# Foreword

This volume contains the revised versions of papers presented at the fourth international Workshop on Implementing Automata (WIA), held 17–19 July, 1999, at Potsdam University, Germany.

As for its predecessors, the theme of WIA99 was the implementation of automata and grammars of all types and their application in other fields. The papers contributed to this volume address, among others, algorithmic issues regarding automata, image and dictionary storage by automata, and natural language processing.

In addition to the papers presented in these proceedings, the workshop included a paper on quantum computing by C. Calude, E. Calude, and K. Svozil (published elsewhere), an invited lecture by W. Thomas on *Algorithmic Problems in the Theory of  $\omega$ -Automata*, a tutorial by M. Silberztein on the INTEX linguistic development environment, and several demonstrations of systems.

The local arrangements for WIA99 were conducted by Helmut Jürgensen, Suna Aydin, Oliver Boldt, Carsten Haustein, Beatrice Mix, and Lynda Robbins. The meeting was held in the *Communs* building, now the main university building, of the New Palace in the park of Sanssouci, Potsdam.

The program committee for WIA99 was:

A. Brüggemann-Klein	Technische Universität München
J.-M. Champarnaud	Université de Rouen
F. Günthner	Universität München
H. Jürgensen	Universität Potsdam and University of Western Ontario
D. Maurel	Université de Tours
D. Raymond	Gateway Group Inc.
K. Salomaa	University of Western Ontario
W. Thomas	Rheinisch-Westfälische Technische Hochschule Aachen
B. Watson	Ribbit Software Systems Inc.
D. Wood	Hong Kong University of Science and Technology
S. Yu	University of Western Ontario

The work of the program committee, the reviewers, and the local arrangements team is gratefully acknowledged.

At the general WIA meeting it was decided to rename WIA into *International Conference on the Implementation and Application of Automata* (CIAA) and to hold the first CIAA, that is, the fifth WIA, in London, Ontario, Canada, in the summer of 2000 in conjunction with the *Workshop on Descriptive Complexity of Automata, Grammars, and Related Structures* (DCAGRS) and a special day devoted to the 50th anniversary of automaton theory. The complete event would be called *Half a Century of Automaton Theory*.

# Table of Contents

FA Minimisation Heuristics for a Class of Finite Languages . . . . .	1
<i>Jérôme Amilhastre, Philippe Janssen, Marie-Catherine Vilarem</i>	
SEA: A Symbolic Environment for Automata Theory . . . . .	13
<i>Philippe Andary, Pascal Caron, Jean-Marc Champarnaud, Gérard Duchamp, Marianne Flouret, Éric Laugrotte</i>	
Analysis of Reactive Systems with $n$ Timers . . . . .	27
<i>Anne Bergeron, Riccardo Catalano</i>	
Animation of the Generation and Computation of Finite Automata for Learning Software . . . . .	39
<i>Beatrix Braune, Stephan Diehl, Andreas Kerren, Reinhard Wilhelm</i>	
Metric Lexical Analysis . . . . .	48
<i>Cristian S. Calude, Kai Salomaa, Sheng Yu</i>	
State Complexity of Basic Operations on Finite Languages . . . . .	60
<i>C. Câmpeanu, K. Culik, K. Salomaa, S. Yu</i>	
Treatment of Unknown Words . . . . .	71
<i>Jan Daciuk</i>	
Computing Entropy Maps of Finite-Automaton-Encoded Binary Images . .	81
<i>Mark G. Eramian</i>	
Thompson Digraphs: A Characterization . . . . .	91
<i>Dora Giammarresi, Jean-Luc Ponty, Derick Wood</i>	
Finite Automata Encoding Geometric Figures . . . . .	101
<i>Helmut Jürgensen, Ludwig Staiger</i>	
Compressed Storage of Sparse Finite-State Transducers . . . . .	109
<i>George Anton Kiraz</i>	
An Extendible Regular Expression Compiler for Finite-State Approaches in Natural Language Processing . . . . .	122
<i>Gertjan van Noord, Dale Gerdemann</i>	
Multiset Processing by Means of Systems of Finite State Transducers . . . .	140
<i>Gheorghe Păun, Gabriel Thierrin</i>	
A Structural Method for Output Compaction of Sequential Automata Implemented as Circuits . . . . .	158
<i>M. Seuring, M. Gössel</i>	

An Algorithm to Verify Local Threshold Testability  
of Deterministic Finite Automata ..... 164  
*A.N. Trahtman*

A Taxonomy of Algorithms for Constructing  
Minimal Acyclic Deterministic Finite Automata ..... 174  
*Bruce W. Watson*
