Foreword

ETAPS 2002 was the fifth instance of the European Joint Conferences on Theory and Practice of Software. ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences. This year it comprised 5 conferences (FOSSACS, FASE, ESOP, CC, TACAS), 13 satellite workshops (ACL2, AGT, CMCS, COCV, DCC, INT, LDTA, SC, SFEDL, SLAP, SPIN, TPTS, and VISS), 8 invited lectures (not including those specific to the satellite events), and several tutorials.

The events that comprise ETAPS address various aspects of the system development process, including specification, design, implementation, analysis, and improvement. The languages, methodologies, and tools which support these activities are all well within its scope. Different blends of theory and practice are represented, with an inclination towards theory with a practical motivation on one hand and soundly-based practice on the other. Many of the issues involved in software design apply to systems in general, including hardware systems, and the emphasis on software is not intended to be exclusive.

ETAPS is a loose confederation in which each event retains its own identity, with a separate program committee and independent proceedings. Its format is open-ended, allowing it to grow and evolve as time goes by. Contributed talks and system demonstrations are in synchronized parallel sessions, with invited lectures in plenary sessions. Two of the invited lectures are reserved for “unifying” talks on topics of interest to the whole range of ETAPS attendees. The aim of cramming all this activity into a single one-week meeting is to create a strong magnet for academic and industrial researchers working on topics within its scope, giving them the opportunity to learn about research in related areas, and thereby to foster new and existing links between work in areas that were formerly addressed in separate meetings.

ETAPS 2002 was organized by the Laboratoire Verimag in cooperation with

Centre National de la Recherche Scientifique (CNRS)
Institut de Mathématiques Appliquées de Grenoble (IMAG)
Institut National Polytechnique de Grenoble (INPG)
Université Joseph Fourier (UJF)
European Association for Theoretical Computer Science (EATCS)
European Association for Programming Languages and Systems (EAPLS)
European Association of Software Science and Technology (EASST)
ACM SIGACT, SIGSOFT, and SIGPLAN

The organizing team comprised

Susanne Graf - General Chair
Saddek Bensalem - Tutorials
Rachid Echahed - Workshop Chair
Jean-Claude Fernandez - Organization
Alain Girault - Publicity
Yassine Lakhnech - Industrial Relations
Florence Maraninchi - Budget
Laurent Mounier - Organization

Overall planning for ETAPS conferences is the responsibility of its Steering Committee, whose current membership is:

Egidio Astesiano (Genova), Ed Brinksma (Twente), Pierpaolo Degano (Pisa), Hartmut Ehrig (Berlin), José Fiadeiro (Lisbon), Marie-Claude Gaudel (Paris), Andy Gordon (Microsoft Research, Cambridge), Roberto Gorrieri (Bologna), Susanne Graf (Grenoble), John Hatcliff (Kansas), Görel Hedin (Lund), Furio Honsell (Udine), Nigel Horspool (Victoria), Heinrich Hußmann (Dresden), Joost-Pieter Katoen (Twente), Paul Klint (Amsterdam), Daniel Le Métayer (Trusted Logic, Versailles), Ugo Montanari (Pisa), Mogens Nielsen (Aarhus), Hanne Riis Nielson (Copenhagen), Mauro Pezzè (Milan), Andreas Podelski (Saarbrücken), Don Sannella (Edinburgh), Andrzej Tarlecki (Warsaw), Herbert Weber (Berlin), Reinhard Wilhelm (Saarbrücken)

I would like to express my sincere gratitude to all of these people and organizations, the program committee chairs and PC members of the ETAPS conferences, the organizers of the satellite events, the speakers themselves, and finally Springer-Verlag for agreeing to publish the ETAPS proceedings. As organizer of ETAPS'98, I know that there is one person that deserves a special applause: Susanne Graf. Her energy and organizational skills have more than compensated for my slow start in stepping into Don Sannella's enormous shoes as ETAPS Steering Committee chairman. Yes, it is now a year since I took over the role, and I would like my final words to transmit to Don all the gratitude and admiration that is felt by all of us who enjoy coming to ETAPS year after year knowing that we will meet old friends, make new ones, plan new projects and be challenged by a new culture! Thank you Don!

