This volume represents the talks delivered at the Symposium on Harmonic Analysis, held at the University of Crete, in Iraklion, Greece, the first week of July 1978.

The conference was organized by the newly founded University of Crete on the occasion of its first anniversary.

The manuscripts of the lectures are published here, as supplied to us by the speakers, except for retyping to make them uniform in appearance.

The common feature of these lectures is that either they strictly belong to Harmonic Analysis (classical and abstract) or they use methods belonging to it.

We believe that we express the feelings of all participants if we extend our thanks not only to our host, the University of Crete, but also to a number of local communities (Iraklion, Aghios Nikolaos, Acharnes, Anogia, etc.) which transformed their love for and their faith in the new University to an unforgettable hospitality for its guests.

We also wish to thank

- The Ministry of Science and Culture,
 - The Mayor and the Town Council of Iraklion,
 - The National Tourist Organization of Greece,
- for financial support.
