Preface

The Annual Conference of the European Association for Computer Science Logic, CSL 2001, was held in Paris, Palais de la Mutualité, on September 10–13, 2001. This was the 15th in a series of annual meetings, originally intended as International Workshops on Computer Science Logic, and the 10th to be held as the Annual Conference of the EACSL. The conference was organized by Laboratoire Spéciﬁcation et Vérification (CNRS & ENS Cachan).

The CSL 2001 program committee selected 39 of 91 submitted papers for presentation at the conference and publication in this proceedings volume. The submitted papers originated from 26 different countries. Each paper was refereed by at least three reviewers.

In addition to the contributed papers, the scientiﬁc program of CSL 2001 included three invited talks (Jean-Yves Girard, Peter O’Hearn, and Jan Van den Bussche). This volume includes the papers provided by the invited speakers as well as the selected contributed papers. The topics of the papers include: linear logic, descriptive complexity, semantics, higher-order programs, modal logics, veriﬁcation, automata, λ-calculus, induction, equational calculus, and constructive theory of types.

I am most grateful to the members of the program committee and all the referees for their thorough work. I am also particularly indebted to François Laroussinie, helped by Patricia Bouyer, Nicolas Markey, and Philippe Schnoebelen, for the successful organization of this event. Special thanks to Emmanuel Fleury for the design of the beautiful “Notre-Dame de Paris” poster.

June 2001

Laurent Fribourg
Program Committee

Andrea Asperti (U. Bologna)
Julian Bradfield (U. Edinburgh)
René David (U. Savoie)
Gilles Dowek (INRIA)
Laurent Fribourg (ENS Cachan) (chair)
Daniel Leivant (Indiana U.)
David McAllester (AT&T)
Johann Makowsky (Technion Haifa)
Aart Middeldorp (U. Tsukuba)
Catuscia Palamidessi (Penn. State)
Frank Pfenning (CMU)
Philippe Schnoebelen (ENS Cachan)
Iain Stewart (U. Leicester)
Moshe Vardi (Rice U.)
Philip Wadler (Avaya Labs)
Thomas Wilke (U. Kiel)

Table of Contents

Invited Papers

Local Reasoning about Programs that Alter Data Structures .......... 1
Peter O’Hearn, John Reynolds, and Hongseok Yang

Applications of Alfred Tarski’s Ideas in Database Theory .......... 20
Jan Van den Bussche

Locus Solum: From the Rules of Logic to the Logic of Rules .......... 38
Jean-Yves Girard

Contributed Papers

The Expressive Power of Horn Monadic Linear Logic ............... 39
Max Kanovich

Non-commutativity and MELL in the Calculus of Structures ........ 54
Alessio Guglielmi and Lutz Straßburger

Quadratic Correctness Criterion for Non-commutative Logic ........ 69
Virgile Mogbil

Descriptive Complexity

Capture Complexity by Partition ...................................... 84
Yijia Chen and Enshao Shen

An Existential Locality Theorem ..................................... 99
Martin Grohe and Stefan Wöhre

Actual Arithmetic and Feasibility .................................... 115
Jean-Yves Marion

The Natural Order-Generic Collapse for ω-Representable Databases
over the Rational and the Real Ordered Group ..................... 130
Nicole Schweikardt

Semantics

An Algebraic Foundation for Higraphs ................................ 145
John Power and Konstantinos Tourlas

Semantic Characterisations of Second-Order Computability
over the Real Numbers .................................................. 160
M.V. Korovina and O.V. Kudinov
An Abstract Look at Realizability ........................................... 173
   Edmund Robinson and Giuseppe Rosolini

The Anatomy of Innocence ................................................... 188
