## PREFACE

This volume represents the Proceedings of the U.S.-Israel Binational Workshop on Model Theory in Mathematical Logic: Classification Theory. The conference was held in Chicago on December 15-19, 1985. It was sponsored jointly by the National Science Foundation of the United States and the Ministry of Science of Israel. We greatly appreciate their support.

The volume contains several surveys of important recent work (with some new proofs) and research papers. All the papers were refereed by various members of the conference. The immediately following paper surveys the area of Classification Theory and serves as an introduction to this collection.

John T. Baldwin  
University of Illinois, Chicago  
May, 1987

## TABLE OF CONTENTS

J.T. Baldwin	1
Classification Theory 1985	
J.T. Baldwin and J. Berman	24
Concrete representations of lattices and the fundamental order	
S. Buechler	32
Classification of small weakly minimal sets I.	
Z. Chatzidakis, G.L. Cherlin, G. Srouf, S. Shelah, & C. Wood	72
The dimensional order property for separably closed fields	
V. Harnik	89
Countable or $\omega_1$ -like models of Presburger's arithmetic	
B. Hart	107
An exposition of OTOP	
J.T. Baldwin and Charles Steinhorn	127
Exercises on Local Weight	
U. Hrushovski	132
Locally modular regular types	
H.J. Keisler	165
Choosing elements in a saturated model	
J. Knight	182
Degrees of models with prescribed Scott set	
J. Knight & A.H. Lachlan	192
Shrinking, stretching and codes for homogeneous structures	
L. Manevitz & L. Rowan	230
Freedom via forcing	
A. Pillay	247
Simple superstable theories	
S. Shelah	264
Universal Classes: Part I	
S. Shelah	419
Nonelementary classes: Part II	
S. Shelah	498
On almost categorical theories
