Preface

The field of machine learning and data mining in connection with pattern recognition enjoys growing popularity and attracts many researchers. Automatic pattern recognition systems have proven successful in many applications. The wide use of these systems depends on their ability to adapt to changing environmental conditions and to deal with new objects. This requires learning capabilities on the parts of these systems. The exceptional attraction of learning in pattern recognition lies in the specific data themselves and the different stages at which they get processed in a pattern recognition system. This results a specific branch within the field of machine learning. At the workshop, were presented machine learning approaches for image pre-processing, image segmentation, recognition and interpretation.

Machine learning systems were shown on applications such as document analysis and medical image analysis.

Many databases are developed that contain multimedia sources such as images, measurement protocols, and text documents. Such systems should be able to retrieve these sources by content. That requires specific retrieval and indexing strategies for images and signals. Higher quality database contents can be achieved if it were possible to mine these databases for their underlying information. Such mining techniques have to consider the specific characteristic of the image sources. The field of mining multimedia databases is just starting out. We hope that our workshop can attract many other researchers to this subject.

The workshop is the first workshop of machine learning and data mining in pattern recognition. It was organized by the Leipzig Institute of Computer Vision and Applied Computer Sciences. The aim of the workshop was to bring together researchers from all over the world dealing with machine learning for image processing, image interpretation and computer vision in order to discuss the current state of research and to direct further developments in machine learning for image-related topics. We would like to start a series of MLDM workshops dealing with this specific topic.

It is a pleasure for us to thank the invited speakers for accepting our invitation to give lectures and contribute papers to the proceedings. We would also like to express our appreciation to the reviewers for their precise and highly professional work.

We are grateful to the German Science Foundation for their support of the Eastern European researchers.

We appreciate the help and understanding of the editorial staff at Springer-Verlag, and in particular Alfred Hofmann, who supported the publication of these proceedings in the LNAI series.

Last but not least, we wish to thank all speakers and participants for their interest in the workshop.

September 1999

Table of Contents

Invited Papers

Learning in Pattern Recognition1
M. Petrou

Advances in Predictive Data Mining Methods13
S.J. Hong, S.M. Weiss

Neural Networks Applied to Image Processing and Recognition

Multi-valued and Universal Binary Neurons: Learning Algorithms, Application to Image Processing and Recognition21
I. N. Aizenberg, N. N. Aizenberg, G.A. Krivosheev

A Dynamics of the Hough Transform and Artificial Neural Networks36
A. Imiya, K. Kawamoto

Applications of Cellular Neural Networks for Shape from Shading Problem51
M. Milanova, P. E. M. Almeida, J. Okamoto, M. G. Simões

Learning in Image Pre-Processing and Segmentation

Unsupervised Learning of Local Mean Grey Values for Image Pre-Processing64
H. Jahn

Neural Networks in MR Image Estimation from Sparsely Sampled Scans75
M. Reczko, D.A. Karras, V. Mertzios, D. Graveron-Demilly, D. van Ormondt

Extraction of Local Structural Features in Images by Using a Multi-scale Relevance Function.....87
R. M. Palenichka, M. A. Volgin

Image Retrieval

Independent Feature Analysis for Image Retrieval103
J. Peng, B. Bhanu

Non-hierarchical Clustering with Rival Penalized Competitive Learning
for Information Retrieval116
I. King, T.-K. Lau

Classification and Image Interpretation

Automatic Design of Multiple Classifier Systems by Unsupervised Learning131
G. Giacinto, F. Roli

A Comparison between Neural Networks and Decision Trees.....144
C. Jacobsen, U. Zscherpel, P. Perner

Symbolic Learning and Neural Networks in Document Processing

Symbolic Learning Techniques in Paper Document Processing159
O. Altamura, F. Esposito, F. A. Lisi, D. Malerba

Recognition of Printed Music Score174
T. Beran, T. Macek

Data Mining

Reproductive Process-Oriented Data Mining From Interactions between Human
and Complex ArtifactSystem.....180
T. Sawaragi

Generalized Fuzzy Aggregation Operators195
M. Petrou, K. R. Sasikala

A Data Mining Application for Monitoring Environmental Risks209
A. Scaringella

Author Index217
