Engineering of
Intelligent Systems

14th International Conference on Industrial
and Engineering Applications of
Artificial Intelligence and Expert Systems, IEA/AIE 2001
Budapest, Hungary, June 4-7, 2001
Proceedings
Preface

“What I cannot create I do not understand.”
Richard P. Feynman

The success of engineering work depends on the recognition and use of several synergic factors. While the analytic approach is the key to solving some well-defined subproblems, creativity helps us to free ourselves of prejudices and to find useful analogies. Moreover, critical thinking opens up the way to argumentation with inexact premises and rules. While engineering is based on such complex mental features, it is perhaps more transparent than some other human activities: its world is that of man-made artifacts that should be useful in a broad sense of the word.

This leads us to our belief that in consideration of the advancements in Engineering of Intelligent Systems one may have a proper view of the state of research in the whole of Artificial Intelligence (AI). Knowledge gleaned here is valid not only in this particular application area but provides valuable hints to all perspectives of AI theory and its potential for solving other problems as well.

Having recognized the above features of engineering problem solving, the International Society of Applied Intelligence (ISAI), more than a decade ago, initiated a series of conferences named Industrial & Engineering Applications of Artificial Intelligence & Expert Systems (IEA/AIE). The Hungarian AI community was honored by the invitation of the ISAI to organize and host the IEA/AIE 2001 conference (June 4–7, 2001, Budapest, Hungary), which is the 14th in the series.

The Call for Papers announcement attracted many researchers and engineers from all over the world. A total of 140 papers was submitted and 104 – representing all continents – were selected for presentation at this conference and are included in these proceedings. Main areas of the AI research and different application domains are represented in the papers that are arranged in conference sections / book chapters as follows: Search, Knowledge Representation, Model-Based Reasoning, Machine Learning, Data Mining, Soft Computing, Evolutionary Algorithms, Distributed Problem Solving, Expert Systems, Pattern and Speech Recognition, Vision, Language Processing, Planning and Scheduling, Robotics, Autonomous Agents, Design, Control, Manufacturing Systems, Finance and Business, Software Engineering, and Tutoring.

In addition to ISAI, the main sponsor of the conference, our special thanks are due to the American Association for Artificial Intelligence (AAAI); the Association for Computing Machinery (ACM/SIGART); the Canadian Society for Computational Studies of Intelligence (CSCSI); the European Coordinating Committee for Artificial Intelligence (ECCAI); the European Research Consortium for Informatics and Mathematics (ERCIM); the Hungarian Academy of Sciences (HAS); the Institution of Electrical Engineers (IEE); the International Neural
Network Society (INNS); the Japanese Society of Artificial Intelligence (JSAI); the Ministry of Education, Hungary (OM); and the Southwest Texas State University (SWT) who all supported the 14th IEA/AIE conference.

We wish to thank the members of the International Program Committee, especially those who played specific roles: Soundar Kumara (Program Co-chair), Khosrow Kaikhah (Publicity Chair) and Gusztáv Hencsey (Local Organization Chair). We would also like to thank all the authors and referees for their contribution and efforts which made IEA/AIE 2001 possible.

Last but not least, we would like to express our gratitude to Mrs. Mariann Kindl, Congress Secretary, and Mrs. Cheryl Morriss (SWT) for their enthusiastic and unflagging contributions.

March 2001

László Monostori
József Váncza
Moonis Ali
Organization

The IEA/AIE 2001 conference was organized by the Computer and Automation Research Institute of the Hungarian Academy of Sciences in cooperation with AAAI, ACM/SIGART, CSCSI, ECAI, ERCIM, HAS, IEE, INNS, JSAI, SWT.

