TABLE OF CONTENTS

INTRODUCTION	1
PART I. HEURISTICS	
1. Probabilistic formulation of the problem	4
2. The RG-Transformation for the Hierarchical Model	8
3. The existence of a non-trivial fixed point	19
4. The flow around the fixed point	38
5. Discussion of the critical indices	44
6. Global properties of the flow	59
7. Discussion of the thermodynamic limit	76
PART II. PROOFS	
8. Perturbation theory	82
9. Explicit perturbation calculation for the eigenvalue λ_2	87
10. Linear problems and the existence of ϕ_ϵ	95
11. Differentiability of ϕ_ϵ	117
12. The normal form of the flow	127
13. Crossover. Part I	136
14. Crossover. Part II A) Single phase region	146
15. Crossover. Part II B) Two phase region	155
16. Miscellaneous short proofs	195
