungen der mathematischen Forschung und Lehre berichten. Zur Veröffentlichung kommen:

1. Vorläufige Fassungen von Originalarbeiten und Monographien.
2. Spezielle Vorlesungen über ein neues Gebiet oder ein klassisches Gebiet in neuer Betrachtungsweise.
3. Seminararbeiten.
4. Vorträge von Tagungen.

Ferner kommen auch ältere vergriffene spezielle Vorlesungen, Seminare und Berichte in Frage, wenn nach ihnen eine anhaltende Nachfrage besteht.

Die Beiträge dürfen im Interesse einer größeren Aktualität durchaus den Charakter des Unfertigen und Vorläufigen haben. Sie brauchen Beweise unter Umständen nur zu skizzieren und dürfen auch Ergebnisse enthalten, die in ähnlicher Form schon erschienen sind oder später erscheinen sollen.

Die Herausgabe der „*Lecture Notes*“ Serie durch den Springer-Verlag stellt eine Dienstleistung an die mathematischen Institute dar, indem der Springer-Verlag für ausreichende Lagerhaltung sorgt und einen großen internationalen Kreis von Interessenten erfassen kann. Durch Anzeigen in Fachzeitschriften, Aufnahme in Kataloge und durch Anmeldung zum Copyright sowie durch die Versendung von Besprechungsexemplaren wird eine lückenlose Dokumentation in den wissenschaftlichen Bibliotheken ermöglicht.

Lecture Notes in Mathematics

A collection of informal reports and seminars

Edited by A. Dold, Heidelberg and B. Eckmann, Zürich

70

Proceedings of the Summer School in Logic Leeds, 1967

N.A.T.O. Advanced Study Institute
Meeting of the Association for Symbolic Logic

Edited by M. H. Löb

Department of Mathematics

1968

Springer-Verlag Berlin · Heidelberg · New York

A Summer School in Logic was held in Leeds from August 7 - 23, 1967 under the auspices of N.A.T.O. and the Association for Symbolic Logic.

The programme consisted of lecture courses given by S. Feferman, A. Lévy, M. Morley, G. H. Müller, D. Rödding. Invited addresses were presented by W. Craig, G. N. Crossley, P. Geach, G. Takeuti and E. Wette. In addition ten contributed papers were read.

The Summer School was financially supported by N.A.T.O. and to a smaller extent by the British Logic Colloquium.

The present volume contains lecture notes of courses and lectures which were made available by contributors.

M. H. Löb.

Contents

Feferman, S.: Lectures on Proof Theory.....	1
Morley, M.: Partitions and Models.....	109
Rödding, D.: Klassen rekursiver Funktionen.....	159
Cleave, J. P.: Hyperarithmetical Ultrafilters.....	223
Crossley, J. N.: Recursive Equivalence: A Survey.....	241
Davis, A. S.: Half-Ring Morphologies.....	253
Rose, A.: Formalisations of some \mathcal{N}_0 -valued Łukasiewicz Propositional Calculi.....	269
Rosenstein, J.G. Theories which are not \mathcal{N}_0 -Categorical...	273
Slomson, A.: The Monadic Fragment of Predicate Calculus with the Chang Quantifier and Equality.....	279
Takeuti, G.: The \prod_1^1 -comprehension Schema and ω -rules..	303
