Molecular Simulation Fracture Gel Theory

With contributions by
H. R. Brown, C. Creton, C.-Y. Hui, W. H. Jo,
E. J. Kramer, K. Suematsu, J. S. Yang

Springer

This series presents critical reviews of the present and future trends in polymer and biopolymer science including chemistry, physical chemistry, physics and materials science. It is addressed to all scientists at universities and in industry who wish to keep abreast of advances in the topics covered.

As a rule, contributions are specially commissioned. The editors and publishers will, however, always be pleased to receive suggestions and supplementary information. Papers are accepted for „Advances in Polymer Science“ in English.

In references Advances in Polymer Science is abbreviated Adv Polym Sci and is cited as a journal.