Chairs

General Chair: Moonis Ali (USA)
Program Chair: László Monostori (Hungary)
Program Co-chair: Soundar Kumara (USA)
Local Chair: József Váncza (Hungary)
Publicity Chair: Khosrow Kaikhah (USA)
Local Organization Chair: Gusztáv Hencsey (Hungary)

Program Committee

F. Anger (USA) I. Inasaki (Japan)
D. Barschdorff (Germany) L. Kóczy (Hungary)
F. Belli (Germany) A. Kusiak (USA)
I. Bratko (Slovenia) S.R.T. Kumara (USA)
P. Brezillon (France) S. Linnainmaa (Finland)
B.G. Buchanan (USA) R.L. Loganathan (USA)
K.H. Chang (USA) A. Márkus (Hungary)
P.W.H. Chung (United Kingdom) M.M. Matthews (USA)
L. Cser (Hungary) D. Mitra (USA)
A.P. del Pobil (Spain) Y.L. Murphey (USA)
G. Dini (Italy) V. Prabhau (USA)
T. Dobrowiecki (Hungary) H. Prade (France)
R. Engels (Germany) F. Sebastiani (Italy)
R. Fenton (Canada) M. Shpitalni (Israel)
G.F. Forsyth (Australia) R. Teti (Italy)
I. Futó (Hungary) S. Tzafestas (Greece)
L. Giles (USA) P. Valkenaers (Belgium)
P. Groumpos (Greece) T. Vámos (Hungary)
H.W. Guesgen (New Zealand) H. Van Brussel (Belgium)
M.T. Harandi (USA) F.J.A.M. Van Houten
J.P. Haton (France) (The Netherlands)
G. Horváth (Hungary) G. Widmer (Austria)
Auxiliary Reviewers

A. Ekárt (Hungary)  R. Rodrigues (USA)
J. Fürnkranz (Austria)  C. Schittenkopf (Austria)
L. Gulyás (Hungary)  U. Straccia (Italy)
U. Loerch (New Zealand)  P. Szolgy (Hungary)

Sponsoring Institutions

International Society of Applied Intelligence (ISAI)

European Research Consortium for Informatics and Mathematics (ERCIM)
Hungarian Academy of Sciences
Ministry of Education, Hungary
# Table of Contents

## Search

Solving Network Synthesis Problems Using Ant Colony Optimisation ........ 1  
*M. Randall (Bond University), E. Tonkes (University of Queensland)*

A Combined Swarm Differential Evolution Algorithm for Optimization Problems ................................................................. 11  
*T. Hendtlass (Swinburne University of Technology)*

An Evolutionary Optimum Searching Tool ........................................ 19  
*Z. Tóth (University of Szeged), G. Kőkai (Friedrich-Alexander University of Erlangen-Nürnberg)*

Value Prediction in Engineering Applications ................................. 25  
*G. Ziegler, Z. Palotai, T. Cinkler, P. Arató (Budapest University of Technology and Economics), A. Lőrincz (Eötvös Loránd University Budapest)*

Scatter Search with Random Walk Strategy for SAT and MAX-W-SAT Problems ................................................................. 35  
*H. Drias, M. Khabzaoui (USTHB)*

Move Ordering Using Neural Networks ............................................ 45  
*L. Kocsis, J. Uiterwijk, J. van den Herik (Institute for Knowledge and Agent Technology, Universiteit Maastricht)*

## Knowledge Representation

Why Use a Unified Knowledge Representation? .............................. 51  
*J. Debenham (University of Technology, Sydney)*

Lazy Knowledge Base Update .................................................... 61  
*W. Lukaszewicz, E. Madalińska-Bugaj (Warsaw University)*

On the Computational Aspect of Rule Based Database Updates .......... 71  
*Y. Bai, Y. Zhang (University of Western Sydney)*

Building an Information and Knowledge Fusion System .................. 82  
*T. Mészáros, Z. Barczikay, F. Bodon, T.P. Dobrowiecki, G. Strausz (Budapest University of Technology and Economics)*

Hierarchical Approach for Engineering Skills Acquisition .............. 92  
*M.S. Levin (Ben Gurion University)*
Dealing with Information in the Different Styles Together -
Skill Inheritance and Integration of Information .................. 101
   S. Ohsuga, N. Ueda (Waseda University)

Knowledge Modelling in Support of Knowledge Management ....... 107
   R. Kende (University of Technology in Kosice)

