Application and Theory of Petri Nets 2000

21st International Conference, ICATPN 2000
Aarhus, Denmark, June 26-30, 2000
Proceedings

Springer
Preface

This volume contains the proceedings of the 21st International Conference on Application and Theory of Petri Nets. The aim of the Petri net conferences is to create a forum for discussing progress in the application and theory of Petri nets. Typically, the conferences have 100–150 participants – one third of these coming from industry while the rest are from universities and research institutions. The conferences always take place in the last week of June.

The conference and a number of other activities are co-ordinated by a steering committee with the following members: G. Balbo (Italy), J. Billington (Australia), G. De Michelis (Italy), C. Girault (France), K. Jensen (Denmark), S. Kumagai (Japan), T. Murata (USA), C. A. Petri (Germany; honorary member), W. Reisig (Germany), G. Roucairol (France), G. Rozenberg (The Netherlands; chairman), and M. Silva (Spain).

Other activities before and during the 2000 conference included tool presentations and demonstrations, a meeting on “Interchange Formats”, extensive introductory tutorials, two advanced tutorials on “Hardware Design” and “Timed and Hybrid Automata”, and two workshops on “Software Engineering” and “Practical Use of High-Level Nets”. The tutorial notes and workshop proceedings are not published in these proceedings, but copies are available from the organisers.

The 2000 conference was organised by the CPN Group at the University of Aarhus, Denmark. We would like to thank the organisers (see next page) and their teams.

We would like to thank very much all those who submitted papers to the Petri net conference. We received a total of 57 submissions from 20 different countries. This volume comprises the papers that were accepted for presentation. Invited lectures were given by Jordi Cortadella, Philippe Darondeau, Gregor Engels, Serge Haddad, Kim Guldstrand Larsen, and Ole Lehrmann Madsen.

The submitted papers were evaluated by a programme committee. The programme committee meeting took place in Aarhus, Denmark. We would like to express our gratitude to the members of the programme committee, and to all the referees who assisted them. The names of these are listed on the following pages.

Finally, we would like to mention the excellent co-operation with Springer-Verlag, and to thank Janne Christensen and Teresa Hampton who handled all the submissions, and Uffe H. Engberg for preparing this volume.

April 2000

Mogens Nielsen    Dan Simpson
Organising Committee
Kurt Jensen (Chair)
Søren Christensen (Chair)
Helle Holm-Nielsen (Secretary)

Tools Demonstration
Kjeld Høyer Mortensen (Chair)

Programme Committee
Wil van der Aalst (The Netherlands)
Gianfranco Balbo (Italy)
Luca Bernardinello (Italy)
Eike Best (Germany)
Jonathan Billington (Australia)
Wilfried Brauer (Germany)
Gianfranco Ciardo (USA)
José-Manuel Colom (Spain)
Luis Gomes (Portugal)
Serge Haddad (France)
Kunihiko Hiraishi (Japan)
Mogens Nielsen (Denmark; co-chair; theory)
Leo Ojala (Finland)
Wojciech Penczek (Poland)
Karsten Schmidt (Germany)
Dan Simpson (UK; co-chair; applications)
P. S. Thiagarajan (India)
Robert Valette (France)
Antti Valmari (Finland)
Alex Yakovlev (UK)
Wlodek Zuberek (Canada)

Referees
Alessandra Agostini
Marco Ajmone Marsan
Stanislaw Ambroszkiewicz
S. Arun-Kumar
Pierre Azema
Joao-Paulo Barros
Marek Bednarczyk
Andrea Bobbio
Marc Boyer
Gary Bundell
Nadia Busi
Javier Campos
Giovanni Chiola
Armando-Walter Colombo
Giorgio De Michelis
Susanna Donatelli
Javier Esparza
Joaquin Ezpeleta

Carlo Fergato
Hans Fleischhack

Table of Contents

Invited Papers

Hardware and Petri Nets: Application to Asynchronous Circuit Design .... 1
Jordi Cortadella, Michael Kishinevsky, Alex Kondratyev,
Luciano Lavagno, Alex Yakovlev

