PREFACE

The volume contains a selection of articles on ring theory presented at the International Conference on Noncommutative Ring Theory at Kent State University, April 4-5, 1975.

Thanks are due to Springer-Verlag for publishing these articles and for their generous support.

The conference itself was sponsored by the mathematics department at Kent State University.

We are deeply indebted to Kathy Morrison who accepted the challenge of serving as administrative assistant to us, and in spite of the best efforts of Mother Nature did a remarkable job of managing the conference.

The existence of the proceedings is due to the assistance and cooperation of the authors; the final typescript the efforts of the ubiquitous Ms. Morrison.

Finally we would like to thank Midge Cozzens for her unending patience, kind assistance and hospitality to the participants of the conference.