A New Approach in Object-Based Knowledge Representation: The AROM
System ............................................................... 113
   M. Page, J. Gensel, D. Bardou (INRIA Rhône-Alpes, Université Pierre
    Mendès-France), C. Capponi (Univ. de Provence), C. Bruley,
    V. Dupierris (INRIA Rhône-Alpes), P. Genoud, D. Ziébelin
    (INRIA Rhône-Alpes, Université Joseph Fourier)

Ontology Integration Tasks in Business-to-Business E-Commerce ....... 119
   B. Omelayenko (Vrije Universiteit Amsterdam)

Model-Based Reasoning

Using Multiple Models for Debugging VHDL Designs ................. 125
   F. Wotawa (Technische Universität Wien)

Lessons Learned from Diagnosing Dynamic Systems Using Possible
Conflicts and Quantitative Models ................................... 135
   B. Pulido, C. Alonso, F. Acebes (Universidad de Valladolid)

Intelligent Assumption Retrieval from Process Models by Model-Based
Reasoning ............................................................. 145
   R. Lakner (University of Veszprém), K.M. Hangos
    (Computer and Automation Research Institute)

A Knowledge Model for Automatic Configuration of Traffic Messages .... 155
   M. Molina (Technical University of Madrid), M. Robledo (University
    Rey Juan Carlos)

Machine Learning

Information Extraction from HTML: Combining XML and
Standard Techniques for IE from the Web ......................... 165
   L. Xiao, D. Wissmann (Siemens AG), M. Brown (Interprice
    Technologies GmbH), S. Jablonski (University of Erlangen-Nuremberg)

Flexible Similarity Assessment for XML Documents Based on XQL and
Java Reflection ...................................................... 175
   D. Bühler, W. Küchlin (University of Tübingen)

Where to Position the Precision in Knowledge Extraction from Text ...... 187
   L. Xiao, D. Wissmann (Siemens AG), M. Brown (Interprice
    Technologies GmbH), S. Jablonski (University of Erlangen-Nuremberg)
Generation of Similarity Measures from Different Sources .......... 197
  B. Stein, O. Niggemann (University of Paderborn)

SNN: A Supervised Clustering Algorithm ....................... 207
  J.S. Aguilar, R. Ruiz, J.C. Riquelme, R. Giráldez
  (University of Sevilla)

An Eager Regression Method Based on Best Feature Projections .... 217
  T. Aydn, H.A. Güvenir (Bilkent University)

On the Relationship between Learning Capability and the Boltzmann-
Formula .......................................................... 227
  P. Stefán, L. Monostori (Computer and Automation
  Research Institute)

Data Mining

A View Selection Tool for Multidimensional Databases .......... 237
  H.M. Jamil, G.A. Modica (Mississippi State University)

Inductive Learning of a Knowledge Dictionary for a Text Mining System .. 247
  S. Sakurai, Y. Ichimura, A. Suyama, R. Orihara (Toshiba Corporation)

Combining Symbolic and Numeric Techniques for DL Contents
Classification and Analysis ........................................ 253
  Y. Toussaint, J.-C. Lamirel (LORIA)

Soft Computing

Neural Learning from Unbalanced Data Using Noise Modeling .......... 259
  H. Guo, Y.L. Murphey (University of Michigan-Dearborn)

Neural Modeling of an Industrial Process with Noisy Data .......... 269
  P. Berényi, J. Valyon, G. Horváth (Technical University of Budapest)

Enhanced Artificial Neurons for Network Applications ............... 281
  G. Murray, T. Hendtlass (Swinburne University of Technology)

Time Delay Neural Networks Designed Using Genetic Algorithms for Short
Terms Inter-City Traffic Forecasting ................................ 290
  P. Lingras, P. Mountford (Saint Mary’s University)

An Efficient Hardware Implementation of Feed-Forward Neural Networks . 300
  T. Szabó, G. Horváth (Technical University of Budapest)

MAPS: A Method for Identifying and Predicting Aberrant Behavior in
Time Series ........................................................ 314
  E. Kotsakis (CCR, Space Application Institute), A. Wolski (SOLID
  Applied Research Center)
Comparisons of QP and LP Based Learning from Empirical Data .......... 326
V. Kecman, T. Arthanari (University of Auckland)