January 2002

José Luiz Fiadeiro

Preface

Once again, the number, the breadth and the quality of papers submitted to the CC 2002 conference continues to be impressive. In spite of some difficult times which may have discouraged many potential authors from thinking of travelling to a conference, we still received 44 submissions.

Of these submissions, 21 came from 12 different European countries, 17 from the USA and Canada, and the remaining 6 from Australia and Asia.

In addition to the regular paper submissions, we have an invited paper from Patrick and Radhia Cousot. It is especially fitting that Patrick Cousot should deliver the CC 2002 invited paper in Grenoble because many years ago he wrote his PhD thesis at the University of Grenoble.

The members of the Program Committee took their refereeing task very seriously and decided very early on that a physical meeting was necessary to make the selection process as fair as possible. Accordingly, nine members of the Program Committee attended a meeting in Austin, Texas, on December 1, 2001, where the difficult decisions were made. Three others joined in the deliberations via a telephone conference call. Eventually, and after much (friendly) argument, 18 papers were selected for publication.

I wish to thank the Program Committee members for their selfless dedication and their excellent advice. I especially want to thank Kathryn McKinley and her assistant, Gem Naivar, for making the arrangements for the PC meeting. I also wish to thank my assistant, Catherine Emond, for preparing the materials for the PC meeting and for assembling the manuscript of the proceedings.

The paper submissions and the reviewing process were supported by the START system (<http://www.softconf.com>). I thank the author of START, Rich Gerber, for making his software available to CC 2002 and for his prompt attention to the little problems that arose.

These conference proceedings include the invited paper of Patrick and Radhia Cousot, the 18 regular papers, and brief descriptions of three software tools.

Program Committee

Uwe Aßmann (Linkopings Universitet, Sweden)
David Bernstein (IBM Haifa, Israel)
Judith Bishop (University of Pretoria, South Africa)
Ras Bodik (University of Wisconsin-Madison, USA)
Cristina Cifuentes (Sun Microsystems, USA)
Christian Collberg (University of Arizona, USA)
Stefano Crespi-Reghizzi (Politecnico di Milano, Italy)
Michael Franz (University of California at Irvine, USA)
Andreas Krall (Technical University of Vienna, Austria)
Reiner Leupers (University of Dortmund, Germany)
Kathryn McKinley (University of Texas at Austin, USA)
Nigel Horspool – Chair (University of Victoria, Canada)
Todd Proebsting (Microsoft Research, USA)
Norman Ramsey (Harvard University, USA)

Table of Contents

Tool Demonstrations

| | |
|--|---|
| LISA: An Interactive Environment for Programming Language Development | 1 |
| <i>Marjan Mernik, Mitja Lenič, Enis Avdičaušević, and Viljem Žumer</i> | |
| Building an Interpreter with Vmgen | 5 |
| <i>M. Anton Ertl and David Gregg</i> | |
| Compiler Construction Using LOTOS NT | 9 |
| <i>Hubert Garavel, Frédéric Lang, and Radu Mateescu</i> | |

Analysis and Optimization

| | |
|---|----|
| Data Compression Transformations for Dynamically Allocated Data Structures | 14 |
| <i>Youtao Zhang and Rajiv Gupta</i> | |
| Evaluating a Demand Driven Technique for Call Graph Construction | 29 |
| <i>Gagan Agrawal, Jinqian Li, and Qi Su</i> | |
| A Graph-Free Approach to Data-Flow Analysis | 46 |
| <i>Markus Mohnen</i> | |
| A Representation for Bit Section Based Analysis and Optimization | 62 |
| <i>Rajiv Gupta, Eduard Mehofer, and Youtao Zhang</i> | |

Low-Level Analysis

| | |
|---|-----|
| Online Subpath Profiling | 78 |
| <i>David Oren, Yossi Matias, and Mooly Sagiv</i> | |
| Precise Exception Semantics in Dynamic Compilation | 95 |
| <i>Michael Gschwind and Erik Altman</i> | |
| Decompiling Java Bytecode: Problems, Traps and Pitfalls | 111 |
| <i>Jerome Miecznikowski and Laurie Hendren</i> | |

Grammars and Parsing

| | |
|--|-----|
| Forwarding in Attribute Grammars for Modular Language Design | 128 |
| <i>Eric Van Wyk, Oege de Moor, Kevin Backhouse, and Paul Kwiatkowski</i> | |
