

Lecture Notes in Mathematics

A collection of informal reports and seminars

Edited by A. Dold, Heidelberg and B. Eckmann, Zürich

Series: Department of Mathematics, University of Maryland,
College Park

Adviser: J. K. Goldhaber

210

Martin Eichler

Universität Basel, Basel/Schweiz

Projective Varieties and Modular Forms

Course Given at the University of Maryland,
Spring 1970

Springer-Verlag

Berlin · Heidelberg · New York 1971

AMS Subject Classifications (1970): 18G 10, 14M 05, 10D 20

CONTENTS

Introduction	1
Chapter I Graded Modules	4
§1. Some basic concepts	4
§2. Free resolutions	9
§3. The functors $\text{Ext}_h^i(M, H)$	13
§4. The functors $\text{Ext}_h^i(M, N)$ continued	18
§5. Modules over polynomial rings	21
§6. The rank polynomial	26
§7. Reduction of the number of variables	30
§8. Structural properties	34
§9. The theorem of Riemann-Roch and the duality theorem	39
Chapter II Graded Rings and Ideals	49
§10. Introduction, divisors	49
§11. Differentials and the theorem of Riemann-Roch	55
§12. Automorphic forms and projective varieties	63
§13. Quasiinvertible ideals	67
§14. Intersection numbers	72
§15. Regular local rings	79
Chapter III Applications to Modular Forms	88
§16. Introduction	88
§17. Specializations of modular forms	91
§18. Principal ideals	97
§19. Hilbert modular forms in 2 variables	100
Appendix Conjectures and Problems	115