A Fuzzy Cognitive Map Based on the Random Neural Model .......... 333
J. Aguilar (CEMISID, Universidad de los Andes)

Synthetic Damage Assessment for RC Structure Based on Fuzzy Logic .... 339
C.-H. Tsai (National Chung Cheng University), D.-S. Hsu (National Cheng Kung University)

Genetic Algorithm for Fuzzy Logical Equations Solving in Diagnostic Expert Systems ........................................ 349
A. Rotshtein (Jerusalem College of Technology), H. Rakytyanska (Vinnitsa State Technical University)

Diagnosis Based on Genetic Algorithms and Fuzzy Logic in NPPs ....... 359
Y. Zhou, X. Fang, B. Zhao (Tsinghua University)

Vagueness in Spatial Data: Rough Set and Egg-Yolk Approaches ........ 367
T. Beaubouef (Southeastern La. University), F. Petry (Tulane University)

Evolutionary Algorithms

Dynamic Trait Expression for Multiploid Individuals of Evolutionary Algorithms ................................................ 374
C. Woodward, T. Hendtlass (Swinburne University of Technology)

A Genetic and Evolutionary Programming Environment with Spatially Structured Populations and Built-In Parallelism .............. 383
M. Rocha, F. Pereira, S. Afonso, J. Neves (Universidade do Minho)

Genetic and Evolutionary Algorithms for Time Series Forecasting ....... 393
P. Cortez, M. Rocha, J. Neves (Universidade do Minho)

Layout of Two Dimensional Irregular Shapes Using Genetic Algorithms .. 403
R. M’hallah (Institut Supérieur de Gestion de Sousse), A. Bouziri, W. Jilani (Institution de Recherche en Sciences Informatiques et des Télécommunications)

An Application of Genetic Algorithms to Course Scheduling at the United States Army War College ...................................... 412
J.J. Donlon (United States Army War College)

Separation Surfaces through Genetic Programming ..................... 428
J.C. Riquelme, R. Giráldez, J.S. Aguilar, R. Ruiz (Departamento de Lenguajes y Sistemas Informáticos)
Distributed Problem Solving

Distributed Configuration as Distributed Dynamic Constraint Satisfaction ................................ 434
A. Felfernig, G. Friedrich, D. Jannach, M. Zanker (Institut für Wirtschaftsinformatik und Anwendungssysteme, Produktionsinformatik)

Representation Choice Methods as the Tool for Solving Uncertainty in Distributed Temporal Database Systems with Indeterminate Valid Time . . 445
N.T. Nguyen (Wrocław University of Technology)

Checkpoint-Recovery for Mobile Intelligent Networks ......................... 455
Y. Morita, H. Higaki (Tokyo Denki University)

Expert Systems

Automotive Product Documentation ........................................... 465
A. Kaiser, W. Küchlin (Wilhelm-Schickard-Institut für Informatik, Universität Tübingen)

The Design and Implementation of a Traffic Accident Analysis System . . 476
H. Zhang, B. Back (Turku Centre for Computer Science), W.L. Zhou (Deakin University)

Decision Support System for Shadow Mask Development Using Rule and Case ................................................................. 482
H. Jin, M. Kim, S. Jung, K. Shon (Knowledge Base Group, LG PRC),
H. Ha, B. Ye, J. Jo (LG Micron)

An Expert System for Ironmaking .............................................. 488

Pattern and Speech Recognition, Vision

Short Circuit Detection on Printed Circuit Boards during the Manufacturing Process by Using an Analogic CNN Algorithm ............... 494
T. Hidvégi, P. Szolgay (Computer and Automation Research Institute)

Application of Feature Transformation and Learning Methods in Phoneme Classification .......................................................... 502
A. Kocsor, L. Tóth, L. Felföldi (University of Szeged)

A Smart Machine Vision System for PCB Inspection ....................... 513
T.Q. Chen, J. Zhang, Y.L. Murphey (University of Michigan-Dearborn),
Y. Zhou (Jabil Circuit, Inc.)
