Contents

Part I. Completions and localizations

§0. Introduction to Part I	1
----------------------------------	---

Chapter I. The R-completion of a space

§1. Introduction	10
§2. The triple $\{R, \phi, \psi\}$ on the category of spaces .	13
§3. The total space of a cosimplicial space	17
§4. The R-completion of a space	20
§5. R-complete, R-good and R-bad spaces	24
§6. Low dimensional behaviour	30
§7. Disjoint unions, finite products and multiplicative structures	34
§8. The fibre-wise R-completion	40
§9. The role of the ring R	44

Chapter II. Fibre lemmas

§1. Introduction	48
§2. The principal fibration lemma	50
§3. Proof of the principal fibration lemma	54
§4. Nilpotent fibrations	58
§5. The mod-R fibre lemma	62
§6. Proof of the mod-R fibre lemma	67

Chapter III. Tower lemmas

§1. Introduction	70
§2. Pro-isomorphisms of towers of groups	73
§3. Weak pro-homotopy equivalences	76
§4. Proof of 3.3	79
§5. R-nilpotent spaces	82
§6. The tower lemmas	87
§7. Tower version of the mod-R fibre lemma	91
§8. An Artin-Mazur-like interpretation of the R-completion	94

Chapter IV. An R-completion of groups and its relation to the R-completion of spaces

§1. Introduction	99
§2. The R-completion of a group	102
§3. A variation on the R-nilpotent tower lemma ...	106
§4. A relation between the "R-completion of a group" and the "R-completion of a space"	109
§5. Applications	113
§6. Proof of proposition 4.3	118
§7. Proof of proposition 4.2 (using 4.3)	123

Chapter V.	<u>R-localizations of nilpotent spaces</u>	
§1.	Introduction	126
§2.	Malcev completions for nilpotent groups	128
§3.	Homotopy and homology properties of the R-completion of a nilpotent space ($R \subset Q$)	133
§4.	R-localizations of nilpotent spaces ($R \subset Q$) ...	137
§5.	R-localizations of function spaces	141
§6.	Fracture lemmas	146
§7.	Some slight generalizations	152
§8.	Fracturing H-space structures	156
§9.	Zabrodsky mixing of nilpotent spaces	159
Chapter VI.	<u>p-completions of nilpotent spaces</u>	
§1.	Introduction	163
§2.	Ext-completions and Hom-completions for nilpotent groups	165
§3.	Ext-p-complete nilpotent groups	172
§4.	Examples of Ext and Hom completions	179
§5.	Homotopy and homology properties of the Z_p -completion of a nilpotent space	183
§6.	p-completions of nilpotent spaces	186
§7.	p-completions of function spaces	189
§8.	An arithmetic square fracture lemma	192
§9.	Curtis convergence theorems	197
Chapter VII.	<u>A glimpse at the R-completion of non-nilpotent spaces</u>	
§1.	Introduction	202
§2.	Homotopy characterizations of the R-completion for R-good spaces	204
§3.	Spaces with an R-perfect fundamental group ...	206
§4.	Spaces with finite homotopy or homology groups	211
§5.	Spaces with a finite fundamental group	215
§6.	R-homotopy theories	218
<u>Part II.</u>	<u>Towers of fibrations, cosimplicial spaces and homotopy limits</u>	
§0.	Introduction to Part II	224
Chapter VIII.	<u>Simplicial sets and topological spaces</u>	
§1.	Introduction	228
§2.	Simplicial sets	229
§3.	Equivalence of simplicial and topological homotopy theories	237
§4.	The homotopy relation and function spaces	244

Chapter IX.	<u>Towers of fibrations</u>	
§1.	Introduction	249
§2.	The functors \varprojlim and \varprojlim^1 for groups	251
§3.	The homotopy groups of the inverse limit of a tower of fibrations	254
§4.	The extended homotopy spectral sequence of a tower of fibrations	258
§5.	Applications	261
Chapter X.	<u>Cosimplicial spaces</u>	
§1.	Introduction	265
§2.	Cosimplicial spaces	267
§3.	The total space of a cosimplicial space	270
§4.	Weak equivalences, cofibrations and fibrations	273
§5.	Cosimplicial spaces form a closed simplicial model category	277
§6.	The homotopy spectral sequence of a cosimplicial space	281
§7.	A cosimplicial description of the E_2 -term	284
Chapter XI.	<u>Homotopy inverse limits</u>	
§1.	Introduction	287
§2.	Some spaces associated with a small category .	291
§3.	Homotopy inverse limits	295
§4.	Examples and generalizations	299
§5.	Cosimplicial replacement of diagrams	302
§6.	The functors \varprojlim^s for diagrams of (abelian) groups	305
§7.	A spectral sequence for homotopy groups of homotopy inverse limit spaces	309
§8.	Homotopy inverse limits in terms of homotopy categories	313
§9.	A cofinality theorem	316
§10.	Homotopy inverse limits for certain large diagrams of spaces	321
Chapter XII.	<u>Homotopy direct limits</u>	
§1.	Introduction	325
§2.	Homotopy direct limits	327
§3.	Examples and generalizations	330
§4.	A relation between homotopy direct and inverse limits	334
§5.	Simplicial replacement of diagrams	337
	Bibliography	341
	Index	345
	Errata	349