Region Based Synthesis of P/T-Nets and Its Potential Applications ...... 16
Philippe Darondeau

UML - A Universal Modeling Language? .................. 24
Gregor Engels, Reiko Heckel, Stefan Sauer

Verification of Timed and Hybrid Systems ..................... 39
Kim Guldstrand Larsen

Full Papers

Parametric Stochastic Well-Formed Nets and Compositional Modelling ... 43
Paolo Ballarini, Susanna Donatelli, Giuliana Franceschinis

Reducing $k$-Safe Petri Nets to Pomset-Equivalent 1-Safe Petri Nets ...... 63
Eike Best, Harro Wimmel

Executing Transactions in Zero-Safe Nets .................. 83
Roberto Bruni, Ugo Montanari

Efficient Symbolic State-Space Construction for Asynchronous Systems . 103
Gianfranco Ciardo, Gerald Lütten, Radu Siminiceanu

Designing a LTL Model-Checker Based on Unfolding Graphs .............. 123
Jean-Michel Couvreur, Sébastien Grivet, Denis Poitrenaud

Process Semantics of Petri Nets over Partial Algebra ................ 146
Jörg Desel, Gabriel Juhás, Robert Lorenz

User Interface Prototyping Based on UML Scenarios and High-Level Petri
Nets ......................................................... 166
Mohammed Elkoutbi, Rudolf K. Keller

Decidability of Properties of Timed-Arc Petri Nets .................... 187
David de Frutos Escrig, Valentín Valero Ruiz, Olga Marroquín Alonso

Analysing the WAP Class 2 Wireless Transaction Protocol Using Coloured
Petri Nets .................................................. 207
Steven Gordon, Jonathan Billington
Table of Contents

Liveness Verification of Discrete Event Systems Modeled by \textit{n-Safe Ordinary Petri Nets} ................................................................. 227
\textit{Kevin X. He, Michael D. Lemmon}

Modelling and Analysing the SDL Description of the ISDN-DSS1 Protocol ................................................................. 244
\textit{Nisse Husberg, Teemu Tynjälä, Kimmo Varpaaniemi}

Process Semantics of P/T-Nets with Inhibitor Arcs ...................... 261
\textit{Jetty Kleijn, Maciej Koutny}

Improved Question-Guided Stubborn Set Methods for State Properties ... 282
\textit{Lars Michael Kristensen, Antti Valmari}

A Compositional Model of Time Petri Nets .................................. 303
\textit{Maciej Koutny}

Composing Abstractions for Coloured Petri Nets .......................... 323
\textit{Charles Lakos}

Modelling and Analysis of a DANFOSS Flowmeter System Using Coloured Petri Nets ................................................................. 346
\textit{Louise Lorentsen, Lars Michael Kristensen}

\textit{Kjeld H. Mortensen}

Pre- and Post-agglomerations for \textit{LTL} Model Checking .............. 387
\textit{Denis Poitrenaud, Jean-Francois Pradat-Peyre}

Bisimulation and the Reduction of Petri Nets .................................. 409
\textit{Philippe Schnoebelen, Natalia Sidorova}

Efficiency of Asynchronous Systems That Communicate Asynchronously . 424
\textit{Walter Vogler}

\textbf{Tools Presentations}

CASCADE: A Tool Kernel Supporting a Comprehensive Design Method for Asynchronous Controllers ................................................. 445
\textit{Jochen Beister, Gernot Eckstein, Ralf Wollowski}

ExSpect 6.4: An Executable Specification Tool for Hierarchical Colored Petri Nets ................................................................. 455
\textit{Wil M.P. van der Aalst, Paul J.N. de Crom, Roy R.H.M.J. Goverde, Kees M. van Hee, Wout J. Hofman, Hajo A. Reijers, Robert A. van der Toorn}
LoLA: A Low Level Analyser ........................................ 465
Karsten Schmidt

Woflan 2.0: A Petri-Net-Based Workflow Diagnosis Tool ................. 475
Eric Verbeek, Wil M.P. van der Aalst

Author Index .......................................................... 485
