INTRODUCTION

This is the third volume of papers presented at the New York Number Theory Seminar. Since 1982 the Seminar has been meeting every Tuesday afternoon during the academic year at the Graduate School and University Center of the City University of New York. The goal of the Seminar is to provide a forum for the exposure of new results in number theory and allied fields in the New York metropolitan area. Mathematicians who plan to be in New York and would like to attend or lecture in the Seminar are encouraged to contact the organizers.

TABLE OF CONTENTS

D.V. CHUDNOVSKY and G.V. CHUDNOVSKY , Computer Assisted Number Theory.....	1
H. COHN , Successive Diagonal Projections of Hilbert Modular Functions.....	69
P. ERDOS and M. NATHANSON , Problems and Results on Minimal Bases in Additive Number Theory.....	87
P. ERDOS and C. POMERANCE , On the Number of False Witnesses for a Composite Number.....	97
G. FALTINGS , Arithmetic Theory of Siegel Modular Forms.....	101
G.A. FREIMAN ,What is the Structure of K if $K+K$ is Small?.....	109
A. HAAS , The Geometry of Markoff Forms.....	135
D, HAJELA and B. SMITH , On the Maximum of an Exponential Sum of the Mobius Function.....	145
D. HARBATER , Galois Covering of the Arithmetic Line.....	165
W.L. HOYT , Notes on Elliptic $K3$ Surfaces.....	196
P. HRILJAC , Splitting Fields of Principal Homogeneous Spaces...	214
M. GUTZWILLER , Mechanics on a Surface of Constant Negative Curvature.....	230
P.S. LANDWEBER and R.E. STONG , The Depth of Rings of Invariants over Finite Fields.....	259
J. STURM , On the Congruence of Modular Forms.....	275
S.S. WAGSTAFF, JR. and J.W. SMITH , Methods of Factoring Large Integers.....	281
R. WEISSAUER , Divisors of the Siegel Modular Variety.....	304
