Preface

This volume contains the papers presented at the Tenth International Conference on Logic for Programming, Artificial Intelligence, and Reasoning (LPAR 2003), held on September 22–26, 2003, in Almaty, Kazakhstan, together with the Fourth International Workshop on Implementation of Logics.

There were 65 submissions, of which 8 belonged to the special submission category of experimental papers, intended to describe implementations or comparisons of systems, or experiments with systems. Each submission was reviewed by at least three program committee members and an electronic program committee meeting was held via the Internet. We are very grateful to the 32 program committee members for their efforts and for the quality of their reviews and discussions. Finally, the committee decided to accept 27 papers. The program also included five invited talks, by Franz Baader, Serikzhan Badaev, Dexter Kozen, Sergei Goncharov, and Thomas Wilke.

Apart from the program committee, we would also like to thank the other people who have made LPAR 2003 possible: the external reviewers and the local organizers Serikzhan Badaev and Anna Romina.

The Internet-based submission software and the program-committee discussion software were provided by the second co-chair.
